onemarkets Fund – onemarkets Amundi Absolute Return Growth Fund (merged into onemarkets Amundi Income Opportunities Fund on 16 January 2024)

#### **Economy**

Since the end of June 23 to the closure of the Sub-Fund the portfolio delivered positive performance (class E +4.9%, net of management fees, gross of taxes).

The portfolio had a good start in July due to positive performance coming from our long position in US Equity, Commodities and Gold positions. Our relative positions did well too with the majority of gains coming from our Spread, favoured by tighter credit spreads, and Interest Rate ideas. Then from the beginning of August up to the end of October performance lagged: we kept a defensive profile given the expectation for a recession in the US and weak levels of growth expected in Europe. This meant we had limited exposure to risk assets such as equity and a preference for duration that led to some underperformance. Entering November, we thought the decline in equity markets and the rise in yields were offering interesting opportunities for a rebound in risk assets and a year-end rally, so we decided to increase our equity and kept our preference for long duration exposure. They both proved right as markets rallied and we took some nice profits. In terms of allocation in Q4 we decreased our overall equity exposure from 33.3 % to 25.0 % and our effective duration from 8.6 years to 4.7. years. We started the 2024 year with a little bit more constructive approach and we retained some flexibility due to some improvement in the macro picture and the expectations of rate cuts by central banks but overall return in the first part of January were slightly negative.

Overall, in the period under review, the portfolio delivered a positive performance with positive return coming firstly from our Relative Value positions, Satellite Pillar, followed by our Macro directional position, Macro Pillar, but also our hedges and our selection had small contribution. Overall, portfolio return was driven mainly by the performance in our Spread and Interest Rate relative value strategies, whilst on the directional strategies our long exposure in US equities and in Credit performance nicely.

#### Performance<sup>1</sup>

The share classes of onemarkets Fund - onemarkets Amundi Absolute Return Growth Fund achieved the following performances:

•	A (ISIN: LU2503833399) for the period from 1 July 2023 to 16 January 2024:	4.41 %
•	C (ISIN: LU2503840923) for the period from 1 July 2023 to 16 January 2024:	4.25 %
•	M (ISIN: LU2503840840) for the period from 1 July 2023 to 16 January 2024:	4.42 %
•	MD (ISIN: LU2503840766) for the period from 1 July 2023 to 16 January 2024:	4.42 %
•	U (ISIN: LU2503840337) for the period from 1 July 2023 to 16 January 2024:	6.65 %
•	E (ISIN: LU2503840097) for the period from 1 July 2023 to 16 January 2024:	4.90 %

#### **Economy**

#### Market review

Since the inception of the strategy we have eagerly sought to deliver on our value proposition, by pursuing both attractive levels of income and modest capital appreciation over time. Market sentiment during this period was influenced by various factors, resulting in significant divergences across different investment styles, market breadth, and geographical regions. Additionally, increasing geopolitical risks had a negative impact on stocks across many economic regions. Furthermore, the market saw a surge in enthusiasm for artificial intelligence, causing investors to overlook valuation concerns and favor select growth stocks, such as NVIDIA. This resulted in exceptionally narrow market breadth, with the market-weighted S&P outperforming the equal-weighted S&P by more than 10% in the first half of the year. Additionally, volatility in European markets was driven by President Macron's call for elections in response to European Union elections, which increased political uncertainty in the region.

Recent events have reversed the trend towards market broadening that occurred in May as markets have recently experienced increasing turmoil. Escalating concerns over geopolitical risks in light of elections in Europe have led to apprehension concerning entities bearing any kind of regulatory connection. The make-up of our strategy with exposure to European banks, as an example, experienced commensurate impact during this time period, but in our view, this does not alter the value proposition and long-term prospects of these companies.

Despite the myriad of risks present in today's market landscape, we believe there are opportunities in areas like quality value stocks globally, and high-quality US Treasury and Agency debt. Through this diversified exposure, we believe the Sub-Fund is well-positioned for a market environment characterized by reflationary trends and mispriced risks associated with negative surprises.

Additionally, we believe that our disciplined valuation-based approach employed toward the delivery of an outcome, as opposed to benchmark orientation uniquely positions our strategy to pursue and deliver our stated objectives over the long term. No matter how market conditions may change over time.

#### Portfolio Performance

From the Sub-Fund's inception through 30 June 2024 the portfolio delivered positive performance (class E +1.72%, net of management fees).

As we seek to successfully navigate this environment, the investments we choose not to include in the portfolio are equally as important as the ones we do include. For example, we have minimized exposure to growth stocks that we feel are not only expensive and at greater risk from higher interest rates, but also may represent less compelling income opportunities. Thus, on a relative basis, during the period the equity exposures in the portfolio underperformed given the outsized performance of the U.S. mega caps which dominated market performance given investor exuberance for artificial intelligence applications.

Instead, we are pursuing attractive opportunities in dividend-paying stocks across the globe, including regions such as Japan and in Europe. The portfolio's equity allocation was a very large contributor to the fund's performance during the period. Shell, for example, is a large integrated oil and gas producer incorporated in the UK that saw its shares rise in the period due to rising energy prices with muted capex programs, and the company continues to demonstrate to investors its strong interest in returning cash to shareholders via buybacks and dividends.

Other sector exposures that contributed during the period included the portfolio's exposure to financials, including banks that have enjoyed bigger margins as the result of a higher interest rate environment. Importantly, we are not describing US enterprises, as the majority of traditional US banking operations have mismanaged their balance sheets through funding extremely long receivables (30-year mortgages) at depressed yields subsidized by short liabilities (deposits). Our focus has been on banks that possess high capital ratios and healthy balance sheets including names such as ABN AMRO and Unicredit. We have also invested in banks in Asia, for example, Korea's largest financial services company, KB Financial. Shares of KB Financial continued to rise after the company reported strong performance in CY 2023, achieving record profit growth across its key business segments. In addition, KB recently announced plans to further enhance shareholder returns through dividends and buybacks.

Finally, the Sub-Fund remained exposed to a variety of fixed-income investments. However, in the current environment, we seek to maintain a portfolio with reduced corporate credit risk. Thus, we favoured high-quality U.S. Treasury bonds, and Italian BTPs for a portion of this allocation. During the period, the BTP exposure was a detractor to performance. Overall, the portfolio's Treasury exposure is a direct substitution for high-yield credit where the risk-reward ratio remains adverse. Given the inversion of the U.S. Treasury curve, we have focused the allocation on shorter duration rates averaging at roughly 5%, and an additional buffer held in cash at the positive and attractive overnight rates. These allocations to U.S. bonds have also been favourable in terms of their contribution to portfolio performance over the period.

#### **Economy**

#### Market Review

Over one year the portfolio delivered positive performance (class E +7.37%, net of management fees, gross of taxes). Returns were flat up to mid-November and then we progressively experienced positive performance. We started the third quarter with a defensive approach given the expectation for a recession in the US and weak levels of growth expected in Europe. This meant we had limited exposure to risk assets such as equity and credit assets and a preference for duration. Then, starting from October, we thought the decline in equity markets and the rise in yields were offering interesting opportunities for a rebound in risk assets and a year-end rally. So, we decided to increase our equity and credit exposure and this worked nicely. Markets rallied and we took some profit after the impressive rise, retaining the flexibility to enter the markets at better entry levels given the increased likelihood of a consolidation in light of the uncertain evolution of growth and inflation.

We started the year with a moderately constructive approach due to some improvement in the macro picture and the expectations of rate cuts by central banks. We increased our equity exposure again but we also decided to increase our duration and credit exposure. We continued to be moderately constructive in Q2 too as the macro picture, particularly in the US, remained relatively positive. We saw some positive coming also from corporate profitability and from the relatively dovish attitude from the FED and ECB, despite a reduced number of cuts and different timing. We managed the portfolio dynamically, particularly our portfolio duration whilst equity was increased to the highest levels of the last 12 months.

Overall, portfolio return was driven by our risk asset exposure with equity and credit contributing the most but we got also positive returns from commodities and EM Bonds exposure. On the negative side our US Government positions and the US steepeners whilst our European Govies exposure added to the performance.

Within the Equity space, our positive contribution came largely from our US exposure, followed by Japan. Our Emerging markets exposure had a small positive contribution and similarly our European equity. Negative contributions came from the long positions on core rates (US, in particular) but this loss was partially offset by our exposure to European government bonds, especially peripherals (Italy), long positions on European inflation and direct hedges. Looking at Credit, we had strong positives coming from our exposure to investment grade (mainly US) and high yield (especially European) credit and Emerging sovereign debt (mainly in hard currency).

We had some positive contributions from commodities driven by our investment in gold and to a lesser extent to the generic Bloomberg commodity index and gold and short volatility exposure through option writing (as there was volatility compression due to benign macro environment).

The FX component delivered a slightly positive performance with the negative contribution of the long exposure to the Japanese Yen more than offset by a long exposure to the USD and some EM FX.

# onemarkets Fund – onemarkets Amundi Climate Focus Equity Fund

#### **Economy**

#### Market Review

Global equity markets have enjoyed a very positive performance over the past 12 months, with the MSCI World Climate Paris Aligned Index adding over 19%. Looking at sector drivers, Information Technology, Financials, and Communication Services were among the best performing.

In general, there have been three clear catalysts driving market direction. Firstly, economic data has remained more resilient than many had expected which has boosted sentiment towards risk assets. Secondly, with inflation reducing, central banks have been signalling an easing of monetary policy. Finally, looking at company earnings, they again have been more positive than investors had thought.

Despite this very positive overall performance, the past 12 months has seen some bouts of volatility. This has been mostly driven by geopolitical tensions with the ongoing conflicts in both the Middle-East and Russia/Ukraine. This, coupled with some stickier inflation prints in both Europe and US caused some short-term pullbacks in the market as well as bouts of sector rotation. As fundamental stock pickers, we always try to use these bouts of volatility to add good quality businesses at cheaper prices.

#### Portfolio Review 1 Year

The Portfolio has significantly outperformed its benchmark over the past 12 months (to end June 2024). At sector level, the portfolio has had a positive contribution from Information Technology, Industrials, and Financials. In contrast, our underweight exposure to Communication Services was a headwind.

One of the drivers of the market move higher has been the growth expectations around Artificial Intelligence (AI) which has clearly benefitted the technology sector. Here, our exposure to both Applied Materials and Broadcom have been natural beneficiaries of this market trend. Qualcomm has also contributed positively to the portfolio.

The portfolio lost some ground within Communication Services mainly as a result of not owning some large US-listed companies which we don't own for valuation and ESG reasons. Of our holdings, advertising company Publicis did well as results have been strong showing a good recovery post Covid. Additionally, the company has outlined a credible AI strategy which has been well received by investors.

Within Industrials, transport refrigeration company Trane Technologies has performed strongly as results have shown good operational performance in the company with growth coming through. Schneider Electric has also been a rewarding position for the portfolio following a series of quarterly earnings results which exceeded investor expectations.

Financials were a source of positive performance for the portfolio. Of particular note was the good performance of our insurance holdings. In Japan, Tokio Marine was a strong contributor benefiting from the broad based outperformance of the Japanese market as well as good operational performance. In Europe, reinsurance company Munich Re performed well after the company increased its dividend commitment which was taken well by investors.

Other notable stock level impacts include the good performance of Dell Technologies which performed well given good results and the general momentum of the IT sector. Pharmaceutical company Novo Nordisk also performed well as the demand for its weightloss drug has remained very strong while supply is quite constrained. On the negative side, agricultural equipment maker Deere & Co lagged as the outlook for agricultural spending has weakened.

# Outlook

We have seen recession worries abate as economic data and corporate earnings have been strong. Anecdotally we have seen investors stepping back into equities after months of sitting on the side lines. So where to from here? It is important to differentiate between the near term and the medium term. Market direction in the near term will be ultimately decided by political news flow on which we have little or no visibility. Hence, we will not be trying to second guess the French or the US electorate, but rather we will continue to focus on assessing the quality of business models. Should we see a short-term sell off we will be looking to take advantage by adding intrinsically cheaper names. With a more medium term view we remain constructive as corporate fundamentals remain solid and valuations in most segments of the market are not excessive.

#### Performance

# onemarkets Fund - onemarkets Fidelity World Equity Income Fund

#### **Economy**

#### Market review

Global equities gained in US dollar terms over the 12-month period in view of moderating inflation, resilient economic growth and prospects for interest rate cuts in 2024. Equities were volatile in the early part of the period as a rating downgrade of US government debt, expectations for higher for longer interest rates in developed markets and geopolitical tensions in the Middle East weighed on investor sentiment. That said, markets rallied from November onwards as investors believed that central banks had reached the peak of their policy tightening cycles. Strong economic data, upbeat corporate earnings and hopes for a soft economic landing amid decelerating inflation in developed markets also supported market sentiment. However, gains were limited as inflation remained broadly above target levels, fuelling fears that key central banks will not ease their monetary policies as quickly as previously expected. Against this backdrop, the US and Japanese equity markets gained the most. Emerging markets also ended higher but lagged developed markets, amid concerns around the Chinese economy. At a sector level, information technology (IT) and communication services companies rose strongly, buoyed by optimism towards the artificial intelligence (AI) theme.

#### **Sub-Fund Performance**

Over the year, the Sub-Fund delivered positive returns but underperformed its relative index. Overall stock selection was positive. Market allocation proved to be a headwind, as the Sub-Fund's limited exposure to the IT and communication services sectors, where lack of exposure to stocks benefitting from the AI theme held back returns.

## Not holding 'magnificent 7' detracted

US large cap tech / growth stocks led market gains. Our dividend-based total return approach and valuation discipline means that we do not currently have any exposure to the 'magnificent 7' stocks. Not holding Nvidia was the biggest detractor from relative returns as the stock benefited from positive momentum around AI. The lack of exposure to other mega caps including Alphabet, Meta Platforms also weighed on relative performance.

# Poor performance of health care holdings

Roche and Sanofi came under pressure on weak earnings announcements. The former reported underwhelming FY23 results that slightly missed expectations at the top-line but reported in-line earnings. Management expects its sales to increase in the mid-single digit range in 2024 which implies some cuts to consensus estimates. Sanofi missed both sales and earnings expectations, and its 2024 guidance implies some downgrades to expectations. The manager maintains conviction in both holdings given their attractive valuations and long-term outlook.

#### **Key contributors**

US personal lines insurer (predominantly motor) Progressive Corp. posted a very strong combined ratio, driven by strong underwriting performance. Chipmaker Taiwan Semiconductor advanced. Earlier in the year, the company reiterated its long-term revenue CAGR of 15-20% and gross margins of >50%, while indicating potential upside to both targets, considering the contribution from AI related demand. Professional publishers RELX and Wolters Kluwer were other notable contributors. Both businesses continue to deliver solid organic growth. Meanwhile, RELX benefited from management's confidence on using generative AI to improve their products and be a source of further gradual organic growth acceleration.

# Portfolio strategy and Positioning

#### Well-diversified portfolio with a focus on owning high quality defensives

The Sub-Fund focusses on sustainable businesses with strong environmental, social and governance (ESG) characteristics. Regional and sector weightings are an outcome of the strategy's bottom-up approach to stock selection. The portfolio is well diversified on both counts with a clear defensive tilt as a result of the strategy's focus on companies with resilient returns and strong balance sheets. The largest absolute and relative sector weighting is to financials. However, holdings within the sector are typically higher quality, defensive, long-term compounding businesses with low balance sheet risk. The manager finds attractive opportunities in non-life insurance companies such as Progressive Corp and insurance broker Marsh & McLennan, which show relatively low correlation with the economic cycle. Financial exchange groups Deutsche Boerse and CME Group are oligopoly businesses with low balance sheet risks that benefit from periods of increased market volatility. Industrials is another significant overweight, where he owns professional publishers and information services companies Wolters Kluwer and RELX, which enjoy a high proportion of recurring revenues. This is in addition to high-quality cyclical capital goods companies such as Schneider Electric and WW Grainger. The exposure to the technology sector is made up of technology hardware and software companies, but the Sub-Fund is absent from the richly valued FAANG stocks (namely Facebook (now Meta Platforms), Apple, Amazon.com, Netflix, and Google (now Alphabet), which pay little to no dividends. The Sub-Fund is modestly overweight in consumer staples. Meanwhile, the Sub-Fund is underweight in the more cyclical areas of the market, such as materials and energy, as well as in companies with poor or negative cash flows.

#### Outlook

- High quality dividend stocks should continue to play a key role in investor portfolios. Elevated valuations in parts of the market remain vulnerable to compression. We continue to own companies with high earnings resilience and profitability and low debt at reasonable valuations.
- At the beginning of 2024, we were cautious around what seemed to us an overly optimistic set assumptions being priced into equity markets. Prices at the beginning of the year incorporated four concurrent assumptions: falling inflation, significant interest rate cuts, accelerating GDP growth and high EPS growth. In our view the probability of all four of these scenarios materialising in unison is low and we have already seen a change in interest rate cut expectations take place. While globally, the monetary policy cycle has turned, the US Federal Reserve is not rushing to reduce rates. A combination of strong GDP growth alongside high rates appears overly optimistic and we remain cautious around this set of expectations.
- We remain focused on limiting drawdowns in the portfolio which has a powerful impact on the long-term compounding of returns. In an environment where assumptions around earnings estimates or valuations (through the interest rate effect) face risks, the strategy's permanent emphasis on resilient earnings streams and valuation discipline should offer some relative protection. In terms of risks, we remain wary of hype within the market, whether that be AI within technology or obesity drugs in pharma and where this leads to valuations that bake in overly optimistic assumptions. Our focus instead remains on parts of the market less in the spotlight of investor excitement but where we can build confidence in the progression of underlying earnings at a reasonable valuation. We believe this sets us up for the best chance of success.
- Given performance trends over the last few years, investors have become accustomed to the US being the only region worth investing in, growth being the only style and mega caps the key source of outperformance. However, market history shows that these narratives do change. Portfolio returns are very much driven by stock picking. However, if these trends were to change, they would switch from being headwinds to tailwinds.
- We continue to believe sustainable, well governed businesses that effectively manage environmental and social factors are well
  placed to deliver long-term earnings resilience supportive of long-term dividend and share price growth. Although the Sub-Fund
  sits firmly outside of the 'growth' camp, focusing instead on dividend-based total returns, we remain encouraged by our portfolio
  companies' exposure to sustainable end markets which continue to offer attractive growth opportunities. For example,
  electrification and automation offer structural sources of growth for tech hardware and capital goods businesses which we have
  exposure to in the portfolio.

#### onemarkets Fund – onemarkets BlackRock Global Equity Dynamic Opportunities Fund

#### **Economy**

#### Market review

The trailing twelve months saw many different themes emerge with rapidly shifting regimes leading to vary different outcomes over the course of the year. Starting first with Q3'23, stocks generally sold off sharply as long-term interest rates spiked. On a sector basis, only Energy and Telecommunication stocks finished the quarter with gains. Energy was the best performing segment of the global stock market by far during Q3'23, as OPEC production restrictions more than compensated for moderate global demand. Frustratingly for investors, several market sectors often considered to be "defensive" such as Utilities, REITs, and Consumer Staples, were among the equity market's worst performers during the quarter. Rapidly rising long-term bond yields punished these sectors the hardest, as investors had to more aggressively discount back the sizeable dividends many of these stocks pay. From a style perspective, value stocks were among the quarter's top relative performers, followed closely by the quality, minimum volatility, and momentum. Global small-cap names and global growth stocks generally lagged other styles, as investors penalized stocks that lacked tangible and immediate cash flows.

Stocks generally rallied sharply during Q4'23 as investors started to anticipate a reversal in U.S. monetary policy away from tightening and toward easing. On a sector basis, Technology was the strongest absolute performer. However, Q4'23 also saw a broadening of market participation across a variety of industries and sectors, including several rate-sensitive sectors, such as Real Estate and Financials, which had underperformed broader market cap weighted indexes for the first three quarters of 2023. Even economically sensitive sectors, such as Industrials and Materials outperformed the broader global equity market, despite that fact that while a "soft landing" scenario may, in fact, materialize, most economists remain firmly in the camp that U.S. GDP will slow in 2024 from levels experienced in 2023.

Global stocks, measured by the MSCI World Index, gained +8.9% as the combination of resilient economic growth in the U.S., solid earnings, and continued investor optimism surrounding the growth potential of artificial intelligence (AI) pushed global share prices higher. Stocks gained despite an inflation backdrop that - while much improved - remains above the 2% long-term target. Although elevated U.S. inflation prints precluded the Fed from cutting rates, Fed commentary reinforced the expectation that U.S. inflation would continue to decline. This optimistic outlook served as a catalyst for investors to bid share prices higher. In Asia, Q1'24 ushered in a historic policy shift in Japan. The Bank of Japan ended an 8-year stretch of negative interest rates in the world's fourth largest economy, with a new era of stable inflation in sight.

Global stocks, as measured by the MSCI World Index, gained +2.6% during Q2'24, as a combination of strong secular growth emanating from advancements in Artificial Intelligence (AI) coupled with better-than-expected inflation data in the back half of the quarter, helped boost a number of global market capitalization weighted equity indexes to record all-time highs. In addition, a modest rise in the U.S. unemployment rate coupled with a decline in the U.S. labor participation rate, led many investors to conclude that the long-term impact of the Fed's restrictive monetary policy is beginning to take some momentum out of the U.S. labor market. That said, much of the advance was limited to U.S. large-cap stocks and emerging market (ex-China) equities.

# Performance

1YR Primary contributors to performance relative to the reference benchmark include:

- An overweight to and security selection within information technology
  - At the sub-industry level, security selection was driven primarily through exposure to semis
    - Exposure to software and services was also additive
- An underweight to and security selection within consumer staples
  - At the sub-industry level, security selection was driven primarily exposure to retailers
- Security selection within healthcare, partially offset by an overweight to the sector
- At the sub-industry level, security selection was driven primarily through exposure to select pharmaceutical and med tech companies

1YR Primary detractors to performance relative to the reference benchmark during this year include:

- Exposure to cash
- An underweight to and selection within communication services
  - At the sub-industry level, security selection was driven primarily through exposure to select media and entertainment companies
  - Exposure to telecom also detracted
- An underweight to and selection within financials
  - At the sub-industry level, security selection was driven primarily through exposure insurance companies
- Security selection in energy
  - At the sub-industry level, security selection was driven primarily through exposure to renewable energy

# Performance

The share classes of onemarkets Fund - onemarkets BlackRock Global Equity Dynamic Opportunities Fund achieved the following performances:

•	A (ISIN: LU2503837036) for the year from 1 July 2023 to 30 June 2024:	22.01 %
•	B (ISIN: LU2606422272) for the period from 17 July 2023 to 30 June 2024:	23.22 %

#### Market Review

In Q3 2023, markets falter after a positive start to the year, as central banks emphasized that rates may stay higher for longer than markets were expecting, despite positive core inflation developments. The Fed hiked rates in July, while leaving rates unchanged in September, hinting at another hike later in the year and fewer cuts in 2024 and 2025. The ECB increased interest rates in both July and September, while the BoE held rates steady in September after a 14<sup>th</sup> consecutive hike in August. The BoJ surprised markets in July, keeping its target for 10yr Japanese Government Bonds at 0% but effectively widening the band to +1%. The sovereign bond yields multi-year highs weighed on overall fixed income returns, with the Global Aggregate Total Return Indexregate Total Return Index down -1.8% over Q3. In this environment, equities generally sold off, with the MSCI World index down -3.5%.

In Q4 2023, both bond and equity markets rallied significantly due to positive inflation data and dovish central bank actions. The quarter began with concerns about higher for longer rates and large budget deficits, but lower-than-expected inflation shifted the market narrative towards hopes for a soft landing. The encouraging inflation data led central banks to take mostly dovish action in Q4. The Fed kept rates steady in November and December, suggesting rates were near their peak. The ECB and BoE also maintained rates, while the BoJ kept negative rates and showed no urgency to change policy. In this environment, sovereign bond yields fell sharply, with the Global Aggregate Total Return Index up 6.0%, and the MSCI World index rose 11.4%.

In Q1 2024, risk assets saw strong returns due to a resilient US economy and optimism around Artificial Intelligence, while bond markets lagged. Indeed, the robust US economy and worries over stickier inflation led investors to price in fewer rate cuts for 2024. The inflationary surprises to the upside, led central banks largely to remain on hold. The Fed held interest rates constant but signaled greater confidence in a soft landing, revising up its 2024 growth forecast but indicating that it was still expecting 3 rate cuts during the year. The ECB and BoE also kept rates unchanged. Elsewhere, the BoJ raised rates for the first time in 17 years. In this environment, the MSCI World index ended Q1 up 8.5%, whilst the Global Aggregate Total Return Index fell -2.1%.

In Q2 2024, financial markets were mixed. The Fed's concerns over higher-than-expected US core CPI inflation in March were alleviated by lower figures in April and May. The UK's core annual inflation in May hit its lowest rate since 2021, while Eurozone core inflation slightly increased. Central banks' actions were closely watched: the Fed and BoE held rates steady, the ECB cut rates but stressed future cuts would depend on data. Elsewhere, the BoJ maintained its short-term rate at 0-0.1%. In this environment, equities gained driven by the AI theme, with the MSCI World index up 2.2% and the Nasdaq up 7.8%. However, sovereign bond yields rose as investors priced in fewer rate cuts, resulting in negative returns in core fixed income markets, with the Global Aggregate Total Return Index returning -1.1% in Q2.

#### Performance review

As of 30 June 2024, onemarkets PIMCO Global Balanced Allocation Fund returned 8.42% net of PIMCO fees since June 2023. Over the same year, the Sub-Fund registered a volatility of 6.14% based on monthly returns.

The exposure to US equity was the main contributor to the 12-months performance, given the rally experienced by the US equity market, especially in the Q4 2023 and Q1 2024. In addition, the exposure to other developed markets equity (especially Eurozone) contributed positively to the performance over the year. In the fixed income space, interest rate strategies delivered an overall positive contribution to the performance over the period, although the effect varied across the different geographies. In particular, the exposure to the U.S. nominal duration represented the main detractor, followed by the curve positioning to the Japanese and U.K. nominal interest rates. However, the exposure to the Eurozone duration more than compensated these negative effects. Credit strategies also positively contributed to the performance, although to a less extent, mainly driven by the exposure to Investment Grade spread.

# Positioning and portfolio management activity

During the 12 months period, the portfolio tactically adjusted its exposures to equity, fixed income and inflation linked bonds to navigate the different market dynamics. As of end of June 2024, the Sub-Fund holds ~52% of its assets in nominal bonds, ~36% in equities and ~12% in inflation-linked bonds. The focus is on developed markets over emerging markets, both in the equity and in and fixed-income spaces. In the equity allocation, the main exposure is to US equities (~23%) but the portfolio also holds exposure to other developed markets equities (~10%), including Eurozone (~4%). In the fixed-income sleeve, the preference is for high quality allocations including government bonds across main global developed countries (~17%) and Investment Grade credit, which we prefer over High Yield credit. In addition, the portfolio maintains the exposure to inflation-linked bonds as they can help mitigate inflationary risks.

#### Performance

The share classes of onemarkets Fund - onemarkets PIMCO Global Balanced Allocation Fund achieved the following performances:

Elsewhere, the BoJ maintained its short-term rate at 0-0.1%. In this environment, equities gained driven by the AI theme, with the MSCI World index up 2.2% and the Nasdaq up 7.8%. However, sovereign bond yields rose as investors priced in fewer rate cuts, resulting in negative returns in core fixed income markets, with the Global Aggregate Total Return Index returning -1.1% in Q2.

#### Performance review

As of 30 June 2024, onemarkets PIMCO Global Strategic Bond Fund returned 4.10% net of PIMCO fees since June 2023. Over the same year, the Sub-Fund registered a volatility of 5.00% based on monthly returns.

In terms of interest rates positioning, the duration strategies delivered an overall negative contribution to the performance over the year. However, the different geographies provided heterogeneous effects to the performance. In particular, the exposure to the U.S. nominal duration represented the main detractor over 12 months period, followed by the interest rates curve positioning of Canada and U.K. However, the exposure to the Eurozone nominal duration more than compensated these negative effects, with a modest positive contribution also deriving from the curve positioning to Australian and Japanese interest rates. In the spread space, credit strategies positively contributed to the performance, primarily driven by the tightening of Investment Grade spreads, particularly in the last months of 2023 and the early months of 2024. The exposure to Danish covered bonds and to emerging market debt also delivered a positive return over the year.

# Positioning and portfolio management activity

During the 12 months period, the duration of the Sub-Fund was tactically adjusted to navigate the different fixed income market scenarios and the developments in yields paths. Notably, the portfolio duration reached its maximum (ca. 4 years) at the beginning of November, after being importantly increased in October, when the yields of high-quality bonds reached multi-year highs. At the end of January, the Sub-Fund duration was reduced taking advantage of the bonds rally, to be then opportunistically adjusted in the following months. In terms of sectors exposure, the Sub-Fund main exposure has been to government and government related securities, whilst the allocation to corporate bonds was gradually increased over the period. As of end of June 2024, the Sub-Fund holds ~50% of its assets in government and government related securities, ~38% in corporate bonds, ~6% in covered bonds, ~1% in inflation-linked bonds and the residual portion in net cash and cash equivalents. Within government bonds, the preference is for the main global developed countries, whilst in the corporate bonds space the focus is in the Investment Grade segment.

However, sovereign bond yields rose as investors priced in fewer rate cuts, resulting in negative returns in core fixed income markets, with the Global Aggregate Total Return Index returning -1.1% in Q2.

#### Performance review

As of 30 June 2024, onemarkets PIMCO Global Short Term Bond Fund returned 4.09% net of PIMCO fees since June 2023. Over the same year, the Sub-Fund registered a volatility of 1.20% based on monthly returns.

In terms of interest rates positioning, the duration strategies delivered an overall slightly positive contribution to the performance over the year, especially in the last quarter of 2023, when sovereign bond yields fell sharply towards year-end having touched multi-year highs in October. However, the different geographies provided heterogeneous effects to the performance. In particular, the exposure to the U.S. nominal duration represented the main detractor over 12 months period, followed by the curve positioning to the other countries of the Dollar Bloc (Australia and Canada) and to the Japanese interest rates. However, the exposure to the Eurozone nominal duration more than compensated these negative effects, with a modest positive contribution also deriving from the curve positioning to U.K. interest rates. The exposures to the real duration delivered a slightly negative return over the year. In the spread space, credit strategies positively contributed to the performance, primarily driven by the tightening of Investment Grade spreads, particularly in the last months of 2023 and the early months of 2024.

# Positioning and portfolio management activity

During the 12 months period, the Sub-Fund main exposure has been to government and government related securities, whilst the allocation to corporate bonds has been adjusted to take tactical exposure to the spreads. As of end of June 2024, the Sub-Fund holds ~74% of its assets in government and government related securities, ~8% in corporate bonds, ~5% in covered bonds, ~3% in inflation-linked bonds and the residual portion in net cash and cash equivalents. Within government bonds, the preference is for the main global developed countries, whilst in the corporate bonds space the entire exposure is in the Investment Grade segment. In addition, the portfolio maintains a modest exposure to inflation-linked bonds as they can help mitigate inflationary risks.

# onemarkets Fund – onemarkets J.P. Morgan Emerging Countries Fund

#### **Economy**

### Market Review

The Onemarkets EM Countries portfolio delivered positive absolute returns of 10.9% (EUR) during the 12 months to 30th June 2024, although underperformed the MSCI EM Index over this year.

This Sub-Fund is a multi-manager approach combining Global Emerging Markets (GEM), regional and single country managers with core, value and growth styles. It offers flexibility to manage style and country exposures. The portfolio exploits market opportunities through tactical allocation. The result is a well-diversified portfolio with a moderate risk budget and long term performance target.

Over the 12 month period, the underperformance is heavily concentrated in one country, India, which accounts for nearly all the negative alpha. The negative impact from India was in part due to the underweight, given how expensive the market has become. India has enjoyed an investment led expansion, with broad based strength in a number of smaller capitalization stocks not owned by the portfolio. Local investors have been very active in driving up valuations as domestic mutual fund flows turned positive post-pandemic after nearly 20 years of outflows. Consequently, higher risk and cheaper companies have materially outperformed. At a stock level, the overweight to HDFC Bank, India's largest private sector bank hurt. While the company posted results that were positive, the market did not view it as positive enough to put the market's merger-related concerns to rest, and as a result, the stock underperformed.

China has also continued to be challenging, as the equity market remains disappointed, as government stimulus to support sentiment has been seen as lacklustre. This was most notable in AIA Group Ltd, which provides insurance for consumers, but also in eCommerce due to rising competition, consumer staples due to weak consumer confidence. Within consumer staples, holdings in Budweiser Brewing and China Mengniu detracted, as the companies' operations were severely impacted by the weak recovery in consumer demand and increased pricing pressure as competitors cut prices to try and stimulate interest.

Overweight exposure to Indonesia, the result of stock selection, detracted. Bank Rakyat was the largest detractor. In part this was driven by weak quarterly results early in 2024 as credit costs have risen, but the surprise decision by the central bank to raise interest rates will also have a negative near-term impact given the fixed rate nature of its micro-lending book. The effect of higher rates also negatively affected the other holdings given the impact they might have on credit quality and loan loss provisioning.

The key market contributor was Korea, a market we have been tilting more into over the past year. Korea has benefitted from an improvement in international shareholder sentiment, following the announcement of the "value-up" program, which aimed at revitalising underperforming shares.

KB Financial which was the top stock level contributor as it participated in the Korea Value Up rally, and points towards a continuation of the improvement in terms of better capital allocation and higher dividends.

Exposure to Taiwan positively contributed to relative returns, given gains in semiconductor companies such as TSMC, Novatek and Accton, which were supported by rising demand for semiconductors in general and, in a couple of cases, potential new opportunities. Finally, a positive market response in South Africa following the election in Q2 2024 meant stocks here contributed, rising as it became clear that the new government was likely to be formed of a coalition of "national unity" which might be able to tackle some of the worst economic woes facing the country.

From a sector viewpoint, the most important contributor was Information Technology (tying into the Taiwan comments) with both the overweight being positive as well as selection within the sector. Consumer staples was negative, in particular Chinese names mentioned above.

While markets have certainly been more volatile, there are reasons to be more optimistic about EM equities: falling global inflation provides EM central banks room to cut aggressively, the US dollar is down in real terms from multi-decade highs and structural demand for AI, cloud adoption and EVs set to drive.

As a result of our fundamental view, the portfolio continues to be overweight Taiwan, Korea and Mexico and underweight India, Saudi Arabia and Malaysia. At the sector level, the portfolio has an overweight to information technology, consumer staples and financials and underweight to materials, utilities and healthcare. This is an aggregation of the high conviction themes across the EMAP platform, such as the e-commerce and financial penetration story that is so prevalent in EM. growth for North Asian technology companies.

### Market Review

The S&P 500 Index® returned +24.56% for the trailing one year as of end of June 2024.

The year 2023 was all about "expect the unexpected": The US economy avoided recession; inflation was tamed; interest rates peaked and look set to decline soon; and a flare-up in the banking sector proved to be just that, and no more, despite fears of widespread global contagion. US equity markets therefore had good reason to start this year in a positive mood, and continuing optimism around a "soft landing" propelled markets to all-time high over the first half of the year.

The S&P 500 advanced 15% in the six months to 30 June 2024. This surge was fuelled by a solid earnings outlook and advances in the development of artificial intelligence (AI). Market polarization is evident given how the market rally has been driven by the "Mag 7"; with ~61% of the index returns being contributed by these 7 names. On the contrary, the US economy grew at the slowest pace in two years at 1.6% annualized during the first quarter of 2024. Additionally, inflation trended downwards during the quarter; however, the Fed reiterated that they don't expect to cut rates until they gain confidence that inflation is moving sustainably towards 2%. Notably, Nvidia overtook Microsoft to briefly become the world's most valuable company before slipping down the rankings at the end of June. Finally, the unemployment rate rose to 4% in May 2024, the highest since January 2022.

#### Portfolio Review

The portfolio outperformed its benchmark for the one year period ending June 2024.

Our stock selection in the semi & hardware, retail and industrial cyclical sectors contributed to performance.

Within semi & hardware, our overweight in NVIDIA was the largest contributor. Shares outperformed as the company reported strong earnings results that beat street expectations. The company remains an outsized beneficiary of rapidly accelerating AI infrastructure demand, driving continued positive estimate revisions. We continue to like the name as NVIDIA continues to remain the long-term dominant player in AI Inference.

Among individual names, our exposure to Taiwan Semiconductor proved beneficial for the year under review. The stock has benefitted as the company continues to execute well and reaffirm its dominant position in leading edge foundry against an incrementally softer industry backdrop. Robust AI demand and margin expansion potential continues to benefit Taiwan Semiconductor.

On the negative side, our stock selection in the telecommunication and software & services as well as sector allocation in REITs detracted from performance.

Among individual names, our overweight in Bristol-Myers Squibb was among the largest detractors. Shares plunged as the company reported a net loss due to higher in-process research and development (IPRD) costs from their recent acquisitions, slashed their FY 2024 profit forecast and announced that it would cut jobs this year as a part of its cost saving initiative. It also plans to cut USD 1.5 billion in costs by 2025 and reinvest the money in drug development. However, we continue to like Bristol-Myers Squibb, as the company is a high-quality franchise with a strong product pipeline and the acquisitions were initiated to launch new products and offset the pressure of major patent expirations over next several years.

Within telecommunications, our overweight in Charter Communications hurt performance. The company missed street estimates on earnings and reported an internet customer loss, mostly from residential customers. We maintain our overweight position, as management is investing heavily across rural builds and focusing on mobile phone which will help normalize subscriber growth.

# Market Outlook

We continue to focus on fundamentals of the economy and company earnings. Our analysts' estimates for S&P 500 Index® earnings currently project +12% for 2024 and +15% for 2025. While subject to revision, this forecast includes our best analysis of earnings expectations.

Easing inflation and improved prospects for growth have helped fuel optimism for a soft landing. However, be it the U.S. election, higher policy rates or significant geopolitical tension, risks continue to remain that could push the economy into recession in 2024. Through the volatility, we continue to focus on high conviction stocks and take advantage of market dislocations for compelling stock selection opportunities.

## Market Review

Global equities gained strongly over the 1-year period ending June 30, 2024. In the second half of 2023 performance was boosted by falling inflation rates and growing optimism that the US economy would manage a soft landing. The year started on a weak note, with shares pressured by a growing sense that rates would need to stay higher for longer to beat inflation. However, November 2023 was the strongest month in three years as soft US economic data and weaker-than-expected inflation drove a sharp rally in equity markets. In its final meeting of 2023, the Federal Reserve also adopted a more dovish stance with US policymakers forecasting rate cuts over coming year.

Based on the corresponding optimism of market participants, global stocks rallied strongly over the first half of 2024, with equity indices in many markets reaching fresh highs. Sentiment was buoyed by solid corporate earnings, the continued resilience of the US economy and a pick-up in economic momentum in Europe and China. The rally was mostly driven by outsized returns for information technology and communication services companies. While most other sectors advanced, real estate stocks stood out as notable laggards, declining in value over the year.

Sustainability remains the ongoing theme driving portfolio allocation. This is reflected by the sector allocations for example, where health care and industrials represented the largest sector allocations. While health care companies often contribute strongly to the social aspect of sustainability, companies from the Industrial sector often provide sustainable solutions that also enable other firms to become more efficient. In contrast, most energy companies do not qualify for the portfolio due to the significant environmental impacts of their operations in combination with a lack of transition plans towards a fossil fuel free economy.

Net of fees and in Euro terms the Sub-Fund's M share class (ISIN: LU2595018909) gained 9.56% over the 1-year period. The by far largest contribution to Sub-Fund performance came from the Information Technology sector followed by Industrials and Financials. In terms of key sustainability metrics vis-à-vis the broad market the Sub-Fund's portfolio has a substantially lower carbon intensity (-70%), 2x higher sustainable investment share and is free of any norm-based violations.

The share classes of onemarkets Fund - onemarkets Allianz Global Equity Future Champions Fund achieved the following performances:

#### Market Review

Over the past year, global equities delivered strong performance, with the MSCI World Index rising by approximately 20%. US equities led the charge, buoyed by robust earnings growth in the technology sector and the S&P 500 reaching record highs. European equities also posted gains, albeit more modest, benefiting from improving economic conditions. Emerging markets experienced mixed results, while India outperformed, Chinese stocks lagged due to regulatory uncertainties and a slower economic recovery.

Although the bond market had a strong rally over the last quarter of 2023, it faced a challenging landscape in the first half of 2024, marked by high interest rates and inflation concerns. US Treasury yields increased significantly over the first half of the year as the Federal Reserve postponed potential rate cuts to combat inflation, pushing the 10-year yield to 4.3%. This resulted in price declines for existing bonds. European bonds followed a similar trajectory, despite a rate cut by the ECB earlier in June. Notwithstanding this, corporate bonds managed to hold up relatively well.

Commodities experienced a volatile year. Oil prices fluctuated, initially spiking due to geopolitical tensions and supply disruptions, but later stabilizing around \$80 per barrel as global supply chains adjusted. Gold maintained its status as a safe-haven asset, with prices up 20% per ounce over the past year amid market uncertainties.

Currently, we have 29.6% exposure to equities, 83.0% exposure to fixed income, and have also created a commodity position of 5%. Against this backdrop, the Sub-Fund delivered a solid performance of 5.52% (net of fees, M share class) over the 1-year period. During the second half of 2023, fixed income investments made a significant contribution, while equities also contributed positively. In 2024, global equities were the main positive contributor to the performance, with bonds recording negative returns.

### Market review

Equities outperformed bonds in the second quarter as a soft landing for the US economy was seen as the most likely outcome following the release of benign inflation figures that kept alive the prospect of US interest rate cuts this year. US equities were among the outperformers in the developed market in a rally led by big tech. This rally, which started in October last year, has now seen global stocks rise by approximately 30%. The first half of 2024 was exceptionally good for US stocks. This is despite the market pricing in seven rate cuts at the beginning of the year, which is no longer the case. Tech stocks rose more than 11% on the quarter, bringing this year's gains to over 26%. Five big tech companies - Nvidia, Alphabet, Microsoft, Meta and Amazon – have alone been responsible for more than half of the S&P 500's 15% return this year. In contrast, eurozone, UK and Swiss stocks lost ground as concerns about weak growth and political uncertainty weighed on investor sentiment. Political developments were particularly influential in bond markets. French President Macron's decision to call a snap election rattled markets. The growing hard right sent French government bond yields higher as investors grew concerned at the prospect of a deterioration in the country's fiscal position.

The strategy achieved a positive performance both over the quarter and over the month. In both periods this was mostly driven by the equities' allocation, with the absolute return allocation (Pictet Multi Asset Global Opportunities) being the second-best contributor. The bonds' allocation contributed as well during the month while it was negative in the quarter. Within the equity allocation, both in the quarter and in June, defensive equities were the main positive performance driver. At month end the single stocks equity component stands at around 65% of the portfolio, slightly decreased over the month. The thematic equity allocation lagged global equities over the quarter, while it only slightly detracted over the month. In Q2 growth-oriented themes Digital, Biotech and Robotics experienced the best performances, while Timber, Premium Brands and Water lagged.

Looking at defensive equities, the allocation underperformed global equities during the quarter, driven by a combination of adverse equity factor environment, increased concentration, and narrow market breadth, with gains driven by just a handful of stocks and industry groups. The challenging period for the allocation this quarter and year-to-date was mainly due to the growth and momentum styles, which strongly outperformed, while the defensive factors, such as low vol and value, to which the strategy is exposed continued to struggle. At an industry level, the underweight in semiconductors was the notable headwind during the quarter, with Nvidia the biggest detractor.

Within the bond component, the slightly negative performance mainly came from peripheral European government bonds.

As of the end of the year, at sector level the strategy is mainly overweight Industrials, Health Care, and Consumer Discretionary, while the biggest underweights are Energy, Communication Services and IT. At Country level, the equity allocation is mainly overweight US, Switzerland and UK, while it underweights China, Canada, and Taiwan.

While the macro environment in most developed markets was surprisingly resilient in the first half of the year, underpinning the equity markets gains, more recent data points to economic momentum now beginning to soften, driven mainly by moderating consumer sentiment and spending. Given this heightened uncertainty and the narrow index gains, the macro environment might start being relatively more supportive also for overlooked quality stocks and defensive styles that have so far underperformed this year.

Within thematic equities we continue to prefer companies and sectors with high profitability, good earnings visibility and low leverage, which typically perform well in an uncertain low growth environment. We currently find many of these investment opportunities in companies related to secular growth drivers in Resource Efficiency, Personal Health & Wellbeing, Housing & Smart Buildings, Financial Inclusion and Industrial Efficiency. That said, this ongoing uncertainty around growth and rates will likely continue to drive market volatility and weigh on sentiment, underpinning the case for our defensive equities allocation. On the bond component, given current yields and future expectations, we prefer to limit risks and focus on European government bonds which we believe may offer a certain amount of decorrelation and diversified return within the portfolio.

The share classes of onemarkets Fund - onemarkets Pictet Global Opportunities Allocation Fund achieved the following performances:

•	A (ISIN: LU2595022927) for the period from 2 August 2023 to 30 June 2024:	11.10 %

#### **Economy**

## Review of the business year

Although various risk scenarios characterized the financial markets in 2023, they posted some significant gains across most asset classes.

Large parts of the bond universe were able to generate positive returns again this year after two consecutive years of negative performance. This, despite the fact that the major Western central banks have continued to tighten their monetary policy significantly in 2023 in order to stabilize inflation expectations. For a long time, market participants underestimated the sustained restrictive monetary policy of most central banks, which caused bond yields to raise temporarily to record highs at the beginning of the fourth quarter. However, in the fourth quarter of 2023, interest rate cut fantasies ultimately gained the upper hand again, causing yields to fall.

Credit spreads on high-quality investment grade corporate bonds proved to be quite resilient in 2023. They narrowed over the course of the year and were therefore able to close on a positive note. This pleasing development was primarily driven by the continued solid fundamentals of companies. However, low issuing activity, granular maturity profiles and overall positive rating momentum also provided support.

On the global financial markets, the first quarter has been very positive so far. Market participants on both sides of the Atlantic, while pricing out several expected rate cuts, welcomed recent signals that major central banks are still on course to cut rates. The development is largely based on a Goldilocks scenario of a soft or even a no-landing of the US economy and gradually increasing growth prospects in the rest of the world, with persistent disinflation opening the door for central banks to cut interest rates towards the middle of the year.

Credit spreads on corporate bonds narrowed significantly in the first three months of the year. On the one hand, global growth data as well as corporate fundamentals proved to be relatively robust. On the other hand, the rise in government bond yields generated attractive total returns for corporate bonds, which in turn provided significant demand impetus for the latter.

The robust economic performance continued in the second quarter of 2024 and risky assets delivered further positive results. Concerns about a possible overheating of the US economy ebbed away, and on the other hand, hopes for a soft landing were revived. Economic sentiment in Europe also continued to brighten. Against the backdrop of robust growth, however, inflation has been more stubborn. The bond markets continue to expect significantly fewer interest rate cuts than at the end of last year.

Solid macroeconomic momentum supported the good performance of risk premiums for corporate bonds. On the one hand, the former limited corporate default rates on a broad basis, and on the other hand, the robust corporate earnings were reflected in the fundamentals and ensured a continued decline in risk premiums.

In our baseline scenario, we see a continuation of the stable macroeconomic overall picture. Furthermore, we expect that a continued disinflationary trend will give Western central banks room to cut interest rates (further).

The last reporting season confirmed the trend of stable fundamental balance sheet ratios for companies. In the investment grade corporate bond segment in particular, reporting was better than expected in most sectors. We expect companies to continue to manage their capital conservatively and leverage ratios to remain stable, which should support risk premiums.

With over 170 different individual bonds, the portfolio has a high degree of diversification across all segments and sectors. Corporate bonds from the high-quality investment grade sector continue to form the central building block. Within this, duration was successively expanded, primarily by means of traditional industrial companies. The banking sector continues to be attractively valued, especially from a risk-return perspective in the area of subordinated bonds with short maturities and high issuer quality.

The share classes of onemarkets Fund - onemarkets VP Global Flexible Bond Fund achieved the following performances:

#### onemarkets Fund – onemarkets VP Global Flexible Allocation Fund

#### **Economy**

## Review of the business year

The financial markets were positive overall in 2023 despite various risk factors. Equities were highly volatile but performed well, driven in particular by the hype surrounding artificial intelligence in the US. Turbulence in the US regional banking sector and the Credit Suisse crisis led to temporary losses in value. Emerging market equities suffered in part from the sell-off in Chinese stocks. Japanese equities surprised positively.

The bond markets recorded positive returns after two years of negative performance, despite the tighter monetary policy of Western central banks. Market participants initially underestimated the restrictive monetary policy, which led to temporarily high bond yields. Towards the end of the year, however, yields fell on the back of interest rate reduction fantasies.

Credit risk premiums on investment grade corporate bonds proved resilient and closed on a positive note, driven by solid fundamentals, low issuance and positive rating momentum.

Commodities lost some value, with the exception of precious metals. Gold benefited briefly from banking turbulence, but was weighed down by rising interest rates. Since the Hamas attack on Israel, gold has been on the upswing again.

Medium-term risk/return expectations are improving due to the highest bond yields in over ten years and more favorable equity valuations. Bonds and equities should perform well in 2024, despite existing risks such as the impact of monetary tightening and geopolitical tensions that could continue to cause volatility.

On the global financial markets, the first quarter 2024 has been very positive. Market participants on both sides of the Atlantic, while pricing out several expected rate cuts, welcomed recent signals that major central banks are still on course to cut rates. The development is largely based on a Goldilocks scenario of a soft or even a no-landing of the US economy and gradually increasing growth prospects in the rest of the world, with persistent disinflation opening the door for central banks to cut interest rates towards the middle of the year.

Equity markets broadly rose in the first quarter 2024, benefiting the portfolio from its allocation to European, US and Japanese stocks. Even the emerging markets (especially China) sent a sign of life. Credit spreads on corporate bonds narrowed significantly in the first three months of the year. Overall, this segment maintained a positive result despite rising yields on government bonds. However, gold was the most convincing, advancing in the double-digit percentage range. However, commodities such as oil and copper also performed very well.

The robust economic performance continued in the second quarter of 2024 and risky assets delivered further positive results. Concerns about a possible overheating of the US economy ebbed away, and on the other hand, hopes for a soft landing were revived. Economic sentiment in Europe also continued to brighten. Against the backdrop of robust growth, however, inflation has been more stubborn. The bond markets continue to expect significantly fewer interest rate cuts than at the end of last year.

Solid macroeconomic momentum supported the good performance of equities and risk premiums for corporate bonds. The decline in bond yields has largely stalled (Bunds) or been very volatile (US Treasuries). Precious metals such as gold also did not continue their upward movement and consolidated sideways.

The share classes of onemarkets Fund - onemarkets VP Global Flexible Allocation Fund achieved the following performances:

#### **Economy**

## Review of the business year

The Sub-Fund experienced a consolidation phase for the stock and bond markets in Q323 and closed the year on a positive mood with the main equity indexes hitting record highs and the US market outperforming the European one. The Sub-Fund experienced also a significant downward movement in yields of both the government and corporate bonds thanks to the belief that central banks would have been able to defeat inflation by completing their monetary tightening policy.

Q124 was again a good quarter for equity market buoyed mainly by solid results in the technology sector and enthusiasm for Artificial Intelligence. In Q224 the US stock markets continued to rally despite some profit-taking which must be seen as a normal consolidation phase while in Europe the completely unexpected results of the European Parliament elections triggered a correction phase with outflows from equity assets and a repositioning towards a more defensive sector allocation. Regarding fixed income, weakness and increasing volatility was instead recorded in the government bond market with negative returns across the main geographies. In Q124, the yields of government bonds moved upwards on the back of more resilient economic data and signs of a persistent inflation, as well as mixed messages from Central Banks on possible postponements of rate cuts. In the second quarter, following the outcome of the French elections, flows shifted from European government bonds towards corporate debt in EUR and USD and towards US treasuries and German bunds favored by the repositioning of investors in favor of "fly to quality" assets. For global IG and HY credit, spreads tested multi-decade lows and valuations became increasingly expensive thanks to attractive yields that continued to attract flows in these asset classes.

In terms of composition, over the first year the equity exposure of the Sub-Fund was increased, from an initial 35% to 41% at the end of Q224 and a few increases and profit takings of tactical nature were carried on some sectors and countries (US, Energy and Tech). The Sub-Fund remained focused on the technology, healthcare and financial sectors and regionally on the US market followed by Europe and Japan. Fixed income exposure, invested mainly in Euro Govies and Corp IG remained essentially unchanged at 60% during the year. In Q224 within the fixed income asset classes the emerging debt exposure was increased at the expense of corporate floating, since the returns of the emerging markets in hard currency are still high and such as to be able to offset any potential volatility phases in prices. We have also reduced exposure to IG corporate bonds and all-maturity government debt in favor of the intermediate segment (3-7 years) of the eurozone government curve, given the risk-return profile of this segment which appears to be the most competitive one in a soft landing scenario in Europe and a gradual monetary easing policy by central banks. Commodity exposure was closed over the year with a positive outcome for the fund.

The positive performance over the past 12 months was due to over 70% to the equity risky assets and to roughly 27% to the bond exposure. The best performance came from the US stock market on which we maintained an overweight stance, contributing to 50% of the overall return of the Sub-Fund.

The share classes of onemarkets Fund - onemarkets Global Multibrand Selection Fund achieved the following performances:

# onemarkets Fund – onemarkets Balanced Eastern Europe Fund

#### **Economy**

## Review of the business year

The onemarkets Balanced Eastern Europe is a multi-asset portfolio with geographical focus on Eastern Europe. It is designed to be a vehicle for easy exposure to the region and to add diversity to the investor's portfolio.

In the second half of the last year and first half of this year GDP growth proved to be solid in the CEE region. As for the inflation pressures, they are cooling in the CEE area although with variations country by country.

Since inception of the Sub-Fund bond markets were still under pressure and very volatile but the sentiment changed in the last quarter of the year. Bonds delivered strong performance into the end of 2023 as bond valuations assumed that there would be aggressive rate cuts by the ECB and Fed already in the first quarter of 2024.

However, inflation proved sticky and job growth remained robust. Higher interest rate volatility and policy rate uncertainty has influenced bond market performance this year and the bond market gave away most of the gains from the last quarter of the previous year. But on a positive side, we have witnessed credit spread tightening for most of the CEE region countries. So, in the fixed income part, Romanian and Hungarian government bonds had the biggest contribution to the performance.

On the equity side we increased overall exposure to equity over 30% to increase long term expected return. Also, we are initiating exposure to Western Europe to gain exposure to fast growing sectors like technology because the region does not have companies from the sector and is mostly concentrated in three sectors (financials, utilities, and energy). In 2024 Romanian and Polish stocks had highest positive contribution with banks as a leading sector.

Looking ahead, we expect GDP in the CEE area to continue recovering. Inflation is expected to be contained at the level which allows modest rate cuts till the end of the year.

Short to medium duration bonds continue to be preferred in the overall bond portfolio. The Sub-Fund will continue to invest in government bonds which should perform well when the inflation pressures finally subside or growth slows and central banks lower interest rates.

We also plan on adding more risk to the fixed income part of the portfolio both in terms of credit rating and longer duration for the year that is ahead of us. On the equity side we plan to further increase exposure to Western Europe which is current about 8% of the Sub-Fund. Also, we plan to increase overall equity exposure to around 35%. The Sub-Fund preferred large caps over small caps in the region aiming to maintain highly liquid stocks in the portfolio. The region is full of companies with high dividend yields and the situation has been actively tracked and evaluated in terms of dividend sustainability. The modest valuation of the companies in the region is historically aligned with the risk profile of the region compared with other regions of the emerging market. The Russia-Ukraine war in the neighborhood of the region certainly played role in the last few years by increasing volatility, but the stock volatility receded recently.

Overall, combined dividend and current yield for the Sub-Fund is around 5% gross, duration is around 3.7 years, and average credit rating is A+. Currency exposure is around 70% to Euro, then a Polish Zloty around 13% and RON around 6%.

The share classes of onemarkets Fund - onemarkets Balanced Eastern Europe Fund achieved the following performances:

•	B (ISIN: LU2595015558) for the period from 19 July 2023 to 30 June 2024:	4.24 %
•	C (ISIN: LU2595015632) for the year from 1 July 2023 to 30 June 2024:	4.95 %
•	CD (ISIN: LU2595015715) for the period from 12 July 2023 to 30 June 2024:	5.01 %
•	M (ISIN: LU2595015806) for the period from 20 July 2023 to 30 June 2024:	4.61 %
•	MD (ISIN: LU2595015988) for the period from 12 July 2023 to 30 June 2024:	5.25 %

#### onemarkets Fund – onemarkets Multi-Asset Value Fund

#### **Economy**

## Market Review

The onemarkets Multi-Asset Value Fund finished its first year with a net return of +7.91% (share class C - LU2595012704).

Our "New Active" investment approach strategically selects from the broad investment universe, prioritizing strategies over asset classes. This approach has yielded a dynamic portfolio comprising both directional and uncorrelated assets, balancing long-term structural positions with tactical exposures. Since inception, each strategy—Compounders (Growth), Alternative Risk Premia (Decorrelation), Special Situations (Idiosyncratic Bottom-Up), Macro (Top-Down), and Income (Cash Flow Generation)—has delivered positive contributions.

Over the past year, the Income Strategy has emerged as the best performer. Our conviction-driven, unconstrained approach within the bond market has facilitated the generation of diversified total returns amidst market volatility. We have gradually increased credit exposure and selectively extended the duration of our fixed income portfolio, while adhering to a conservative stance. Our dynamic risk management strategy has been tailored to navigate the varying phases of economic and interest rate cycles, with a commitment to downside risk mitigation. The evolving interest rate landscape has unveiled attractive carry opportunities, particularly in the financial and energy sectors, where we remain concentrated on quality and liquidity.

A pivotal element of our Macro Strategy has been the allocation to commodities, with Uranium and Copper significantly bolstering performance over the last twelve months. Despite their inherent volatility, we maintain a positive outlook, underpinned by their essential role in infrastructure development, electrification and energy transition.

The technological shift towards Artificial Intelligence (AI) has also been a key market theme. We have invested in enablers in the semiconductors space, such as testers, and in the developers of infrastructure and best in class industrials poised to capitalize on value chain relocation and technological advancements.

Gold has continued to serve as a robust diversification tool and remains a cornerstone of our Alternative Risk Premia strategy, complemented by our proprietary systematic sub-strategies.

The Special Situations Strategy's contribution, notably from WeBuild SPA, warrants recognition.

Given the Sub-Fund's goal-oriented framework, portfolio risk metrics have been paramount. The performance since inception has been achieved maintaining risk under control, ensuring that realized ex-post volatility consistently remains below the pre-set volatility threshold.

In terms of risk-adjusted metrics, the C-share class has realized a volatility of 6.21% since inception (30 June 2023). This has resulted in a Sharpe ratio of 0.65 and a Sortino ratio of 0.61, indicative of the Sub-Fund's ability to deliver performance efficiently relative to the risk undertaken.

The share classes of onemarkets Fund - onemarkets Multi-Asset Value Fund achieved the following performances:

•	A (ISIN: LU2595012373) for the period from 10 July 2023 to 30 June 2024:	9.40 %
•	AD (ISIN: LU2595012456) for the period from 25 April 2024 to 30 June 2024:	0.06 %
•	B (ISIN: LU2595012530) for the period from 18 July 2023 to 30 June 2024:	8.18 %
•	C (ISIN: LU2595012704) for the year from 1 July 2023 to 30 June 2024:	7.91 %
•	CD (ISIN: LU2595012886) for the year from 1 July 2023 to 30 June 2024:	7.91 %
•	M (ISIN: LU2595013009) for the period from 20 July 2023 to 30 June 2024:	8.25 %
•	MD (ISIN: LU2595013934) for the period from 12 July 2023 to 30 June 2024:	8.77 %

## onemarkets Fund - onemarkets Short Term Bond HUF Fund

#### **Economy**

### Market Review

In the time prior to the start of the Sub-Fund in February the drivers that were primarily influencing the performance of the bond market were expectations of falling inflation and the central bank cutting the reference rate and which were fundamentally supported by a positive macroeconomic environment and outlook. However, later in the period other risk factors came to the forefront when the government tried to pass a law amending central bank regulations. Unfortunately, that wasn't received well by the market and had resulted in the deterioration of country's risk assessment, increased risk premium on HUF assets, lower asset prices and prompted currency depreciation at the end of 1<sup>st</sup> quarter. After that the government has tried to tone down the rhetoric regarding the proposed law postponing it until autumn but that hasn't convinced the market since the yields for all maturities over 1 year ended the quarter in the range of 50 -70bp higher which weighed especially heavy on higher duration assets.

At the end of 1st quarter performance was slightly negative since almost all parts of the yield curve experienced yield increase due to various risk factors previously described but has been partially shielded by its lower duration assets which performed positive throughout the period. At the beginning of the 2<sup>nd</sup> quarter the Sub-Fund lowered duration, shift from 2 year duration towards 1 year, to improve its risk reward ratio and in order to position the Sub-Fund for the emerging market conditions. We increased our exposure to money market instruments primary by participating in the treasury bill auctions and in a smaller part by placing short term deposits. These actions resulted in the recovery of the Sub-Fund's performance. Overall short end of the curve achieved strong yield decrease therefore having especially positive impact on the assets in the portfolio. Improving market sentiment, both domestic and international, continued the trend of positive performance at the end of 2nd quarter.

The short-term outlook has improved but some level of uncertainty is still present. The inflation rate is expected to fluctuate within the tolerance band, close to its upper bound in the coming months. Monetary easing policy has already mostly been employed in previous rate cutting cycles and its further reach is limited due to expected higher inflation prints in the other half of the year along with still persistent core inflation. Another crucial indicator that can impact the volatile financial market sentiment is budget deficit whose path in the immediate future will determine the country's risk premium. Careful approach to any upcoming market reading and data will determine the best risk reward allocation in line with the investment strategy of the Sub-Fund.

#### Performance

The share classes of onemarkets Fund - onemarkets Short Term Bond HUF Fund achieved the following performances:

M (ISIN: LU2673936055) for the period from 5 February 2024 to 30 June 2024: 0.43 %

## onemarkets Fund - onemarkets Bond HUF Fund

#### **Economy**

### Market Review

The Bond market in Hungary was also affected by the growing budget deficit due to soaring interest repayment costs, higher social spending, and lower EU fund flows. The deficit at the end of the first quarter was already at more than half of Hungary's annual target, which negatively affected the market's risk assessment. On top of that, the market was very sensitive to the international backdrop of still-high inflation prints from the US and Eurozone, which negatively influenced domestic yields and further pushed asset prices lower. The negative trend on the domestic market continued well into the start of the second quarter but sentiment was improved when S&P confirmed the country's credit rating with a stable outlook despite fiscal pressures. That started to reverse the upward trajectory of shorter-end market yields, delivering some respite to the market. The international sentiment began to improve in the second quarter as well, with increasing expectations of an upcoming rate cut by the ECB. Along with the cooling of domestic risk factors, this changed market outlook towards a more positive tone and started positively affecting performance of the Sub-Fund.

At the Sub-Fund's inception, expectations of falling inflation and a stable macroeconomic outlook drove positive bond performance. However, tensions between the government and the central bank overshadowed these gains. By the end of the first quarter, performance turned negative, particularly affecting the Sub-Fund's high-duration assets as yields for maturities over one year rose significantly. In response, the Sub-Fund reduced its duration at the start of the second quarter to mitigate the impact of rising yields. Concerns over the budget deficit, monetary policy disputes, and a challenging international backdrop further weighed on performance. Improving yet volatile market sentiment led to sideways movement in the portfolio's performance in the last two months of H1. Overall, throughout the period mid to long end of the curve were under the pressure of increasing market yields thus negatively impacting Sub-Fund's performance.

Overall macroeconomic conditions are expected to improve in the second part of the year prompted by recovering economic growth, historically high foreign exchange reserves, the persistent improvement in the current account balance and a cautious approach to monetary policy. Among other risks, we should certainly highlight the super election year in Europe. Globally, US - yield development is to remain a key factor and the market should continue to react to expectations regarding the Fed rate policy.

#### **Economy**

## Market Review

During the current reporting period (from the Sub-Fund's inception on 29 January 2024, to 28 June 2024), global stock markets experienced an upward trend. American and Japanese indices showed significant gains, while European stocks also brought joy to investors. However, there was a slight downturn in European markets recently due to unrest following the elections in France. The European Central Bank (ECB) lowered interest rates for the first time in a long while to stimulate economic activity by making borrowing cheaper. Nevertheless, ECB President Christine Lagarde indicated that a "soft landing" for the economy is not yet assured. Despite a strong labor market providing some leeway for the central bank to gather more data, the outlook for economic growth remains uncertain. This suggests that caution is warranted in future policy adjustments.

Within the Sub-Fund, the picture is mixed: stocks predominantly gained, lifting the portfolio, while bonds were disappointing and suffered losses. The bond side, which currently accounts for around 50% of the portfolio, consists of one half corporate bonds and the other half government bonds. One third of the government bonds are inflation-linked bonds. The average duration is around 5.2 years and the yield on corporate bonds is 3.55%, while the yield on government bonds is 3%. Investors' expectations that the European Central Bank will ease its monetary policy twice more this year and cut the key interest rate to as low as 2.25% in 2025 are justified, according to Council member Olli Rehn. The Finnish central bank chief thus gave one of the clearest signals to date on the interest rate path in the eurozone. He emphasized that although it would be necessary to ensure that inflation fell back to 2%, the economy should not be slowed down excessively. The key interest rate could therefore be 3.25% at the end of the year and should reach the end of the cycle at 2.25% to 2.5% next year.

The stock side of the portfolio showed a mixed performance. The stock of UCB, a pharmaceutical company, performed particularly well, significantly contributing positively to the portfolio. UCB's strong performance can be attributed to successful drug launches and positive clinical trial results, which boosted investor confidence. On the other hand, Medtronic, a medical device company, did not meet expectations. The company faced several challenges, including regulatory hurdles and supply chain disruptions, which impacted its performance negatively.

Additionally, it must be noted that the chosen stocks in the pharmaceutical sector did not demonstrate their defensive qualities — on the contrary, the sector was weak compared to others. This underperformance was largely due to heightened regulatory scrutiny and pricing pressures, which weighed on the sector. Despite the defensive nature typically associated with pharmaceuticals, these challenges underscored the sector's vulnerability in the current market environment.

In the information technology sector, the picture is mixed: while Intel and Capgemini were weak, Adobe and Qualcomm showed strong gains. Intel's underperformance was largely due to competitive pressures and delays in product launches, which affected its market share. Capgemini, on the other hand, faced challenges related to integration costs following recent acquisitions, which weighed on its profitability. Conversely, Adobe benefited from strong demand for its digital media solutions, driven by the ongoing digital transformation across industries. Qualcomm also performed well, capitalizing on the growing adoption of 5G technology and strong demand for its chipsets.

Newmont performed very well during the reporting period, benefiting from the rising gold price. As a leading gold mining company, Newmont's performance is closely tied to gold prices, which saw an uptick due to increased demand for safe-haven assets amid economic uncertainty. The company's strong operational performance and strategic initiatives further bolstered its stock price. Looking ahead, the outlook for the Sub-Fund remains cautiously optimistic. The potential for further monetary easing by the European Central Bank could provide a supportive backdrop for equities. However, the economic environment remains uncertain, with potential headwinds from geopolitical risks and inflationary pressures. The Sub-Fund will continue to focus on a diversified approach, balancing growth opportunities with defensive positions to navigate the evolving market landscape.

In summary, the reporting period saw significant gains in global stock markets, with notable performances in American and Japanese indices. European stocks also performed well, despite recent volatility due to political unrest in France. The ECB's interest rate cut aims to stimulate economic activity, although the outlook for growth remains uncertain. Within the Sub-Fund, stocks performed well overall, particularly UCB and Newmont, while bonds faced challenges. The mixed performance across sectors highlights the importance of a diversified approach in navigating the current market environment.

## onemarkets Fund - onemarkets BlackRock Low Duration Bond Fund

#### **Economy**

### Market Review

The ECB cut rates for the first time since 2019 in June, reducing its main interest rate from 4% to 3.75%. Markets had expected this to occur with ECB effectively pre-committing to this action following comments in previous meetings. Rhetoric suggested consecutive cuts would be unlikely with the central bank more likely to wait on incoming inflation and wage data. Markets are broadly in line with between 1 and 2 further cuts expected in 2024.

Rates rose in 2024 with 10-year German yields finishing Q2 around 2.50%. Initially driven by higher-than-expected inflation prints in the US, strong labour data and some hawkish central bank rhetoric, bonds came under pressure as expectations for interest rate cuts diminished

Inflation data earlier in the year was supportive for the ECB to begin cutting rates with French and Italian data coming in below expectations. Headline euro area inflation in June was broadly in line with expectations although core surprised slightly to the upside.

From a growth perspective, forecasts for German growth were reduced given the fall in exports and weaker domestic demand and forward looking indicators such as Purchasing Manage Index's (PMI's) printed below expectations.

Credit markets enjoyed a strong first quarter of 2024 with soft landing narrative and performance of equity markets helping spreads tighten further. Q2, however, saw spreads widening with French election risk being a material driver. In the aftermath of the snap election being called, spreads on an index level rose almost 20bps with French issuers have a large presence across industrial, financial and utility sectors. These companies underperformed non-French names although the impact from the sell-off ensured spreads in the latter were also impacted. As expected, the risk-off environment saw a de-compression in spreads with investment grade outperforming high yield securities.

#### Performance

For the 1-year period ended 30 June 2024, the onemarkets Funds – onemarkets BlackRock Low Duration Bond Fund (gross of fee, EUR) returned 1.70%. Please note that the Sub-Fund was launched on 16 January 2024 so performance here is since Sub-Fund's inception and does not reflect a full year.

Primary contributors to performance include:

- Duration: The long duration position on the 5Yr part of the European curve assisted performance. Election risk in France coupled with weaker US economic data saw downward pressure on yields in Q2.
- Securitized: An allocation to securitised assets contributed to performance in Q2. Correlating with general movement in risk markets, these securities continue to perform despite the wider disruption in credit markets. Strong investor demand for the asset class, given its diversification benefits and floating rate nature supported strong performance.
- IG Credit: The preference for Financials over non-Financials delivered positive alpha YTD as the cheapness relative to corporates normalized. The position was trimmed at the beginning of June, particularly via French banks, which proved timely given their underperformance in mid-June. Defensive positioning paid off in June when credit spreads widened sharply. Hedges added via iTraxx indices a TRS marginally detracted given the strong performance observed in risk assets in Q1 but worked to protect the Sub-Fund in Q2. This provided an opportunity to add back risk at better valuations, both via lifting hedges and adding via cash bonds, benefitting the Sub-Fund as spreads retracted. Holdings in select subordinated bonds performed strongly. Top performing holdings include Barclays, ING and BAWAG Group. A position in corporate hybrids held through the first half of the quarter also contributed, primarily within the Utilities sector. Exposure to senior utilities and defensive industrial sectors also assisted.

The share classes of onemarkets Fund - onemarkets BlackRock Low Duration Bond Fund achieved the following performances:

•	A (ISIN: LU2673947763) for the period from 16 January 2024 to 30 June 2024:	1.15 %
•	AD (ISIN: LU2673943184) for the period from 5 February 2024 to 30 June 2024:	1.00 %

## onemarkets Fund - onemarkets BlackRock Global Diversified Balanced Fund

#### **Economy**

### Market review

Over the period, financial markets saw mixed performance. Economic momentum seen over the first quarter continued into the second, leading to another positive period for equity markets. Stickier, though moderating, inflation numbers meant that returns from fixed income assets were broadly negative as expectations for rate cuts from the Federal Reserve were pushed out. The more positive disinflation backdrop in Europe led to the European Central Bank cutting rates, though political uncertainty towards the end of the period led to yields rising.

Developed market equities delivered a positive return over the period. US equities outperformed Europe, as strong earnings from the US technology sector, particularly companies focused on Artificial Intelligence, continued to drive market returns. Underperformance of European equity market returns was driven by the announcement of a snap election in France which led to increased market volatility.

Emerging Market equities underperformed Developed Market equities over the period yet rallied strongly in the second quarter thanks to strong performance from Chinese and Indian equities. Government support for the real estate sector, and investors perceiving Modi's extended term as beneficial to economic policy were positive catalysts for their respective markets.

In fixed income returns were mixed with robust economic data leading to higher yielding assets delivering positive returns. As the Fed have held rates steady, and significantly less cuts are expected this year, yields have risen and more interest rate sensitive areas such as government bonds delivered negative returns. Despite the ECB being among the first of major central banks to cut rates European government bonds have also delivered a negative return over the period.

Elsewhere, precious metals continued to outperform amid ongoing geopolitical tensions, with strong performance from both gold and silver.

#### Performance

The Sub-Fund delivered a positive return over the period. From an asset class perspective, the allocation to Developed Market Equities was the key driver of returns, however all asset classes contributed positively to performance, with the exception of Government Bonds.

Within Equities, the key contributions to returns came from core equity building blocks, such as the BSF Systematic ESG World Equity Fund and the iShares MSCI World SRI UCITS ETF. Our bespoke Thematic Equity Baskets delivered a positive contribution to returns in aggregate, primarily driven by the Mega-Cap Tech Equity Basket, which benefitted from the constructive exposure to the A.I. theme. Other, thematic basket introduced towards the end of the period, such as the Global Brands and the Resource Efficiency equity baskets provided marginally negative contributions to returns. There were mixed results from hedging positions, with US equity market hedges detracting from returns given the positive performance of US equity markets over the quarter, whereas hedging positions on European equities contributed positively to returns.

The allocation to Fixed Income detracted over the period, however we have been expressing a cautious level of duration in the portfolio, which has helped to mitigate losses. The allocation to Government Bonds detracted in aggregate as interest rate expectations were broadly pushed out causing yields to move higher and remain volatile. The exposure to Japanese Government Bonds was the key driver of negative returns as Japanese bond yields surged to their highest levels in more than a decade amid signs the central bank is ready to reduce debt purchases to ease pressure on the weakening yen. This negative return was partially offset by our allocation to Investment Grade Credit, which provided marginally positive contributions to returns benefitting from a lower sensitivity to interest rates and resilient economic growth.

Elsewhere, assets such as commodities played a key role in providing diversification over the quarter against a backdrop of ongoing geopolitical risk. Precious metals benefitted as the safe haven asset class of choice as opposed to bonds, which have been more sensitive to the inflation and policy backdrop. Our well-timed allocations to Gold and Silver have therefore contributed positively, underscoring the benefits of our truly broad toolkit.

The exposure to listed Alternatives, also added to returns in aggregate over the period. Over recent months, we have seen a marked recovery in the renewable energy names due to encouraging signs of merger and acquisition activity and proactive steps from company management teams to close share price discount levels to net asset value via share buybacks, for example.

#### Positioning

Financial markets have seen mixed performance over the period driven by the same core themes that characterised 2023; the correlation between equities and bonds remains positive, equity market concentration surges on, and bond volatility is still elevated. This environment has therefore required a heightened need for diversification, a laser focus on portfolio construction, and a highly dynamic approach to asset allocation.

We launched the Sub-Fund towards the end of January and began by expressing constructive positioning in Equities yet reflecting a cautious duration profile. Over the period we managed risk dynamically to better navigate the heightened volatility in markets. We reduced Equity exposure ahead of markets selling-off significantly in April, helping to mitigate downside and then acted quickly to re-risk the Sub-Fund into May and June to capture Equity market upside.

Over the second quarter, we added several Thematic Equity Baskets to the Portfolio. We use these "baskets" of stocks to gain direct, targeted, exposure to compelling investment themes and mega-forces that we have high conviction in, such as "Green Technology", "Global Brands" and the newly designed "Healthy Living Basket", which seeks to isolate companies that focus on medical breakthroughs in weight loss drugs and companies focused on healthy lifestyle changes.

We also shifted the Government Bond component our Fixed Income allocation to direct exposure, which allows us to manage interest rate sensitivity of the portfolio more dynamically.

We continue to express a positive view on Equities, favouring the US over Europe given the robustness of the US economy yet continue to seek out hedging strategies where we see attractive pricing and remain poised to manage equity risk dynamically. Within Fixed Income, we continue to focus on managing duration dynamically, expressing a preference for Europe instead of the US given the dispersion in the inflation and policy backdrops.

#### **Economy**

### Market review

As DM central banks delivered the last leg of tightening cycle, the focus shifted, in Q3 2023, from the level of peak rates, to how long the central banks will hold rates at restrictive levels, with "higher for longer" increasingly viewed as the necessary scenario to tame stubborn price pressures. Prospects for EM remained arguably more constructive than for DM. Inflation was coming down across all regions, thanks to EM central banks hiking earlier and faster than their DM counterparts.

Coming into the final quarter of 2023, the market was comfortable that central banks had finished hiking, but cautious about how long rates would remain at restrictive levels. A series of softer inflation prints in the US and Europe, however, was enough to remove those fears and investors shifted to expect pre-emptive cuts from the central banks. This view was then compounded at the December Federal Open Market Committee meeting where the projections suggested three cuts over 2024. Fixed income markets were positive across the board. Expectations of early central bank cuts, tightening spreads and a weakening dollar supported positive returns. The more dovish anticipated path for interest rates meant government bonds delivered strong returns over the quarter.

Macroeconomic data around the world in the first quarter of 2024 showed encouraging signs, further supporting the prospect of a soft landing. While equity investors cheered strong economic data, for fixed income investors it was a more challenging period. Stickier inflation prints, resilient economic activity, and the Federal Reserve (Fed) backpedalling somewhat on its dovish December tone combined to drive negative returns for bonds. The shift in the macro backdrop was also reflected in market expectations for interest rate cuts, where the implied number of US rate cuts for 2024 reduced from six to seven cuts at the end of 2023, to no more than three rate cuts in total.

The economic momentum of the first quarter of 2024 continued into the second. The price of this continued economic growth was sticky inflation and while investors' worries at the end of the first quarter proved overdone, services inflation remained obstinately above levels that are consistent with central bank targets. As a result, rates markets still expected far fewer cuts by Western central banks than they did at the beginning of the year. On back of this environment, fixed income investors had to endure another quarter of negative returns with global investment grade bonds delivering negative returns of -1.1%.

## Review of the Sub-Fund:

- Portfolio was in a ramp up phase until mid-April and fully invested by end of second quarter. During the quarter, our focus was on adding overweight in EM Corporate market with an intention to earn higher carry in short duration space.
- The portfolio underperformed the benchmark by 14bps returning 1.97% (EUR, gross of fees) during the second quarter.
- Contributors to the portfolio over the period included overweights in Chile and Morocco while underweights in China and Turkey detracted.
- We participated in new issues of Abu Dhabi Government (2029), Banco del Estado de Chile (2049), Brazil (2032) and Oman's EDO (2031). We also participated in Chile's consumer company Cencosud's new 2031 issuance.
- As of end of June, the portfolio had a weighted duration of 2.87 years, an attractive yield of 6.28% and average rating of BBB. Bulk of our risk is concentrated in BB and BBB space. Regionally, we are overweight in LatAm, EMEA and underweight in Asia.

## Outlook:

- Our base case remains for a soft landing in developed markets. Firm global growth with an asymmetry towards eventually lower core rates should be positive for EM assets.
- We think that higher for longer may not be necessarily a bad scenario for EM sovereign given the high carry environment and resilient underlying EM fundamentals. Absolute return expectations for the sector remain strong given the high carry environment. As a result, we continue to like diversified short duration carry baskets. Investment grade securities continue to be expensive but are still attractive compared to their DM peers given higher yields and strong crossover participation. Specifically, BB rated names are slightly cheap compared to BBBs, and are looking attractive.
- Corporate index spreads are at historically tight averages, though in the EM high yield market the BB segment in particular may still have some room to tighten. Credit markets can remain in low spread ranges for extended periods, and the current overall yield is still historically attractive. Our focus for next quarter will be on relative value and high conviction carry trades across regions.

#### Performance

# onemarkets Fund – onemarkets Fidelity European Heritage Equity Fund

#### **Economy**

### Market review

European equities delivered positive returns over the period. Markets were supported by resilient economic and corporate data as well as several dovish cues from major central banks in the first quarter. Earnings season across the broader European market saw more beats than misses, and earnings growth expectations have started to tick slightly higher. Markets retreated in April, amid speculation that central banks will not ease their monetary policies as quickly as previously hoped, given resilient growth and sticky inflation data. Encouragingly, European equities recovered their positive momentum in May, supported by a strong earnings season and optimism around interest rate cuts, although rising bond yields kept sentiment in check. As anticipated, the ECB reduced its three key lending rates by 0.25 percentage points in June, marking the bank's first interest rate cut since 2019. However, this was overshadowed by political uncertainty in France, which weighed heavily on investor sentiment.

#### **Portfolio Performance**

Over the review period, the portfolio delivered positive returns of 3.3% (net of returns) and underperformed the MSCI Europe ex UK Net index which returned 6.7%. The portfolio's underperformance was due to negative stock picking across sectors. Weaker sector positioning was also a source of weakness, particularly the underweight in financials and technology, and overweight in health care. Positively, the underweight in energy and utilities sectors added relative value. Select financials stocks also contributed to performance.

## **Key Detractors**

At a stock level, not owning diabetes care business **Novo Nordisk** was the biggest stock specific disappointment. Novo's share price rallied strongly following encouraging trial data for the company's experimental obesity drug amycretin. Elsewhere, the lack of exposure to semiconductor business **ASML** held back relative gains. Other leading detractors were **Sartorius Stedim Biotech, Ariston Holding** and **Dassault Systemes.** 

#### **Key Contributors**

Not owning food business **Nestle** proved to be the biggest stock specific contributor over the review period. Health care holdings **Zealand Pharma** and **Farma Rovi** also added value. Pharmaceutical company Zealand Pharma reported promising mid-stage liver trial results for an experimental weight loss drug, which it is developing with Boehringer Ingelheim. Specialty pharmaceutical business Farma Rovi initially fell after issuing conservative sales guidance for FY2024, but the share price rebounded as investors refocused their attention on better than expected sales and margins for the reporting period.

## Portfolio strategy and Positioning

The portfolio managers adopt a style agnostic investment approach, aiming to capture the best opportunities that sit across the style, sector and market-cap spectrums. They seek to invest in companies where management teams are closely aligned to shareholders through ownership of the business. This may include family companies, which are owned (either directly or indirectly), controlled and/or managed by a founder, a family or their descendants. It may also include companies where entrepreneurs or consortiums have bought into the business. The managers also consider companies that retain and benefit from a strong brand heritage, having been founded or managed as a family business.

## Outlook

Despite recent weakness, European equity markets have proved resilient over the year-to-date period. We have seen some tentative green shoots in the first half, as the eurozone economy appears to be benefiting from a stabilisation in PMIs, especially in services. Consumers are broadly more optimistic due to lowering inflation and higher growth in real disposable incomes compared to six months ago. However, political risks continue to create uncertainty in the outlook and cause bouts of volatility. Against an ever-evolving macroeconomic backdrop, we remain focused on the fortunes of individual companies rather than trying to predict the macroeconomic outcome, drawing on our expertise in fundamental analysis and stock selection.

The share classes of onemarkets Fund - onemarkets Fidelity European Heritage Equity Fund achieved the following performances:

#### **Economy**

### Market Review

The MSCI All Country World Index rose 11.6% year-to-date (YTD), fueled primarily by continued enthusiasm surrounding artificial intelligence (AI) and related supply chain, dovish comments from the US Federal Reserve, and corporate earnings results. The Federal Reserve held rates steady at 5.25%-5.50% and looks to maintain a restrictive monetary position given improved 2024 real GDP growth expectations. Additionally, inflation rates have failed to recede with US CPI above 3%, above the Fed's "target" level. The unemployment rate has increased from 40 basis points (bps) since the beginning of the year to 4.1%. The employment picture remains relatively full for the moment, but inflationary pressures, reduced job mobility, and the unwind of pandemic-related excess savings are likely to weigh on household spending in the US.

Earnings results thus far have shown a positive bias, particularly for companies tied to AI, while consumer-oriented companies displayed weaker trends. Upward stock movements were largely concentrated in companies with exposure to AI, Cloud, and GLP-1. Given the robust returns of this cohort, the 10 largest holdings in MSCI ACWI or S&P 500 Index are saturated with "technology" stocks representing 20% of MSCI ACWI and 38% of S&P 500. The excitement around AI continues to soar, but we have not yet seen significant monetizable productivity enhancements for enterprise customers.

China's equity markets surged mid-April to mid-May as the central government announced policy measures to bolster the struggling property market. It will likely take some time for these policies to be reflected in positive sales trends but confidence in the property market is slowly being restored given government support. We also observed improving manufacturing trends in China with several companies citing improving industrial production and order trends, but the market is not yet convinced of a sustained upcycle. China equity markets faded after peaking in May but still managed to gain 4.8% YTD.

The Eurozone's 2024 real GDP growth expectations remain muted at +0.7% following +0.4% growth in 2023. Inflation trends in the Eurozone are faring better at 2.6% and the European Central Bank reduced interest rates by 25 bps. Central banks are gradually implementing stimulative measures to boost European economies. Sweden's Riksbank cut rates by 25 bps to 3.75% in early May and is likely to reduce interest rates further in the second half of the year as long as inflation rates remain calm. Market expectations are for the Bank of England to possibly follow suit in August following July elections. On the flipside, the Bank of Japan raised rates in March this year, finally exiting its zero-interest rate policy.

Election outcomes had significant impacts on their respective stock markets in June. The Morena Party's Claudia Scheinbaum won the presidential election in Mexico, resulting in a swift stock market reaction and depreciation of the Mexican Peso. In India, despite Prime Minister Narendra Modi winning a third term, the Bharatiya Janata Party's failure to gain a majority initially caused market uncertainty, which later stabilized due to Modi's pragmatic pro-business policies. European Parliament elections witnessed a notable shift towards the right, with the Rassemblement National (RN) party securing 31% of the votes in France, cornering President Macron into announcing a snap election. Pre-election polls and first-round results indicated a strong lead for the RN, causing a dip in the French stock markets. Additionally, after the first US presidential debate, Biden's re-election odds fell sharply while he was still in the race. US equity markets were relatively muted the following day but experienced some rotation out of renewable stocks.

## Strategy Review

The strategy underperformed the benchmark inception-to-date (16 January 2024 – 30 June 2024) due to stock selection. Information Technology was the weakest sector given underperformance from several names, followed by Financials. Consumer Discretionary contributed due to the portfolio's underweight to the sector and positive performance from shares of Amazon and BYD.

Neste Oyj, a leading producer of sustainable fuels and renewable feedstock solutions, was the single largest detractor and continued to underperform, hampered by overcapacity, a first-quarter earnings miss, and a downward revision to margin guidance for the year. The board has decided to move on from its CEO and board member Heikki Pekka Mikael Malinen will be taking over later this year. The company may continue to see subdued margins as the demand for Sustainable Aviation Fuel (SAF) materializes further in the future, impacting the company's economics in the near-to-medium term.

The biggest stock contributor was Taiwan Semiconductor, a leading outsourced manufacturer of semiconductors that serves all industries. The company was impacted by a broader inventory correction last year but looks to post solid growth coming out of that period. They are a prime beneficiary of AI and HPC (high performance computing) as all vendors of scale produce through the company, and they are known to be a reliable partner that delivers technological advancements on time. AI should contribute a larger proportion of revenue in the coming years.

The portfolio initiated the following positions year-to-date:

Meta Platforms' position in digital advertising is expected to continue to drive solid earnings growth given prior cost cutting and investments, tempered somewhat by the level of spending that the company is undertaking to create additional business models around artificial intelligence.

London Stock Exchange Group is a leading financial markets data provider that leverages a global direct sales model, and we believe the company stands to benefit from the increasing rate of AI adoption in the industry. LSEG's product is a database with related software that integrates with customer workflows, boasting a customer retention rate of 98% and product retention rate of 90%. LSEG's real-time business is plugged into 550 exchanges trading 10k instruments with fraction of a second ticks — over 220 billion pieces of data per day. We believe management is solid under LSEG's new CEO David Schwimmer who joined 2018 and has replaced nearly the entire board and management team. They have been overhauling the product strategy and go to market and shown success improving organic growth.

We believe Charles Schwab, a leading platform for investment products and services for the wealth management industry, will have an exceptional growth cycle for the next 5 years, as it offers a platform with the lowest price with best-in-class services and product selection. The company is a leader and likely share gainer in the two fastest growing parts of wealth management — registered investment advisors (RIA) and self-directed investors. Schwab is a distribution provider that owns the customer relationship, which positions it to capture more of the value from future technology innovations including AI and personalization. Schwab has the opportunity to heighten its focus on its core business following the completion of its large-scale integration of Ameritrade and is significantly under-earning on its large portfolio of available for sale (AFS) and held-to-maturity (HTM) securities.

Infrastructure engineering company Bentley Systems uses simulation technology to leverage the power of "digital twins," or 3D representations of physical objects. This innovative solution helps design, engineering and consulting companies better understand many of the effects of climate change on infrastructure through models, as Bentley's capabilities extend to analyzing the impacts of flash flooding and pollution.

To seek other more compelling opportunities, the strategy eliminated positions in Amazon, Adyen, MSCI, Sociedad Quimica y Minera, Sika, and Dover Corp.

## Outlook

In our view, the world is amidst a profound transformation driven by rapidly evolving technological advancements, demographic shifts, health-care innovation, and a push for decarbonization. We believe that now is an ideal entry point for investors hoping to capitalize on the integration of these innovation themes into everyday life. Further, diversifying away from mainstream indices given concentration and crowding is becoming increasingly important. The ten largest holdings in MSCI ACWI or S&P 500 Index are saturated with "technology" stocks that represent 20% of MSCI ACWI and 38% of S&P 500. Finally, private equity deal making is at a 4-year low, creating an opportunity for more established and well-positioned players like mid-to-large cap companies with attractive fundamentals to drive innovation.

The share classes of onemarkets Fund - onemarkets Rockefeller Global Innovation Equity Fund achieved the following performances:

•	A (ISIN: LU2673953811) for the period from 16 January 2024 to 30 June 2024:	8.40 %

#### **Economy**

# Market Review

Global stocks rose over the first half of 2024 amid signs of improving economic growth in the United States, Europe and key emerging markets. More than half of the world's 20 largest equity markets reached record highs in the second quarter although the gains were somewhat tempered by uncertainty associated with elections in Europe and India.

US equities set fresh records as easing inflation fuelled investor hopes for an interest rate cut later in the year. Information technology stocks drove markets higher. Investor enthusiasm for artificial intelligence (AI) continued to propel select tech stocks, particularly makers of advanced computer chips. At the other end of the spectrum, real estate stocks moved lower, hit by higher interest rates.

In bond markets, global bonds came under pressure as market expectations about the extent of interest rate cuts this year were curtailed. However, markets partially rebounded over May and June after a reassuring meeting from the US Federal Reserve and the publication of inflation figures.

The yield on 10-year US Treasuries (US government bonds) ended June at 4.40%, up by 52 basis points (bps) from the end of 2023, while the yield on 2-year US Treasuries rose 51 bps to end the period at 4.76%. Rising yields resulted in bond prices bonds falling (bond prices move inversely to yields). The Bloomberg US Aggregate Index returned -0.7% year-to-date.

In corporate bond markets, US investment-grade (credit rating of BBB/Baa and above corporate bonds returned -0.5%, as represented by the Bloomberg US Corporate Investment Grade Index. While the rise in US Treasury yields weighed on overall results, US investment grade bonds held up better than government debt.

#### Portfolio review

Within equity exposure, information technology companies sector contributed positively to results. Shares in semiconductor chip makers Broadcom and TSMC delivered the strongest returns over the period.

Not holding electric vehicle maker Tesla also added value relative to the index, as its shares fell by 20% in the six months to June 2024.

In contrast, not holding NVIDIA detracted from Sub-Fund returns relative to the index. Shares in NVIDIA rose sharply over the period as the company unveiled new graphics processors to support artificial intelligence (AI) and continued to benefit from soaring demand for advanced chipsets.

The portfolio's holding in Amazon was also lower than the index, which proved costly as shares in Amazon rose 28%, while a position in Charter Communications also detracted as its share fell 23% over the six-month period.

Within fixed income, investment in select corporate bonds added to portfolio returns, while exposure to securitised bonds, namely mortgage-backed securities, detracted.

#### Positioning and outlook

At the end of June 2024, the portfolio's exposure to equities is 65% of the total Sub-Fund, which is the higher end of its typical 60-65% range. Its exposure to fixed income is approximately 30% and it holds around 5% in cash.

The portfolio's allocation reflects portfolio managers' positive view on equities given the broader economic backdrop. Economic growth has remained resilient in the US with the manufacturing sector showing some signs of recovery and inflation figures generally beniqn.

Within its equity exposure, the portfolio is focused on traditionally defensive sectors that tend to be resilient regardless of market environment, such as consumer staples companies, energy suppliers and distributors, and health care companies.

Notably, the portfolio has lower exposure to the largest companies in the S&P 500 index, thereby differentiating itself from peers and offering investors a potentially different return profile.

The fixed income portion of the portfolio is prudently positioned, seeking to achieve returns higher the index while looking to mitigate risk.

#### Performance

The share classes of onemarkets Fund - onemarkets Capital Group US Balanced Fund achieved the following performances:

•	A (ISIN: LU2673945395) for the period from 23 February 2024 to 30 June 2024:	5.12 %
•	AD (ISIN: LU2673945478) for the period from 3 June 2024 to 30 June 2024:	3.83 %
•	B (ISIN: LU2673945551) for the period from 16 January 2024 to 30 June 2024:	9.33 %

#### SFDR Disclosure

This Sub-Fund is classified as an Art. 6 fund and does not take into account the EU criteria for environmentally sustainable economic activities.

Deloitte.

Deloitte Audit Société à responsabilité limitée 20 Boulevard de Kockelscheuer L-1821 Luxembourg

Tel: +352 451 451 www.deloitte.lu

To the Shareholders of onemarkets Fund 8-10, rue Jean Monnet L-2180 Luxembourg

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

Opinion

We have audited the financial statements of onemarkets Fund (the "Fund") and of each of its sub-funds, which comprise the statement of net assets and the schedule of investments and other net assets as at 30 June 2024 and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 30 June 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

**Basis for Opinion** 

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier* (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the *réviseur d'entreprises agréé* for the Audit of the Financial Statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Société à responsabilité limitée au capital de 360.000 € RCS Luxembourg B 67.895 Autorisation d'établissement 10022179

# Deloitte.

#### Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the *réviseur d'entreprises agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

#### Responsibilities of the Board of Directors of the Fund for the Financial Statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

#### Responsibilities of the réviseur d'entreprises agréé for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *réviseur d'entreprises agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law dated 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Deloitte.

As part of an audit in accordance with the Law dated 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

• Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

• Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.

• Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.

• Conclude on the appropriateness of the Board of Directors of the Fund use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the *réviseur d'entreprises agréé* to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the *réviseur d'entreprises agréé*. However, future events or conditions may cause the Fund to cease to continue as a going concern.

• Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

For Deloitte Audit, Cabinet de révision agréé

# Other notes to the financial statements as at 30 June 2024

#### Note 1 - The Fund

#### 1.General

onemarkets Fund (the "Fund") is authorised in Luxembourg as an undertaking for collective investment in transferable securities under Part I of the Law of 17 December 2010 on undertakings for collective investments, as amended (the "2010 Law") and qualifies as an undertaking for collective investment in transferable securities ("UCITS") for the purpose of Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities, as amended (the "UCITS Directive").

The Fund is an open-ended undertaking for collective investment in transferable securities in a legal form of an investment company with variable capital ("société d'investissement à capital variable" or "SICAV"), subject to Part I of the 2010 Law transposing the UCITS Directive.

The Fund has been incorporated as a public limited liability company ("société anonyme") on 15 September 2022 for an unlimited time. The Fund's Articles of Incorporation have been deposited with the Register of Commerce and Companies of Luxembour ("RCS") and a mention of their deposit with the RCS has been published in the RESA on 21 September 2022. The Fund is registered with the RCS under number B271238.

The Fund's Articles of Incorporation have been amended on 20 September 2022 by a rectification deed and a mention of deposit of the amendments to the Articles of Incorporation has been published in the RESA on 21 September 2022. The legally binding version of the Articles of Incorporation is deposited with the RCS where they are available for inspection and where copies thereof may be obtained. A copy of the Fund's Articles of Incorporation and of its most recent financial reports and statements may also be obtained free of charge upon request at the registered office of the Fund during normal business hours.

The Fund has appointed Structured Invest S.A. as management company (the "Management Company").

The consolidated Reference Currency of the Fund is the Euro.

The financial year of the Fund starts on 1 July of each year and ends on 30 June of each year.

The Fund is structured as an umbrella investment fund with a view to provide investors with a variety of Sub-Funds (the "Sub-Funds") of specific assets.

As at 30 June 2024, the following Sub-Funds are being offered:

- onemarkets Amundi Income Opportunities Fund (launched on 16 January 2024)
- · onemarkets Amundi Flexible Income Fund
- · onemarkets Amundi Climate Focus Equity Fund
- onemarkets Fidelity World Equity Income Fund
- onemarkets BlackRock Global Equity Dynamic Opportunies Fun
- onemarkets PIMCO Global Balanced Allocation Fund
- onemarkets PIMCO Global Strategic Bond Fund
- onemarkets PIMCO Global Short Term Bond Fund
- onemarkets J.P. Morgan Emerging Countries Fund
- onemarkets J.P. Morgan US Equities Fund
- onemarkets Allianz Global Equity Future Champions Fund
- onemarkets Allianz Conservative Multi-Asset Fund
- onemarkets Pictet Global Opportunities Allocation Fund

- onemarkets VP Global Flexible Allocation Fund (launched on 03 July 2023)
- onemarkets Global Multibrand Selection Fund
- onemarkets Balanced Eastern Europe Fund
- onemarkets Multi-Asset Value Fund
- onemarkets Short Term Bond HUF Fund (launched on 05 February 2024)
- onemarkets Bond HUF Fund (launched on 05 February 2024)
- onemarkets Libra Fund (launched on 29 January 2024)
- onemarkets BlackRock Low Duration Bond Fund (launched on 16 January 2024)
- onemarkets BlackRock Global Diversified Balanced Fund (launched on 29 January 2024)
- onemarkets J.P. Morgan Emerging Markets Short Term Bond Fund (launched on 29 January 2024)
- onemarkets Fidelity European Heritage Equity Fund (launched on 16 January 2024)
- onemarkets Rockefeller Global Innovation Equity Fund (launched on 16 January 2024)
- onemarkets Capital Group US Balanced Fund (launched on 16 January 2024)

#### Note 2 - Significant accounting policies

#### 2.a - Presentation of the financial statements

The Fund's financial statements are prepared in accordance with generally accepted accounting principles in Luxembourg.

#### 2.b - Valuation of investments

The value of the assets of any Sub-Fund is determined according to the following principles:

- Assets that are officially listed on a stock exchange are valued at the latest available price. If an asset is listed on several stock exchanges, the most recently available price on the stock exchange that is the main market for such asset is applied.
- Assets which are not listed on a stock exchange but which are traded on another regulated market which operates regularly and is recognised and open to the public are valued at a price which may not be lower than the bid price and not higher than the offering price at the time of valuation, and which the Management Company of the Fund considers to the best possible price at which the assets can be sold.
- If an asset is not listed or traded on a stock exchange or on another regulated market or if, with regard to assets which are listed or traded on a stock exchange or other market as mentioned above, the prices in accordance with the provisions contained in (a) or (b) above do not reasonably reflect the actual market value of the assets in question, such assets shall be valued at the actual market value of the assets in question, such assets shall be valued at the realisable value as determined in good faith by the Management Company of the Fund in application of generally recognised valuation regulations that are verifiable by auditors.
  - The pro rata interest on assets will be included in so far as it is not expressed in the price.
- The settlement value of forwards or options which are not traded on stock exchanges or other organised markets will be determined in accordance with the directives of the Management Company on a basis which shall be applied consistently with regard to all different types of contracts. The liquidation value of futures, forwards or options traded on stock exchanges or other organised markets is calculated on the basis of the latest available settlement prices for such contracts on the stock exchanges or organised markets on which such futures, forwards or options are traded by the Sub-Fund. If a future, forward or option cannot be settled on a day for which the Net Asset Value is determined, the valuation basis for such a contract is determined by the management in appropriate and reasonable manner.
  - Swaps are valued at present value.
- Cash is valued at nominal value plus pro rata accrued interest. Fixed-term deposits may be valued at the respective yield price, provided that a corresponding contract between the financial institution holding the deposits in safekeeping and the Management Company stipulates that such deposits may be called at any time and that, in the event of calling, the liquidation value shall correspond to such yield price.
- Shares or units of UCITS or other UCIs are valued at the latest Net Asset Value determined and obtainable. If redemption has been suspended for investment units or if no redemption prices are set, these units and any other assets are valued at the realisable value which the Management Company determines in good faith on the basis of the probable realisable value.
- All assets not denominated in the currency of the relevant Sub-Fund are converted at the most recently available exchange rate into the relevant currency of the Sub-Fund. Gains or losses on foreign exchange transactions are shown net.
- All other securities or other assets are valued at their appropriate realisable value as determined in good faith by the Management Company and according to a procedure specified by the Management Company.

If share classes are created, the resulting calculation of the Net Asset Value will be made separately according to the criteria set out above. However, the composition and allocation of assets is always undertaken separately for the Sub-Fund as a whole.

In the event that the valuation of an asset in accordance with the above principles is rendered impossible, incorrect or not representative, the Board of Directors is entitled to use other generally recognised and auditable valuation principles in order to reach a fair valuation of that asset.

#### 2.c - Investment portfolio income

Dividends are taken into income on the date upon which the relevant securities are first listed as ex-dividend. Interest income on bonds is accrued on a daily basis.

#### 2.d - Net realised profits or losses on sales of investments

The net realised profits and loss on sales of investment securities are determined on the basis of the average cost of the securities sold and are recorded in the Statement of Operations and Changes in net assets.

#### 2.e - Combined financial statements

The combined financial statements are expressed in EUR, the reference currency of the Fund and are equal to the sum of the corresponding items in the financial statements of each Sub-Fund converted to this currency at the exchange rate prevailing at the date of the financial statements.

The financial statements relating to the separate sub-funds are expressed in the reference currency of the relevant sub-fund.

#### Note 2 - Significant accounting policies

#### 2.f - Acquisition cost of securities in the portfolio

The acquisiton cost of the securities held by the Sub-Funds that are denominated in currencies other than the reference currency of the Sub-Funds is converted into this currency at the exchange rate prevailing on the date of purchase.

#### 2.g - Formation expenses

Formation expenses are amortised on a straight line basis over a period of 5 years.

#### 2.h - Transaction fees

The transaction fees for securities transactions and similar transactions are recorded separately in the Statement of Operations and Changes in net assets.

#### Note 3 - Management fees

The annual management fee (the "Management Fee") covers the Investment Manager fee (and, as the case may be, a Sub-Investment Manager fee in case of sub-delegation and/or an Investment Advisor fee which is/are paid out of the Investment Manager fee) as well as a potential fee to the Distributors (the "Distribution Fee"). A distributor may re-allocate an amount of the Distribution Fee to Sub-Distributors (as applicable).

#### Note 4 - Depositary and Central Administration fees

The Depositary is entitled to receive fees (the "Depositary Fee") out of the assets of the Fund, pursuant to the relvant agreement between the Depositary and the Fund and in accordance with usual market practice. The fees payable to the Depositary (excluding Sub-Depositary fees, if any transaction fees) will not exceed 0.065% p.a. of the respective sub-fund's average net assets. The fees are calculated and accrued on each valuation day and are payable quarterly in arrears.

The Annual Administrative fee (the "Administrative Fee") remunerates the Management Company for its services relating to the management of the Sub-Funds' assets.

The UCI Administrator is entitled to receive fees out of the Administrative Fee, pursuant to the relevant agreement between the UCI Administrator and the Management Company and in accordance with usual market practice. The fees are calculated and accrued on each Valuation Day and are payable quarterly in arrears.

Sub-Funds	Administrative	Minimum
	Fee p.a. on NAV	
onemarkets Amundi Absolute Return Growth Fund (until 16 January 2024)	Up to 0.40%	EUR 80,000 p.a plus additional transaction costs

Sub-Funds	Administrative Fee p.a. on NAV	Minimum
onemarkets Capital Group US Balanced Fund (launched on 16 January 2024)	Up to 0.40%	EUR 80,000 p.a plus additional transaction costs

#### Note 5 - Taxe d'abonnement

In the Grand Duchy of Luxembourg, the Fund's assets are only subject to the taxe d'abonnement, which is currently 0.05% p.a.. A reduced taxe d'abonnement of 0.01% p.a. of its net assets calculated and payable at the end of each quarter is applicable to (i) Sub-Funds or Classes whose Shares are only issued to Institutional Investors within the meaning of Article 174 of the 2010 Law, (ii) Sub-Funds whose sole purpose is to invest in Money Market Instruments, time deposits with credit institutions or both, (iii) Sub-Funds whose purpose is to invest in micro finance.

A reduced rate from 0,01% to 0,04% p.a. is applicable for the portion of net assets that is invested into sustainable investments as defined by EU Taxonomy Regulation (2020/852).

The taxe d'abonnement is payable quarterly, based on the Fund's net assets reported at the end of each quarter.

An exemption from the taxe d'abonnement applies, inter alia, to the extent that the Fund's assets are invested in other Luxembourg investment funds which in turn are subject to taxe d'abonnement.

#### Note 6 - Changes in investments

The details of the changes in portfolio composition for the year ended 30 June 2024 are at the disposal of the shareholders at the registered office of the Fund and are available upon request free of charge.

onemarkets BlackRock Low Duration Bond Fund (launched on 16 January 2024)	BNP Paribas SA	EUR	61,000.00	-

#### Note 8 - Dividend distributions

When included in the denomination of the share class the indicator FQD, the Fund pre-announces a target dividend paid on a quarterly basis. A target dividend is an amount that the Sub-Fund aims to pay but does not guarantee. Target dividends may be stated as a specific currency amount or as a percentage of Net Asset Value. Note that in order to meet a targeted dividend amount, a Sub-Fund may end up paying out more money than it actually earned in dividends, meaning that in effect shareholders are getting some of their capital back as a dividend.

The Fund distributed the following dividends during the year ended 30 June 2024:

Sub-funds	Share class	ISIN	Ссу	Dividend	Ex-date	Payment date
onemarkets Fund - onemarkets Amundi	EFQD - EUR	LU2503841657	EUR	0.98	28/07/23	31/07/23
Flexible Income Fund				0.98	30/10/23	31/10/23
				1.00	30/01/24	31/01/24
				1.00	29/04/24	30/04/24

#### Note 9 - Exchange rates

The transactions and acquisition costs denominated in foreign currencies are converted into the accounting currency of each Sub-Fund based on the exchange rate in force on the date of the transaction or acquisition. Assets and liabilities denominated in foreign currencies are converted into the accounting currency of each Sub-Fund based on the exchange rate in force at the end of the period. As at 30 June 2023, the exchange rates used were the following:

1 EUR	=	3.93655	AED	1 EUR	=	1.6048	AUD	1 EUR	=	5.95295	BRL
1 EUR	=	1.46655	CAD	1 EUR	=	0.96305	CHF	1 EUR	=	1,011.6517	CLP

#### Remuneration Policy of the Management Company

Structured Invest S.A. (the "Management Company") is included in the remuneration strategy of UniCredit Group. All remuneration matters and compliance with regulatory requirements are monitored by the relevant committees of UniCredit Group. The remuneration policy is consistent with and promotes solid and effective risk management and does not encourage the taking of risks that are inconsistent with the risk profiles, contractual conditions or articles of association of the funds managed by the Management Company. It complies with the business strategy, objectives, values and interests of the Management Company, the funds it manages and the investors in these funds and comprises measures for preventing conflicts of interest. The remuneration strategy allows a balance between fixed and variable salary components and defines mechanisms for the payment of variable remuneration. The fixed and variable components of the total remuneration are appropriately proportioned to each other, with the share of the fixed component of the total remuneration being high enough to offer complete flexibility in relation to the variable remuneration components, including the possibility of withholding the payment of a variable component.

Structured Invest S.A. has defined a remuneration system which avoids significant reliance on the variable remuneration component. When determining employees' variable remuneration, Structured Invest S.A. focuses on their individual performance, the performance of the department to which they belong and the results of the company. The performance of the funds or sub-funds managed by Structured Invest S.A. is not taken into account when determining the variable remuneration. The remuneration system of the Management Company is reviewed at least once a year. No significant changes were made to the remuneration system employed during the Management Company's financial year. The Management Company has identified the employees whose professional activities have a material impact on the risk profiles of the Management Company or the funds it manages based on the criteria specified in Commission Delegated Regulation (EU) No 604/2014.

The Management Company has identified eleven such employees.

The total remuneration paid by the Management Company to its employees in its latest financial year amounts to EUR 1.524.087,31, divided into EUR 1.251.977,31 (fixed remuneration) and EUR 272.110,00 (variable remuneration).

No carried interest was paid by the Management Company.

There are no connections between the Fund and/or the risk profile of the Fund and the employment contracts of executives and employees. The information stated relates to the Management Company as a whole and not to individual funds.

As at 31 December 2023, the Management Company manages 20 AIFs and 14 UCITS, with total assets under management of EUR 5.897.045.406,97.

Current information on the remuneration system can be found on the Structured Invest S.A. website using the following link: https://www.structuredinvest.lu/de/de/fondsplattform/ueber-uns.html.

Luxembourg, October 2024

Structured Invest S.A.

<sup>&</sup>lt;sup>1</sup> Those figures refer to the financial year ending 31 December 2023.

#### **Risk Management Procedure**

As required by the Circular CSSF 11/512 and 18/698, the Board of Directors of the Fund needs to determine the global risk exposure of the Fund by applying either the commitment approach or the VaR ("Value at Risk") approach.

#### onemarkets Amundi Absolute Return Growth Fund (merged on 16 January 2024)

In the context of the risk management procedure, the global exposure will be measured and controlled by using the absolute Value at Risk (VaR) methodology.

#### RISK DATA FOR THE PERIOD FROM 1 JULY 2023 TO 16 JANUARY 2024

		onemarkets Amundi Absolute Return Growth Fun (merged on 16 January 2024
Measure of risk <sup>1</sup>		
Value at Risk		1.06%
Leverage <sup>2</sup>		1054.189

## Information concerning the transparency of securities financing transactions and of reuse of cash collateral (regulation EU 2015/2365, hereafter "SFTR")

Obligations with regards to securities financing transactions - Regulation on the transparency of securities financing transactions (SFTR)

On 23 December 2015, the Regulation (EU) 2015/2365 about the transparency of securities financing transactions and the further use as well as the amendment of Regulation (EU) No 648/2012 (SFTR) was published in the Official Journal of the European Union.

The SFTR essentially regulates obligations with regards to "securities financing transactions" (SFT). The SFTR provides additional reporting obligations for the conclusion, amendment or termination of SFT in addition to the reporting obligations already in place based on EMIR (which, however, are not applicable to SFT in principle).

As at 30 June 2024, none of the Sub-Funds of onemarkets Fund have used any financial instruments included in the scope of application of the SFTR 2015/2365 regulation.

SFDR (Sustainable Finance Disclosure Regulation)

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

practices.

does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Legal entity identifier:

onemarkets Amundi Flexible Income Fund

Product name:

529900ANIKKO9ZCAA439

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	● ○ 🗶 No			
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 28.36% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments			

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product has respected all material aspects of the characteristics described in the prospectus.

The Sub-Fund promoted environmental and/or social characteristics by complying with the ESG analysis framework and scoring methodology

of Amundi which includes a mix of exclusion, ESG integration and engagement approach.

Amundi's ESG analysis framework was designed to assess corporate behaviour in three fields: Environment, Social, and Governance (ESG).

Amundi assessed companies' exposure to ESG risks and opportunities, including sustainability factors and sustainability risks, and how corporates manage these challenges in each of their sectors. As far as issuers of listed securities are concerned, Amundi scored issuers regardless of the instrument type, equity or debt.

The environmental and/or social characteristic promoted by this financial product were embedded in the criteria identified to perform the ESG analysis framework.

These criteria are different for corporates issuing listed instruments and for sovereign entities.

Regarding corporate issuers, our ESG analysis framework is comprised of 38 criteria, of which 17 are cross-sector criteria, common to all companies whatever their business sector, and 21 sector specific criteria. These criteria were designed to either assess how sustainability issues might affect the issuer as well as the quality of the management of this dimension. Impact on sustainability factors as well as quality of the mitigation undertaken were also considered.

#### How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate. The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the ESG investment universe of the Product. At the end of the period: - The weighted average ESG rating of the portfolio is 0.798 (C). - The weighted average ESG rating of the ESG investment universe is 0 (D). The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.798 (C)**
- The weighted average ESG rating of the reference index is **0** (**D**)

The sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

#### ...and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.73 (C) and the weighted average ESG rating of the reference index was 0 (D).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1. follow best environmental and social practices; and
- 2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview

of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

 Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and

- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

# How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at <a href="https://about.amundi.com/files/nuxeo/dl/cdc78b19-cca0-427d-bf08-12c513b6665c">https://about.amundi.com/files/nuxeo/dl/cdc78b19-cca0-427d-bf08-12c513b6665c</a>

#### What were the top investments of this financial product?

The figures here below are calculated on an average basis for the last quarter ends of the financial year of the Sub-Fund.

Largest investments	Sector	% Assets	Country
AMUNDI PHYSICAL METALS PLC - GOLD	Financial, investment & other diversified comp.	3.47%	IRL

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01.07.2023 – 30.06.2024

UBS ETC LKD TO UBS BBG COMDTY EX-AGRI Banks & other credit institutions		1.44%	GBR

Asset allocation describes the share of investments in specific assets.

#### What was the proportion of sustainability-related investments?

The Sub-Fund invested 28.36% into sustainability-related investments.

#### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Sector	% of Assets
Bonds of States, provinces and municipalities	34.06%
Banks and other financial institutions	12.61%
Holding and finance companies	10.06%
Utilities	3.27%
Pharmaceuticals and cosmetics	2.78%

Foods and non alcoholic drinks

1.05%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional
activities are
activities for which
low-carbon
alternatives are not
yet available and
among others have
greenhouse gas
emission levels
corresponding to
the best
performance.

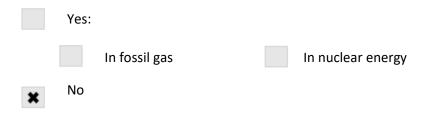

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 0.58% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

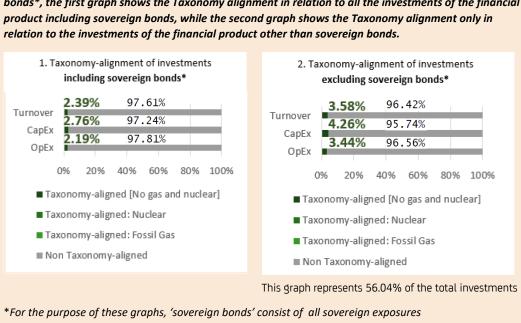

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

The full poster of these graphs, sovereign somes consist of unsovereign exposures

expressed as a share of:
- turnover reflects
the "greenness" of

Taxonomy-aligned activities are

- turnover reflects the "greenness" of investee companies today.
- expenditure
  (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

As of 30/06/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.54%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous period Taxonomy alignment was not reported, because at the time reliable reported data was not yet available.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy was 22.32% at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

The share of socially sustainable investments at the end of the period was 5.46%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation
(EU) 2020/852.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on https://about.amundi.com/esg-documentation, provides detailed reporting on this engagement and its results.

#### How did this financial product perform compared to the reference benchmark?

This product does not have an ESG Benchmark.

- How does the reference benchmark differ from a broad market index?
  This product does not have an ESG Benchmark.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This product does not have an ESG Benchmark.

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?					
Yes	● ○ ★ No				
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 69.59% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective				
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments				

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by:

 aiming to have a higher ESG score than the ESG score of its investment universe as represented by MSCI WORLD CLIMATE **PARIS ALIGNED**. In determining the ESG score of the Product and the ESG investment universe, ESG performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

 aiming to reduce its carbon intensity by aligning its carbon footprint intensity to that of its Benchmark MSCI WORLD CLIMATE PARIS ALIGNED.

Additionally, The Sub-Fund promoted environmental and/or social characteristics through the incorporation of ESG considerations in the selection of investments (ESG analysis framework).

Amundi's ESG analysis framework was designed to assess corporate behaviour in three fields: Environment, Social, and Governance (ESG).

Amundi assessed companies' exposure to ESG risks and opportunities, including sustainability factors and sustainability risks, and how corporates manage these challenges in each of their sectors. As far as issuers of listed securities are concerned, Amundi scored issuers regardless of the instrument type, equity or debt.

The environmental and/or social characteristic promoted by this financial product were embedded in the criteria identified to perform the ESG analysis framework.

These criteria are different for corporates issuing listed instruments and for sovereign entities.

Regarding corporate issuers, our ESG analysis framework is comprised of 38 criteria, of which 17 are cross-sector criteria, common to all companies whatever their business sector, and 21 sector specific criteria. These criteria were designed to either assess how sustainability issues might affect the issuer as well as the quality of the management of this dimension. Impact on sustainability factors as well as quality of the mitigation undertaken were also considered.

#### How did the sustainability indicators perform?

The sustainability indicator used is the portfolio carbon footprint intensity, which is calculated as an asset weighted portfolio average and compared to the asset weighted carbon footprint intensity of the Benchmark. As a result, securities with relatively low environmental footprints had a higher probability of being selected in the portfolio compared to securities with relatively high environmental footprints.

- The weighted average carbon footprint intensity of the portfolio is **54.90** (Tons/M. EUR Revenues)
- The weighted average carbon footprint intensity of the Benchmark is **66.13** (Tons/M. EUR Revenues)

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate. The sustainability indicator used is the ESG score of the Product that is

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

measured against the ESG score of the ESG investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.522 (C)**
- The weighted average ESG rating of the reference index is 0.012
   (D)

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

Moreover, Amundi applied a targeted exclusion policy with reference to issuers that do not comply with Amundi Group's Responsible Investment Policy, such as issuers exposed to the exclusionary rules and thresholds set out in our sector policy (i.e. thermal coal, tobacco) or do not comply with internationally recognised conventions and/or frameworks, and national regulations.

The sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

#### ...and compared to previous periods?

At the end of the previous period, the weighted average carbon intensity of the portfolio was 81.81 (Tons/M. EUR Revenues) and the weighted average carbon intensity reference index was 89.62 (Tons/M. EUR Revenues). At the end of the previous period, the weighted average ESG rating of the portfolio was 0.66 (C) and the weighted average ESG rating of the reference index was 0.04 (D).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1. follow best environmental and social practices; and
- 2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

## How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community"

Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

## How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sectorbased exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at https://about.amundi.com/files/nuxeo/dl/cdc78b19-cca0-427d-bf08-12c513b6665c

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

#### What were the top investments of this financial product?

The figures here below are calculated on an average basis for the last quarter ends of the financial year of the Sub-Fund.

The list includes the
investments
constituting <b>the</b>
greatest proportion
of investments of
the financial product
during the reference
period which is:
01.07.2023 -
30.06.2024

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Internet, software & IT services	7.37%	USA
NVIDIA CORP	Electronics & semiconductors	3.71%	USA
JPMORGAN CHASE CO	Banks & other credit institutions	3.14%	USA
MASTERCARD INC -A-	Banks & other credit institutions	2.65%	USA
BROADCOM INC - REGISTERED SHS	Computer hardware & networking	2.57%	USA
MERCK and CO INC - REG SHS	Pharmaceuticals, cosmetics & med. products	2.57%	USA
HOME DEPOT INC	Retail trade & department stores	2.46%	USA
NEXT PLC	Retail trade & department stores	2.30%	GBR
ABBVIE INC	Pharmaceuticals, cosmetics & med. products	2.27%	USA
NOVO NORDISK - BEARER AND/OR REGISTERED	Pharmaceuticals, cosmetics & med. products	2.24%	DNK
COCA-COLA EUROPACIFIC PARTNERS	Food & soft drinks	2.22%	GBR
SCHNEIDER ELECTRIC SE	Electrical appliances & components	2.17%	FRA
TRANE TECH - REGISTERED SHS	Mechanical engineering & industrial equip.	1.33%	IRL

APPLIED MATERIALS INC	Electronics & semiconductors	1.18%	USA
QUALCOMM INC	Telecommunication	1.14%	USA

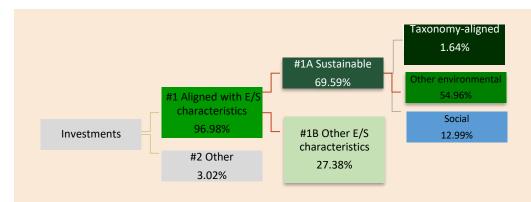

## Asset allocation describes the share of investments in specific assets.

#### What was the proportion of sustainability-related investments?

The Sub-Fund invested 69.59% into sustainability-related investments.

#### What was the asset allocation?

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

As of the last period, the Sub-Fund was 97.96% aligned with E/S characteristics (#1 Aligned with E/S characteristics) and had 2.04% invested in Other (#2 Other).71.61% were allocated to Sustainable Investments (#1A Sustainable Investments) and the remainder of 25.35% was invested in investments aligned with other environmental and/or social characteristics (#1B Other E/S characteristics).

#### In which economic sectors were the investments made?

Sector	% of Assets
Electronics and semiconductors	15.77%
Pharmaceuticals and cosmetics	10.61%
Banks and other financial institutions	10.25%
Internet and Internet services	9.20%
Retail trade and department stores	6.99%
Building materials and trade	5.11%
Machine and apparatus construction	4.72%

Office supplies and computing	4.38%
Holding and finance companies	4.24%
Electrical engineering and electronics	3.71%
Utilities	3.58%
Communications	2.93%
Chemicals	2.80%
Insurance	2.78%
Road vehicles	2.30%
Foods and non alcoholic drinks	2.11%
Healthcare and social services	1.94%
Real Estate companies	1.58%
Environmental services and recycling	1.51%
Graphic art and publishing	1.13%

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.64% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party and has been calculated using publicity available reported data.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

# Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

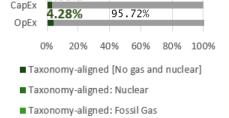

- turnover reflects the "greenness" of investee companies today.
- expenditure
  (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

	Yes:			
		In fossil gas		In nuclear energy
×	No			

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds. 1. Taxonomy-alignment of investments 2. Taxonomy-alignment of investments including sovereign bonds\* excluding sovereign bonds\* 97.24% 2.76% 97.24% 2.76% Turnover Turnover 96.70% .30%

■ Non Taxonomy-aligned

This graph represents 100% of the total investments

What was the share of investments made in transitional and enabling activities?

As of 30/06/2024, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.87%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

<sup>\*</sup>For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous period Taxonomy alignment was not reported, because at the time reliable reported data was not yet available.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy was **54.96%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

The share of socially sustainable investments at the end of the period was 12.99%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on https://about.amundi.com/files/nuxeo/dl/5994803c-6af1-4d7e-89e0-f1134f6374a7, provides detailed reporting on this engagement and its results.

(EU) 2020/852.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### How does the reference benchmark differ from a broad market index?

A broad market index, does not assess or include its constituents according to environment characteristics and therefore is not aligned with environmental characteristics.

The index used is a "Paris Aligned Benchmark" which incorporates specific objectives related to emission reductions and the transition to a low-carbon economy through the selection and weighting of underlying constituents.

- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?
  - The weighted average carbon footprint intensity of the portfolio is 54.90 (Tons/M. EUR Revenues)
  - The weighted average carbon footprint intensity of the Benchmark is 66.13 (Tons/M. EUR Revenues)
- How did this financial product perform compared with the reference benchmark?

The sustainable investment objective is attained by aligning the carbon footprint reduction objectives of the fund with MSCI World Climate Paris Aligned Net USD Index. The portfolio carbon footprint intensity is calculated as an asset weighted portfolio average and compared to the asset weighted carbon footprint intensity of the Index.

As a result, securities with relatively low environmental footprints have a higher probability of being selected in the portfolio compared to securities with relatively high environmental footprints. In addition, the fund excludes companies on the basis of controversial behaviour and (or) controversial products in accordance with the Responsible Investment Policy.

- The weighted average carbon footprint intensity of the portfolio is 54.90 (Tons/M. EUR Revenues)
- The weighted average carbon footprint intensity of the Benchmark is 66.13 (Tons/M. EUR Revenues)
- How did this financial product perform compared with the broad market index?
  This product is actively managed.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The **EU Taxonomy** is a classification

Product name: Legal entity identifier:

onemarkets Fidelity World Equity Income Fund

5299009COHSZRTC04M52

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?					
Yes	• No				
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.59% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy				
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments				

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The mandate met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The mandate promoted environmental and social characteristics by investing in securities of issuers with favourable ESG characteristics.

Favourable ESG characteristics were determined by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the mandate invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below. The following data has been compiled based on the last day of close of business quarterly data and averaged for the reference period. Classification of securities including Sector and Country are determined as at the last day of the reference period. This data includes all securities, excluding derivatives.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

The performance of the sustainability indicators the mandateused to measure the attainment of the environmental or social characteristics that it promoted were:

- i) 95 % of the mandate was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- ii) in respect of its direct investments, 0% of the mandate was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 68.59 % of the mandate was invested in sustainable investments; and
- iv) 1.02% of the sub-fund invested in sustainable investments with an environmental objective aligned with the EU Taxonomy and 32.75 % % of the sub-fund invested in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy
- v) 34.83% of the mandate invested in sustainable investments with a social objective.

The sustainability indicators of the mandate were not subject to an assurance by auditors or a review by third parties.

#### ...and compared to previous periods?

The performance of the sustainability indicators the mandate used to measure the attainment of the sustainable environmental or social characteristics that it promoted during the previous reporting period was:

- 1. 97% of the mandate was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;
- 2. in respect of its direct investments in corporate issuers, 0% of the mandate invested in securities of issuers with exposure to the Exclusions; 62 % of the mandate was invested in sustainable investments;
- 3. 24% of the mandate was invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the EU Taxonomy);

- 4. 38% of the mandate invested in sustainable investments with a social objective.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 68.59 % of sustainable investments. The sustainable investments had an environmental and social objective. The mandate determined a sustainable investment as follows:

- (a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or
- (b) issuers whereby the majority of their business activities (m ore than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating) which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that ending poverty and deprivations hand-inother must qo improvements in health and education, economic hand with growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens

(as set out below); Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy

screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.
- (iii) Exclusions We adopted a principals-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principals.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in rel evant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standa rds for board gender diversity and engagement with climate change. Fidelity may also vo te to enhance issuer performance on other indicators. Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be

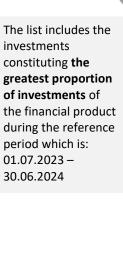

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

updated from time to time. Please refer to this website for further information: https://www.fidelityinternational.com/sustainable-investing-framework/.

### What were the top investments of this financial product?

The figures here below are calculated on an average basis for the last quarter ends of the financial year of the Sub-Fund. This data includes all securities, excluding derivatives.

Largest investments	Sector	%	Country
		Assets	
PROGRESSIVE CORP	Insurance companies	6.53%	USA
RELX PLC	Graphics, publishing & printing media	5.46%	GBR
DEUTSCHE BOERSE AG - NAMEN-AKT	Financial, investment & other diversified comp.	5.00%	DEU
MARSH MCLENNAN COS	Insurance companies	4.98%	USA
UNILEVER	Food & soft drinks	4.51%	GBR
MUENCHENER RUECKVERSICHERUNGS AG REG SHS	Insurance companies	4.12%	DEU
IBERDROLA SA	Energy & water supply	3.57%	ESP
WOLTERS KLUWER NV	Graphics, publishing & printing media	3.42%	NLD
LINDE PLC	Petroleum/Oil and natural gas	3.35%	IRL
CME GROUP -A-	Financial, investment & other diversified comp.	3.33%	USA
ADMIRAL GROUP PLC	Insurance companies	3.32%	GBR
CISCO SYSTEMS INC	Computer hardware & networking	2.51%	USA
SANOFI	Pharmaceuticals, cosmetics & med. products	2.41%	FRA
ROCHE HOLDING LTD - DIVIDEND RIGHT CERT	Pharmaceuticals, cosmetics & med. products	2.30%	CHE
SCHNEIDER ELECTRIC SE	Electrical appliances & components	2.17%	FRA

What was the proportion of sustainability-related investments?

The mandate invested 68.59 % in sustainable investments.

Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

(#1 aligned with E/S characteristics) The mandate invested in:

- 1. 95 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 68.59 % in sustainable investments (#1A sustainable)\* of which 1.02 % have an environmental objective (which is aligned with the EU Taxonomy), 32.75 % have an environmental objective (which is not aligned with the EU Taxonomy) 34.83 % have a social objective.

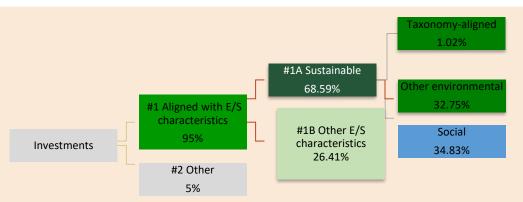

(#1B Other E/S characteristics) Includes securities of issuers with favourable ESG characteristics but are not sustainable investments.

The Asset allocation for the prior reference period was as follows:

The Sub-Fund invested 62% of its assets in sustainable investments.

Of the sustainable investments the Sub-Fund invested in 0% were aligned with the EU-Taxonomy. 24% of sustainable investments are considered as other environmentally sustainable investments and 38% are considered as socially sustainable.

97% of investments of the Sub-Fund are used to attained the promoted characteristic of the Sub-Fund during the reference period. 3% of investments constitute the remainder, and are neither sustainable investments nor used to attain the characteristics promoted by the fund.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Sector	% of Assets	
Insurance	25.03%	
Graphic art and publishing	12.28%	

Holding and finance companies	9.93%
Electronics and semiconductors	6.58%
Electrical engineering and electronics	6.03%
Pharmaceuticals and cosmetics	5.84%
Foods and non alcoholic drinks	4.92%
Utilities	3.77%
Petroleum	3.53%
Office supplies and computing	2.76%
Machine and apparatus construction	2.75%
Retail trade and department stores	2.24%
Chemicals	2.14%
Transportation	2.11%
Tires and rubber	2.11%
Banks and other financial institutions	1.79%
Communications	1.75%
Miscellaneous consumer goods	1.65%

The following data is as at June 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The mandate invested 1.02% in sustainable investments with an environmental objective aligned with the EU Taxonomy. This contributed towards the climate change mitigation (0.31%) economic objectives. The compliance of the investments of the mandate with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the mandate is measured by turnover.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

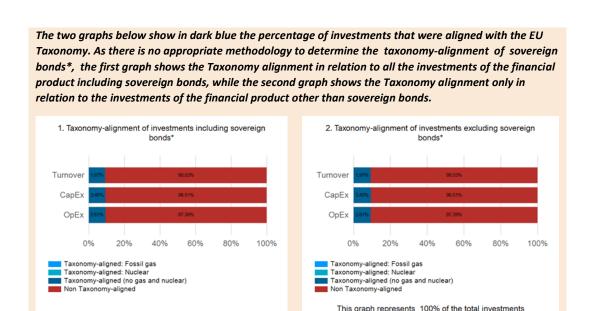

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?1

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign

The following data is a quarterly average of the following month end dates: 30th September 2023, 31st December 2023, 31st March 2024, 30th June 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the mandate made in Enabling Activity: 1.76%; Transitional Activity: 0.13%, measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-alignment of investments including sovereign bonds Turnover-0% Opex-0%

Capex-0%

Taxonomy-alignment of investments excluding sovereign bonds Turnover- 0%

Opex-0%

Capex-0%

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

(EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The mandate invested 32.75 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The mandate invested 34.83 % in sustainable investments with a social objective.

What investments were included under "#2 Other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the mandate were invested in assets aligned with the financial objective of the mandate, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the mandate adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The mandate took the following actions to meet the environmental or social characteristics:

- 1. The mandate invested in securities of issuers with favourable ESG characteristics.
- 2. The mandate made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the mandate's qualitative and quantitative environmental and social characteristics.
- 4. The mandate has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

How does the reference benchmark differ from a broad market index?
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU)

2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Product name: Legal entity identifier:

onemarkets BlackRock Global Equity Dynamic Opportunities Fund 529900HZH9S00BUCKK86

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?		
Yes	● ○ 🗶 No	
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 62.44% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective	
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments	

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. The Sub-Fund achieved a minimum of 50% of the exposure by assets under management invested in companies deemed by the Investment Manager to classify as

positive externalities "PEXT". Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

#### Environmental and social characteristics promoted by the Fund

Exclusion of issuers that are deemed to have associated negative externalities including but not limited to:

- 1. the production of certain types of controversial weapons
- 2. the distribution or production of firearms or small arms ammunition intended for retail civilians
- 3. the extraction of certain types of fossil fuel and/or the generation of power from them
- 4. the production of tobacco products or certain activities in relation to tobacco-related products; and
- 5. issuers which have been deemed to have failed to comply with United Nations Global Compact Principles
- 6. issuers involved in the ownership or operation of gambling related activities or facilities
- 7. production, supply and mining activities related to nuclear power
- 8. production of adult entertainment materials, and
- 9. companies that are on the People for the Ethical Treatment of Animals (PETA) list of facilities that manufacture animal-tested products, as well as brands that are owned by companies that have not yet adopted a permanent "no animal testing" policy.

Adherence to UniCredit's exclusion policy with exclusion criteria identifying Companies and/or Countries and/or underlying which should not be invested in or which should be invested in respecting predefined thresholds:

- 1. Companies that are involved in severe violations of the UN Global Compact
- 2. Companies manufacturing, maintaining, or trading controversial and/or morally unacceptable weapons, as identified through the international obligations, treaties and legislations.
- 3. Companies involved in thermal coal production and/or production of energy from thermal coal which derive from these businesses more than 10% of their consolidated revenues. It's also requested a mandatory phase out by 2028.
- 4. Companies involved in controversial fuel production and companies that extract hydrocarbons with controversial techniques or in areas with high environmental impact.

- 5. Companies involved in the tobacco production which derive from these businesses more than 5% of their consolidated revenues.
- 6. Companies involved in the nuclear energy production which derive from these businesses more than 15% of their consolidated revenues.
- 7. Companies involved in the weapons production which derive from these businesses more than 10% of their consolidated revenues.
- 8. Companies involved in the gambling business which derive from these businesses more than 15% of their consolidated revenues.
- 9. Companies involved in the adult entertainment business which derive from these businesses more than 15% of their consolidated revenues.

The Sub-Fund seeks to substantially restrict/exclude investment in companies that have failed to meet minimum ESG standards by eliminating from consideration the bottom 20% of all securities included with its benchmark index (MSCI ACWI) according to MSCI rating.

The Investment Adviser will seek to enhance exposure to investments that are deemed to have associated positive externalities.

The Sub-Fund invests a minimum proportion of 20% in Sustainable Investments according to article 2(17) SFDR. The Investment Manager defines Sustainable Investments as investments which contribute to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

The Sub-Fund aims to achieve a reduction in carbon emissions intensity score relative to the Index.

#### How did the sustainability indicators perform?

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus.

Sustainability Indicator	Metric	Performance for the reference period	
Exclusion of issuers based on exclusionary criteria as defined in table above "Environmental and social characteristics promoted by the Fund"	# of breaches reported	1 breach reported <sup>1</sup>	
Enhance exposure to investments that are deemed to have associated positive externalities.	Proportion of positive externalities investments of >50%	The Fund achieved 70.2% positive externalities	
Exposure to issuers that do not have explicit positive impact	Portfolio's % Market Value invested in BEXT or DEXT	The Fund achieved an exposure of 29.8% in BEXT and DEXT	

<sup>&</sup>lt;sup>1</sup> As per dedicated discussions between Structured Invest S.A. and BlackRock (held during July 2023), on 12 July 2023, the Fund bought 6 options in Alibaba Group Holding. Following discussions, it was determined that the positions did not comply with the whitelist and the positions were duly closed on 17 July 2023.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

.

characteristics but have no associated negative externalities either ("BEXT") and positions associated with unclear externalities and/or no data coverage ("DEXT")		
Limiting investments in issuers deemed to have negative externalities (NEXT)	# of breaches	1 breach reported <sup>2</sup>
Investments in Sustainable Investments according to article 2(17) SFDR	Minimum proportion of 20%	The Fund achieved a 62.4% proportion of Sustainable Investments
Reduction in carbon emissions intensity score relative to the Index.	Emissions intensity (scope 1 & 2, normalised by sales (t/ USD million sales)) compared to the fund's benchmark index	The Fund achieved a 37% reduction in scope 1 & 2 emissions intensity, normalised by sales.( Fund 81, Index: 128.6)

All data presented is unaudited and not subject to an assurance provided by an auditor or a review by a third part.

#### ...and compared to previous periods?

Sustainability Indicator	Metric	Performance for the previous reference period	Performance for the reference period
Exclusion of issuers based on exclusionary criteria as defined in table above "Environmental and social characteristics promoted by the Fund"	# of active breaches reported	1 active breach reported	1 active breach reported
Enhance exposure to investments that are deemed to have associated positive externalities.	Proportion of positive externalities investments of >50%	The Fund achieved 72.1% positive externalities	The Fund achieved 70.2% positive externalities
Investments in Sustainable Investments according to article 2(17) SFDR	Minimum proportion of 20%	The Fund achieved a 54.6% proportion of Sustainable Investments	The Fund achieved a 62.4% proportion of Sustainable Investments
Reduction in carbon emissions intensity score relative to the Index.	Emissions intensity (scope 1 & 2 , normalised by sales (t/ USD million sales)) compared to the fund's benchmark index	The Fund achieved a 34.5% reduction in scope 1 & 2 emissions intensity, normalised by sales.( Fund 91.08 , Index: 139.23)	The Fund achieved a 37% reduction in scope 1 & 2 emissions intensity, normalised by sales.(Fund 81 , Index: 128.6)

<sup>&</sup>lt;sup>2</sup> As per dedicated discussions between You and BlackRock (held during July 2023), on 12 July 2023, the Fund bought 6 options in Alibaba Group Holding. Following discussions, it was determined that the positions did not comply with Your whitelist and the positions were duly closed on 17 July 2023.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This Fund invested at least 20% of its holdings in Sustainable Investments according to article 2(17) SFDR. All Sustainable Investments are assessed by the Investment Manager to comply with the Investment Manager's DNSH standard outlined below.

The Investment Manager invested in Sustainable Investments which contributed to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

A sustainable investment is assessed as contributing to an Environmental and/or Social Objective where:

- 1. minimum proportion of the issuer's business activity contributes to an Environmental and/or Social Objective; or
- 2. the issuer's business practices contribute to an Environmental and/or Social Objective
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation.

The Investment Manager has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm have not qualified as Sustainable Investments.

The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for principal adverse impacts ("PAI"s) on sustainability factors for each type of investment were assessed BlackRock's Sustainable using Investments proprietary methodology. All relevant mandatory PAI indicators included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288 were considered. BlackRock makes use of fundamental analysis and/or third-party data sources to identify investments which negatively impact sustainability factors and cause significant harm. Please refer to the section below, "How did this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considered PAIs on sustainability factors

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable Investments have been assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

## How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("E&S Criteria") set out above (refer to section "To what extent were the environmental and/or social characteristics promoted by this financial product met?"). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria. The Fund's specific sustainability indicators may not align with the full scope of the regulatory definition of the corresponding PAI outlined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

Adverse Sustainability Indicator	Sustainability Indicator
GHG intensity of investee companies	The Fund aims to achieve a reduction in carbon emissions intensity relative to the Index.
Share of investments in companies active in the fossil fuel sector	Exclusion of companies involved in thermal coal production and/or production of energy from thermal coal which derive from these

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

	businesses more than 10% of their consolidated revenues and companies involved in controversial fuel production and companies that extract hydrocarbons with controversial techniques or in areas with high environmental impact. Exclusion of issuer that are deemed to have associated negative externalities, including deriving more than 5% of their revenue from the production and generation of tar sands (also known as o sands).	
Shares of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	Exclusion of issuers that are deemed to have associated negative externalities.	
Share of investments in investee companies that have been negatively involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	Exclusion of issuers which have been deemed to have failed to comply with United Nations Global Compact Principles.	
Share of investments in investee companies involved in the manufacture or selling of controversial weapons	Exclusion of issuers which are manufacturing, maintaining, or trading controversial and/or morally unacceptable weapons, as identified through the international obligations, treaties and legislations.	

#### What were the top investments of this financial product?

The figures here below are calculated on an average basis for the last quarter ends of the financial year of the Sub-Fund.

The list includes the
investments
constituting <b>the</b>
greatest proportion
of investments of
the financial product
during the reference
period which is:
01.07.2023 -
30.06.2024

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Internet, software & IT services	5.36%	USA
ELI LILLY & CO	Biotechnology	3.57%	USA
NVIDIA CORP	Electronics & semiconductors	3.52%	USA
MASTERCARD INC -A-	Banks & other credit institutions	2.74%	USA
ALPHABET INC -C-	Internet, software & IT services	2.48%	USA
ASML HOLDING NV	Electronics & semiconductors	2.37%	NLD
APPLE INC	Computer hardware & networking	1.98%	USA
ASTRAZENECA PLC	Pharmaceuticals, cosmetics & med. products	1.84%	GBR
MARSH MCLENNAN COS	Insurance companies	1.79%	USA

AMAZON.COM INC	Retail trade & department stores	1.45%	USA

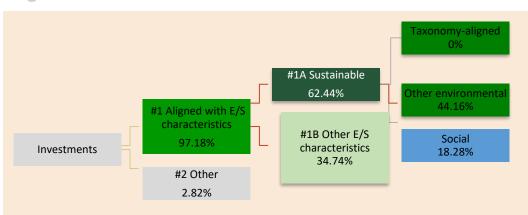

SALESFORCE INC	Internet, software & IT services	1.40%	USA
NESTLE SA PREFERENTIAL SHARE	Food & soft drinks	0.90%	CHE
APPLIED MATERIALS INC	Electronics & semiconductors	0.84%	USA
INTUITIVE SURGICAL	Pharmaceuticals, cosmetics & med. products	1.44%	USA

### What was the proportion of sustainability-related investments?

The Sub-Fund invested 62.44% into sustainable investments.

#### What was the asset allocation?

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- $\hbox{- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.}\\$
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The asset allocation for the prior reference period was as follows:

The Sub-Fund invested 54.6% of its assets in sustainable investments.

Of the sustainable investments the Sub-Fund invested in 0% were aligned with the EU-Taxonomy. 40.9% of sustainable investments are considered as other environmentally sustainable investments and 13.7% are considered as socially sustainable.

40.8% of investments of the Sub-Fund are used to attained the promoted characteristic of the Sub-Fund during the reference period. 4.6% of investments constitute the remainder, and are neither sustainable investments nor used to attain the characteristics promoted by the fund.

# Asset allocation describes the share of investments in

specific assets.

#### In which economic sectors were the investments made?

% of Sector **Sub-Sectors** Assets Information Technology Software & Services 12.09% Semiconductors & Semiconductor Information Technology Equipment 11.48% Health Care Pharma, Biotech & Life Sciences 9.18% Health Care Health Care Equipment & Services 8.52% Industrials Capital Goods 8.24% Financials Financial Services 5.61% Financials Banks 4.55% Consumer Discretionary Autos & Components 3.92% Communication Media & Entertainment 3.90% **Financials** Insurance 3.38% Consumer Discretionary Distribution & Consumer Discretionary Retail 3.23% Information Technology 2.98% Tech Hardware & Equip Cash Securities 2.59% Materials Materials 2.34% Consumer Staples Food Bevg Tobacco 2.13% Consumer Staples Distribution & Retail 2.08% Consumer Staples 1.75% Consumer Discretionary Consumer Durables Industrials Transportation 1.68% Industrials Commercial & Professional Services 1.63% Consumer Discretionary Consumer Services 1.32% Utilities Utilities 1.20% Integrated Oil & Gas 1.18%\* Energy Equity Real Estate Investment Trusts Real Estate (REITs) 1.04% Non-Spendable Cash 1.00% Communication Telecom 0.81% Consumer Staples Household & Personal Prod 0.73% Energy Oil & Gas Storage & Transportation 0.48%\* Energy Oil & Gas Equipment & Services 0.46%\* Oil & Gas Refining & Marketing & Transportati 0.45%\* Energy FX 0.05% 0.00% **Futures** 

The positions marked with an asterisk are related to fossil fuel activities.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities
directly enable

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

In nuclear energy

Not applicable.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>3</sup>

Yes:

In fossil gas

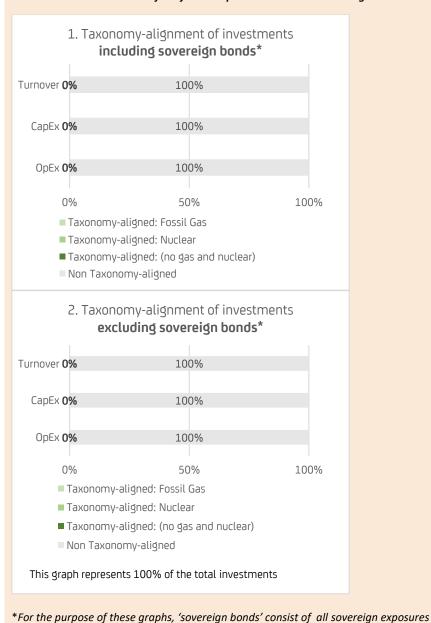

**₩** No

<sup>3</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

For the reference period, 0% of the Fund's investments were made in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

For the previous reference period, 0% of the Portfolio's investments were aligned with EU Taxonomy.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 44.16% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with the EU Taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) they were part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

### What was the share of socially sustainable investments?

For the reference period, 18.28% of the Fund's investments were classified as socially sustainable investments.

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included derivatives and cash, however such holdings did not exceed 30%. Such investments were used only for investment purposes in pursuit of the Fund's (non-ESG) investment objective, for the purposes of liquidity management and/ or hedging.

No other investments held by the Fund were assessed against minimum environmental or social safeguards.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager has implemented internal quality controls such as compliance rule coding to ensure compliance with the environmental and social characteristics promoted by the Fund.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Manager agrees with this external assessment, the Investment Manager is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Manager's direct engagement with the issuer.

The Investment Manager may also decide to reduce exposure to such issuers.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How did this financial product perform compared to the reference benchmark?

For the reference period, an index has not been designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund, therefore this section is not applicable.

Please Note that the MSCI All Country World Index is used to compare certain ESG characteristics promoted by the Fund.

- How does the reference benchmark differ from a broad market index?
  Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be

aligned with the Taxonomy or not.

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
Yes	• No		
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective		
It made sustainable investments with a social objective:%	x It promoted E/S characteristics, but <b>did not</b> make any sustainable investments		

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted environmental and/or social characteristics by operating an exclusion strategy through the application of the set of exclusions detailed below, also listed in the template pre-contractual disclosure of the sub-fund:

- Companies that are involved in severe violations of the UN Global Compact
- 2. Companies manufacturing, maintaining, or trading controversial and/or morally unacceptable weapons, as identified through the international obligations, treaties and legislations.
- 3. Companies involved in thermal coal production and/or production of energy from thermal coal which derive from these businesses more than 10% of their consolidated revenues. It's also requested a mandatory phase out by 2028.
- 4. Companies involved in controversial fuel production and companies that extract hydrocarbons with controversial techniques or in areas with high environmental impact.
- 5. Companies involved in the tobacco production which derive from these businesses more than 5% of their consolidated revenues.
- 6. Companies involved in the nuclear energy production which derive from these businesses more than 15% of their consolidated revenues.
- 7. Companies involved in the weapons production which derive from these businesses more than 10% of their consolidated revenues.
- 8. Companies involved in the gambling business which derive from these businesses more than 15% of their consolidated revenues.
- 9. Companies involved in the adult entertainment business which derive from these businesses more than 15% of their consolidated revenues.

In addition, the Sub-Fund actively engaged with certain issuers as applicable including on matters of material climate and biodiversity impacts.

### How did the sustainability indicators perform?

Over the considered period, the Sub-Fund measured performance against one sustainable indicator i.e., the set of exclusions detailed below, also listed in the template pre-contractual disclosure of the sub-fund:

- Companies that are involved in severe violations of the UN Global Compact
- 2. Companies manufacturing, maintaining, or trading controversial and/or morally unacceptable weapons, as identified through the international obligations, treaties and legislations.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- 3. Companies involved in thermal coal production and/or production of energy from thermal coal which derive from these businesses more than 10% of their consolidated revenues. It's also requested a mandatory phase out by 2028.
- 4. Companies involved in controversial fuel production and companies that extract hydrocarbons with controversial techniques or in areas with high environmental impact.
- 5. Companies involved in the tobacco production which derive from these businesses more than 5% of their consolidated revenues.
- 6. Companies involved in the nuclear energy production which derive from these businesses more than 15% of their consolidated revenues.
- 7. Companies involved in the weapons production which derive from these businesses more than 10% of their consolidated revenues.
- 8. Companies involved in the gambling business which derive from these businesses more than 15% of their consolidated revenues.
- 9. Companies involved in the adult entertainment business which derive from these businesses more than 15% of their consolidated revenues.

The sub-fund met the requirements of the sustainability indicators above throughout this reporting period as all of the direct investments of the Sub-Fund which did not comply with the exclusions defined remained below the 10% threshold set in the template pre-contractual disclosure of the sub-fund.

### ...and compared to previous periods?

For the previous reporting period ending 30 June 2023, the sub-fund met the requirements of the sustainability as all of the direct investments of the Sub-Fund which did not comply with the exclusions defined remained below the 10% threshold set in the template precontractual disclosure of the sub-fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable. The Sub-Fund does not commit to any minimum investment in sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable. The Sub-Fund does not commit to any minimum investment in sustainable investments.

—— How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable. The Sub-Fund does not commit to any minimum investment in sustainable investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable. The Sub-Fund does not commit to any minimum investment in sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Not Applicable. The Sub-Fund did not consider principal adverse impact indicators on sustainability factors.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01.07.2023 – 30.06.2024

### What were the top investments of this financial product?

The figures here below are calculated on an average basis for the last quarter ends of the financial year of the Sub-Fund.

### What was the proportion of sustainability-related investments?

Not applicable, the Sub-Fund does not commit for sustainable investments.

### What was the asset allocation?

The Investment Manager has managed the Sub-Fund in accordance with the binding selection criteria written down in the Pre-Contractual Disclosure and within the limits set out in the Investment Guidelines of this Sub-Fund. The binding selection criteria referred to in this report are applied to 100% of the Sub-Funds direct holdings. Additionally, the Sub-Fund also contains instruments which are used for the purposes of hedging, unscreened investments for diversification purposes (except where there is a binding exclusion list or policy applied), and cash held as ancillary liquidity. The Sub-Fund did not include any target to invest a minimum of assets in sustainable investments at this time.

#### In which economic sectors were the investments made?

Sector	% of Assets
Bonds of States, provinces and municipalities	42.58%
Banks and other financial institutions	11.52%
Investment funds	9.83%
Internet and Internet services	5.75%
Electronics and semiconductors	3.68%
Pharmaceuticals and cosmetics	2.99%
Holding and finance companies	2.77%
Office supplies and computing	2.74%
Retail trade and department stores	2.67%

Asset allocation describes the share of investments in specific assets.

Building materials and trade	1.73%
Supranational Organisations	1.66%
Insurance	1.34%
Machine and apparatus construction	0.93%
Communications	0.88%
Petroleum	0.77%

Aeronautic and astronautic industry	0.10%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

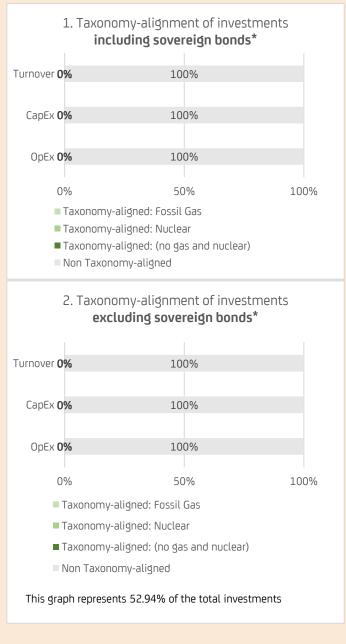

The Sub-Fund did not make any sustainable investments during the reference period (for the period ending 30 June 2024 the percentage of investments aligned with the EU Taxonomy is 0%). The investments made by the Sub-Fund were not aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

	Yes:			
		In fossil gas		In nuclear energy
×	No			

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- What was the share of investments made in transitional and enabling activities?

For the period ending 30 June 2024 the percentage of investments in transitional as well as the percentage of investments in enabling activities in the Sub-Fund is 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
  expenditure
  (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

For the period ending 30 June 2024, the investments for this Sub-Fund were not aligned with the EU Taxonomy. The investments for this Sub-Fund were not aligned with the EU Taxonomy for the previous reference period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable. The Sub-Fund does not commit to any minimum investment in sustainable investments.

What was the share of socially sustainable investments?

The Sub-Fund does not intend to make any investments in sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

In accordance with the Investment Guidelines of this Sub-Fund, the "#Other" investments include instruments which may have been used for the purposes of hedging, unscreened investments for diversification purposes as permitted by the prospectus to the Sub-Fund and subject to the application of any exclusion list or policy, and residual cash held as ancillary liquidity. Those instruments are not screened against environmental and/or social safeguards. In addition, up to 10% of further assets whilst screened against the exclusion criteria have been purchased by the Sub-Fund within an allowed tolerance of non-compliant securities.

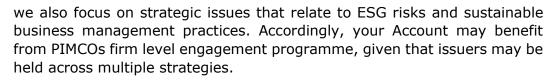

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

PIMCO has taken a number of actions to promote environmental and social characteristics in the Sub-Fund throughout the reference period including the application of those binding selection criteria specified in your precontractual report which include the following:

• Application of the exclusion list or policy as further specified in the Investment Guidelines of this Sub-Fund.

The Investment Manager manages portfolios in line with the investment guidelines applicable to each Sub-Fund. With regards to engagement, no guidelines with respect to issuer engagement have been set for your portfolio as binding criteria nor has there been any commitment made to engage with a particular issuer. Nonetheless, PIMCO does engage with issuers at a firm level, this includes, on an annual basis, our team of over 80 credit analysts conduct more than 5,000 meetings and calls with company management teams. In addition to discussing financial matters,

Not Applicable. The Sub-Fund does not use a reference index for the purpose of attaining any environmental or social characteristics.

- How does the reference benchmark differ from a broad market index?
  Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

The **EU Taxonomy** is a classification

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	● ○ ★ No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 59.81% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Strategy set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 51% of investments having positive environmental and/or social characteristics and a minimum of 10% of investments being sustainable investments. This commitment was met throughout the reference period (1 July 2023 - 30 June 2024). At the end of the reference period, the Strategy held

81.49% of investments with positive environmental and/or social characteristics and 59.81% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and/or social characteristics and those that meet the thresholds for being considered as sustainable investments.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues.

Through its exclusion criteria (which applied both full and partial exclusions); the Strategy promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Strategy fully excluded companies that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the incorporated a peer group comparison and screened out companies that did not score in the top 80% relative to peers based on good governance indicators.

The Strategy had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the reference period exhibiting such characteristics.

In summary: the Strategy met its pre-contractual committed minimums related to environmental and/or social characteristics and sustainable investments policy throughout the reference period. The Strategy applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Strategy were met is based on whether the Strategy held any positions in companies during the reference period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such companies were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and/or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and/or social characteristics that the Strategy promotes.

The methodology was based on a company's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity/independence of the board of directors and data privacy. To be included in the 51% of assets considered to be promoting environmental and/or social characteristics, a company must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Strategy held 81.49% of investments with positive environmental and/or social characteristics and 59.81% of sustainable investments.

In respect of the applied norms and values based exclusions, the Investment Manager utilised data to measure a company's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Strategy had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

Please refer to the Environmental / Social Characteristics Disclosure for the Strategy on www.jpmorganassetmanagement.lu for further information by searching for your particular Strategy and accessing the ESG Information section.

The sustainability indicators of the mandate were not subject to an assurance by auditors or a review by third parties.

#### ...and compared to previous periods?

	E/S Characteri stics	Sustaina ble Investme nts	Environment al Taxonomy- aligned	Other Environme ntal	Social
30/06/2024	81.49%	59.81%	9.18%	34.71%	15.92%
30/06/2023	78.16%	50.48%	0.00%	32.65%	17.83%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? The objectives of the sustainable investments that the Strategy partially made was comprised of any individual or combination of the following during the reference period:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture.

Contribution to such objectives was determined by either (i) products and services sustainability indicators which may have included the percentage of revenue derived from providing products and/or services that contributed to the relevant sustainable objective, such as a company producing solar panels or clean energy technology that met the Investment Manager's proprietary thresholds contributing to climate risk mitigation. The current percentage of revenue is set at a minimum of 20% and the entire holding in the company is considered a sustainable investment; or (ii) being an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to peers based on certain operational sustainability indicators. For example, scoring in the top 20% relative to peers on total waste impact contributes to a transition to a circular economy.

The actual contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the reference period. The Strategy was required to invest 10% in sustainable investments. At no time during the period did the Strategy hold sustainable investments below its committed minimum. At the end of the reference period, 59.81% of its assets were sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Strategy intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 - 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and/or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy completeness of such data.

### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for

Multinational Enterprises and controversial weapons. Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social & employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose-built screen.

### Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

#### Indicators of Sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways required a company to be considered as an operational peer group leader to qualify as a sustainable investment. This required scoring against the indicator in the top 20% relative to peers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and/or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data was used to identify potential violators. Unless an exception was granted, the Strategy prohibited relevant investments in these issuers.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Strategy considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10 and 14 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Strategy also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse sustainability indicators were used to determine engagement with investee companies based on their respective PAI performance.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

### What were the top investments of this financial product?

The figures here below are calculated on an average basis for the last quarter ends of the financial year of the Sub-Fund.

Largest investments	Sector	% Assets	Country
TAIWAN SEMICONDUCTOR CO ADR (REPR 5 SHS)	Electronics & semiconductors	7.03%	USA

### What was the proportion of sustainability-related investments?

The Sub-Fund allocated 59.81% of assets to sustainable investments.

### What was the asset allocation?

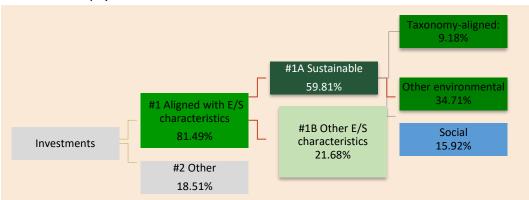

At the end of the reference period, the Strategy allocated 81.49% of its assets to companies that exhibited positive environmental and/or social characteristics and 59.81% of assets to sustainable investments. The Strategy did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments/funds (for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

# Asset allocation describes the share of

share of investments in specific assets.

Nb: EU Taxonomy alignment for those instruments considered to be sustainable investments by JP Morgan may differ from the complete EU Taxonomy alignment of the Strategy as reflected below (in response to the question: To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?).

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?

Sector	% of Assets
Electronics and semiconductors	20.48%
Banks and other financial institutions	17.92%
Internet and Internet services	15.43%
Holding and finance companies	5.26%
Electrical engineering and electronics	5.14%
Investment funds	3.93%
Foods and non alcoholic drinks	3.67%
Office supplies and computing	2.90%
Retail trade and department stores	2.59%
Insurance	2.50%
Petroleum	2.49%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Road vehicles	2.16%
Pharmaceuticals and cosmetics	1.75%
Communications	1.43%
Machine and apparatus construction	1.40%
Transportation	1.28%
Coal mining and steel industry	1.08%
Hotels and restaurants	1.07%
Real Estate companies	0.95%
Miscellaneous consumer goods	0.84%
Miscellaneous services	0.82%
Chemicals	0.71%
Building materials and trade	0.65%
Non-ferrous metals	0.58%
Biotechnology	0.51%
Textiles and garments	0.50%
Photographic And Optics	0.47%
Graphic art and publishing	0.35%
Paper and forest products	0.29%
Precious metals and stones	0.28%
Utilities	0.25%
Tobacco and alcoholic drinks	0.18%
Tires and rubber	0.16%
Healthcare and social services	0.13%
Aeronautic and astronautic industry	0.08%
Packaging industries	0.08%
<del></del>	

Based on portfolio holdings as at 30 June 24 the onemarkets J.P. Morgan Emerging Countries Fund held 4.60% in companies that have a tie to fossil fuels using MSCI ESG manager.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes more available.

The Strategy has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy. Therefore, the precontractual disclosure document for the Strategy indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0%. Any alignment outlined below is a by-product of the Strategy's framework which considers investments that have environmental and/or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
  expenditure
  (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

Yes:

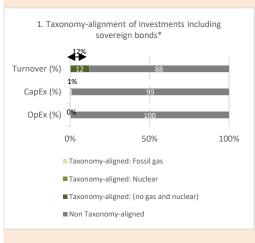

In fossil gas

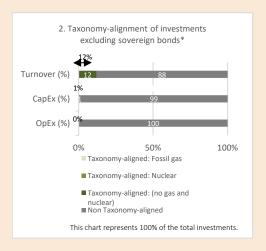

In nuclear energy

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### What was the share of investments made in transitional and enabling activities?

Further to the above, the Strategy has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Strategy's framework which considers investments that have positive environmental and/or social characteristics and sustainable investments.

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 12.19%, at the end of the reference period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Taxonomy aligned	
30/06/2024	9.18%	
30/06/2023	0.00%	

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 34.71% of assets at the end of the reference period. 9.18% of assets of the Sub-Fund are committed to Sustainable Investments with an environmental objective aligned with the EU Taxonomy.

### What was the share of socially sustainable investments?

The share of socially sustainable investments was 15.92% of assets at the end of the reference period.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 18.51% of assets in "other" investments were comprised of companies that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments/funds (for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards/principle:

The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.

- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 51% of assets in companies with positive environmental and/or social characteristics.
- The values and norms-based screening to implement full exclusions in relation issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco. Please refer to the exclusions policy for the Strategy on www.jpmorganassetmanagement.lu for further information by searching for your particular Strategy and accessing the ESG Information section.
- The requirement for all companies in the portfolio to follow good governance practices.

The Sub- Fund also committed to investing at least 10% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

### How did this financial product perform compared to the reference benchmark?

Not applicable.

- How does the reference benchmark differ from a broad market index?
  Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  This product is actively managed.

### Reference benchmarks are indexes to

measure
whether the
financial
product attains
the
environmental
or social
characteristics
that they
promote.

### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable

investments with an environmental objective might be aligned with the Taxonomy or not.

The **EU Taxonomy** is a classification

practices.

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
Yes	• × No		
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 68.41% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Strategy set out to promote a broad range of environmental, social and governance characteristics through its investment inclusion criteria, specifically with a minimum asset allocation of 67% of investments having positive environmental and/or social characteristics and a minimum of 40%

of investments being sustainable investments. This commitment was met throughout the reference period (1 July 2023 - 30 June 2024). At the end of the reference period, the Strategy held 88.53% of investments with positive environmental and/or social characteristics and 68.41% of sustainable investments.

These investments were determined by the application of an inclusion and exclusion criteria which applied at both an asset and product level. The inclusion criteria is underpinned by an ESG score assigned to all investments within the strategy to identify those that may be considered to have environmental and/or social characteristics and those that meet the thresholds for being considered as sustainable investments.

The ESG score takes into account the following indicators: effective management of toxic emissions, waste, good environmental record and social characteristics such as effective sustainability disclosures, positive scores on labour relations and management of safety issues. Through its exclusion criteria (which applied both full and partial exclusions); the Strategy promoted certain norms and values including supporting the protection of internationally proclaimed human rights. The Strategy fully excluded companies that are involved in the manufacture of controversial weapons and applied maximum revenue or production thresholds to others such as those that are involved in thermal coal and tobacco.

In relation to the consideration of Good Governance, all investments (excluding cash and derivatives) were screened to exclude known violators of good governance practices. In addition, for those investments considered to have environmental and/or social characteristics or qualifying sustainable investments, additional considerations applied. For these investments, the Strategy incorporated a peer group comparison and screened out companies that did not score in the top 80% relative to peers based on good governance indicators.

The Strategy had no specific allocation targets in favour of either environmental or social characteristics. The extent to which the promoted environmental and social characteristics were met may be understood by considering the actual % of assets allocated to the relevant companies for the reference period exhibiting such characteristics.

In summary: the Strategy met its pre-contractual committed minimums related to environmental and/or social characteristics and sustainable investments policy throughout the reference period. The Strategy applied screens with the aim of excluding all potential investments prohibited under its exclusion policy throughout this period. The extent to which the norms and values promoted by the Strategy were met is based on whether the Strategy held positions in any companies during the reference period that would have been prohibited under the exclusion policy. The Investment Manager has no indication that such companies were held. The Investment Manager informs that the continuity of the percentage values and information disclosed cannot be guaranteed in the future and is subject to the constantly evolving legal and regulatory landscape. The duration of the reference period can be less than 12 months if the fund was launched, closed or changed its Article 8/9 status during this time.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

### How did the sustainability indicators perform?

A combination of the Investment Manager's proprietary ESG scoring methodology: consisting of the Investment Manager's proprietary ESG score, and/or third-party data was used as part of the inclusion criteria to measure the attainment of the environmental and/or social characteristics that the Strategy promotes.

The methodology was based on a company's management of relevant environmental or social issues such as its toxic emissions, waste management, labour relations and safety issues, diversity/independence of the board of directors and data privacy. To be included in the 67% of assets considered to be promoting environmental and/or social characteristics, a company must score in the top 80% relative to its peers on either its environmental score or social score and meet the good governance conditions outlined above.

At the end of the reference period, the Strategy held 88.53% of investments with positive environmental and/or social characteristics and 68.41% of sustainable investments.

In respect of the applied norms and values based exclusions, the Investment Manager utilised data to measure a company's participation in the relevant activities. Screening on that data resulted in full exclusions on certain potential investments and partial exclusions based on maximum percentage thresholds on revenue or production as envisaged through the exclusions policy. Throughout the reference period, and at no point, were the exclusion rules breached. A subset of the "Adverse Sustainability Indicators" as set out in the EU SFDR Regulatory Technical Standards was also incorporated in the screening.

The Strategy had no specific allocation targets in favour of either environmental or social characteristics and therefore the performance of the indicators in respect of specific environmental or social characteristics is not set out here.

Please refer to the Environmental / Social Characteristics Disclosure for the Strategy on www.jpmorganassetmanagement.lu for further information by searching for your particular Strategy and accessing the ESG Information section.

The sustainability indicators were not subject to an assurance provided by an auditor or a review by a third party.

### ...and compared to previous periods?

The subfund "onemarkets J.P. Morgan US Equities Fund" was launched on 30 June 2023 and has not made any investments during the previous reference period (01 July 2022 – 30 June 2023). Therefore, historical comparison is not possible.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Strategy partially made was comprised of any individual or combination of the following during the reference period:

Environmental Objectives: (i) climate risk mitigation, (ii) transition to a circular economy

Social Objectives: (i) inclusive and sustainable communities - increased female executive representation, (ii) inclusive and sustainable communities - increased female representation on boards of directors, and (iii) provision of a decent working environment and culture.

Contribution to such objectives was determined by either (i) products and services sustainability indicators which may have included the percentage of revenue derived from providing products and/or services that contributed to the relevant sustainable objective, such as a company producing solar panels or clean energy technology that met the Investment Manager's proprietary thresholds contributing to climate risk mitigation. The current percentage of revenue is set at a minimum of 20% and the entire holding in the company is considered a sustainable investment; or (ii) being an operational peer group leader contributing to the relevant objective. Being a peer group leader is defined as scoring in the top 20% relative to peers based on certain operational sustainability indicators. For example, scoring in the top 20% relative to peers on total waste impact contributes to a transition to a circular economy.

The actual contribution to such objectives may be understood by considering the actual % of assets allocated to sustainable investments for the reference period. The Strategy was required to invest 40% in sustainable investments. At no time during the period did the Strategy hold sustainable investments below its committed minimum. At the end of the reference period, 68.41% of its assets were sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments that the Strategy intended to make were subject to a screening process that sought to identify and exclude, from qualifying as a sustainable investment, those companies which the Investment Manager considered the worst performing companies, based on a threshold determined by the Investment Manager, in relation to certain environmental considerations. As a consequence, only those companies demonstrating the best indicators relative to both absolute and relative measures were considered sustainable investments.

Such considerations include climate change, protection of water and marine resources, transition to a circular economy, pollution and protection of biodiversity and ecosystems. In addition, the Investment Manager also applied a screen that sought to identify and exclude those companies that the Investment Manager considers to be in

violation of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights based on data supplied by third-party service providers.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 - 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and/or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot guarantee the accuracy or completeness of such data.

The indicators for adverse impacts on sustainability factors in Table 1 of Annex 1 and certain indicators, as determined by the Investment Manager, in Tables 2 and 3 of Annex 1 of the EU SFDR

Regulatory Technical Standards were taken into account as further described below. The Investment Manager used either the metrics in the EU SFDR Regulatory Technical Standards, or where this was not possible due to data limitations or other technical issues, a representative proxy. The Investment Manager consolidated the consideration of certain indicators into a "primary" indicator as set out further below and may have used an additional broader set of indicators than referenced below.

The relevant indicators in Table 1 of Annex 1 of the EU SFDR Regulatory Technical Standards consist of 9 environmental and 5 social and employee related indicators. The environmental indicators are listed at 1-9 and relate to green-house gas emissions (1-3), exposure to fossil fuel, share of non-renewable energy consumption and production, energy consumption intensity, activities negatively affecting biodiversity sensitive areas, emissions to water and hazardous waste (4-9 respectively). Indicators 10 - 14 relate to a company's social and employee matters and cover violations of UN Global Compact principles and OECD Guidelines for Multinational Enterprises, lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles, unadjusted gender pay gap, Board gender diversity and exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons) respectively.

The Investment Manager's approach included both quantitative and qualitative aspects to take the above indicators into account. It used particular indicators for screening, seeking to exclude companies that may cause significant harm. It used a subset for engagement with certain companies, seeking to influence best practice and it used certain of them as indicators of positive sustainability performance, by applying a minimum threshold in respect of the indicator to qualify as a sustainable investment. The data needed to take the indicators into account, where available, may have been obtained from investee companies themselves and/or supplied by third-party service providers (including proxy data). Data inputs that are self-reported by companies or supplied by third-party providers may be based on data sets and assumptions that may be insufficient, of poor quality or contain biased information. Due to dependency on third-parties, the Investment Manager cannot quarantee the accuracy or completeness of such data.

### Screening

Certain of the indicators were taken into account through the values and norms-based screening to implement exclusions. These exclusions took into account indicators 10 and 14 in relation to UN Global Compact principles and OECD Guidelines for Multinational Enterprises and controversial weapons. The Investment Manager also applied a purpose-built screen. Due to certain technical considerations, such as data coverage in respect of specific indicators, the Investment Manager either applied the specific indicator per Table 1 or a representative proxy, as determined by the Investment Manager to screen investee companies in respect of the relevant environmental or social &

employee matters. For example, greenhouse gas emissions are associated with several indicators and corresponding metrics in Table 1, such as greenhouse gas emissions, carbon footprint and greenhouse gas intensity (indicators 1-3). The Investment Manager used greenhouse gas intensity data (indicator 3), data in respect of non-renewable energy consumption and production (indicator 5) and data on energy consumption intensity (indicator 6) to perform its screening in respect of greenhouse gas emissions.

In connection with the purpose-built screening and in respect of activities negatively affecting biodiversity sensitive areas and the emissions to water (indicators 7 and 8), due to data limitations, third-party representative proxy data was used, rather than the specific indicators per Table 1. The Investment Manager also took into account indicator 9 in relation to hazardous waste in respect of the purpose-built screen.

#### Engagement

In addition to screening out certain companies as described above, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. A subset of the indicators were used, subject to certain technical considerations such as data coverage, as the basis for engaging with selected underlying investee companies in accordance with the approach taken by the Investment Manager on stewardship and engagement. The indicators used in respect of such engagement include indicators 3, 5 and 13 in relation to greenhouse gas intensity, share of non-renewable energy and board gender diversity from Table 1. It also used indicators 2 in Table 2 and 3 in Table 3 in relation to emissions or air pollutants and number of days lost to injuries, accidents, fatalities or illness.

#### Indicators of Sustainability

The Investment Manager used indicators 3 and 13 in relation to GHG Intensity and board gender diversity as indicators of sustainability to assist in qualifying an investment as a sustainable investment. One of the pathways required a company to be considered as an operational peer group leader to qualify as a sustainable investment. This required scoring against the indicator in the top 20% relative to peers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms based portfolio exclusions as described above under "To what extent were the environmental and/or social characteristics promoted by this financial product met?" were applied to seek alignment with these guidelines and principles. Third-party data

was used to identify potential violators. Unless an exception was granted, the Strategy prohibited relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

#### How did this financial product consider principal adverse impacts on sustainability factors?

The Strategy considered select principal adverse impacts on sustainability factors through values and norms-based screening to implement exclusions. Indicators 10 and 14 in relation to violations of the UN Global Compact and controversial weapons from the EU SFDR Regulatory Technical Standards were used in respect of such screening. The Strategy also used certain of the indicators as part of the "Do No Significant Harm" screen as detailed in the response to the question directly above to demonstrate that an investment qualified as a sustainable investment.

A subset of the above-mentioned Adverse sustainability indicators were used to determine engagement with investee companies based on their respective PAI performance.

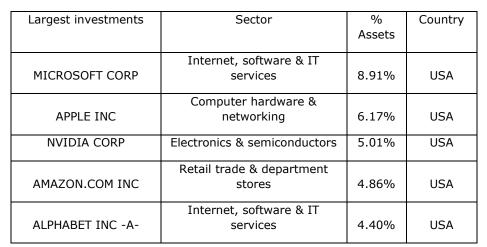

human rights, anticorruption and antibribery matters.

**impacts** are the

#### What were the top investments of this financial product?

The figures here below are calculated on an average basis for the last quarter ends of the financial year of the Sub-Fund.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01.07.2023 -30.06.2024

MASTERCARD INC -A-	Banks & other credit institutions	3.61%	USA
ABBVIE INC	Pharmaceuticals, cosmetics & med. products	2.73%	USA
UNITEDHEALTH GROUP INC	Healthcare & social services	2.43%	USA
PROCTER & GAMBLE CO	Miscellaneous consumer goods	2.31%	USA
NXP SEMICONDUCTORS NV - BEARER SHS	Electronics & semiconductors	1.47%	NLD
DANAHER CORP - REG SHS	Mechanical engineering & industrial equip.	1.36%	USA
PROLOGIS	Real estate	1.19%	USA
PROGRESSIVE CORP	Insurance companies	0.97%	USA
TEXAS INSTRUMENTS INC	Electronics & semiconductors	0.96%	USA
COSTCO WHOLESALE CORP	Retail trade & department stores	0.95%	USA

#### What was the proportion of sustainability-related investments?

The Sub-Fund allocated 68.41% of assets to sustainable investments.

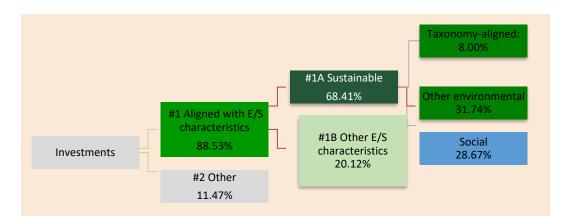

#### What was the asset allocation?

At the end of the reference period, the Strategy allocated 88.53% of its assets to companies that exhibited positive environmental and/or social characteristics and 68.41% of assets to sustainable investments. The Strategy did not commit to investing any proportion of assets specifically in securities exhibiting positive environmental characteristics or specifically in positive social characteristics nor is there any commitment to any specific individual or combination of environmental or social objectives.

Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments/funds (for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM are not included in the % of assets set out in the table below. These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

Nb: EU Taxonomy alignment for those instruments considered to be sustainable investments by JP Morgan may differ from the complete EU Taxonomy alignment of the Strategy as reflected below (in response to the question: To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?).

Asset allocation describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Although the Strategy promoted certain environmental and social characteristics through its inclusion and exclusion criteria, it may have invested across a broad range of sectors – please refer to the list below for a sector breakdown at the end of the reference period. In addition, the Investment Manager engaged on an ongoing basis with selected underlying investee companies. Investments within sectors and subsectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels, will be included in the table below if held. Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments/funds (for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM are excluded from the results, but are included in the denominator for the % of assets set out both in the table below, and in the Top Investments table.

Sector	% of Assets
Internet and Internet services	19.16%
Electronics and semiconductors	13.70%
Banks and other financial institutions	9.13%
Office supplies and computing	8.46%
Retail trade and department stores	7.03%
Pharmaceuticals and cosmetics	6.77%

Machine and apparatus construction	6.08%
Holding and finance companies	3.09%
Real Estate companies	2.86%
Biotechnology	2.84%
Petroleum	2.39%
Miscellaneous consumer goods	2.36%
Healthcare and social services	2.22%
Road vehicles	1.91%
Insurance	1.88%
Electrical engineering and electronics	1.55%
Utilities	1.44%
Communications	1.40%
Transportation	1.31%
Non-ferrous metals	1.22%
Foods and non alcoholic drinks	0.77%
Hotels and restaurants	0.64%
Miscellaneous services	0.60%
Graphic art and publishing	0.46%

Based on portfolio holdings as of 30 June 2024, the onemarkets J.P. Morgan US Equities Fund held 3.07% in companies that have a tie to fossil fuels using MSCI ESG manager.

#### Factor description in MSCI ESG manager

Fossil Fuels - Any Tie: Identifies companies with reserves or production of fossil fuels (thermal coal, oil and gas), other oil and gas related revenues and fossil fuel-based power generation. Companies owning metallurgical coal reserves are not flagged.

Issuer Name	Issuer ISIN	Portfolio Weight (%)
COSTCO WHOLESALE CORPORATION	US22160K1051	0.56
CENTERPOINT ENERGY, INC.	US15189T1079	0.74
CHENIERE ENERGY, INC.	US16411R2085	1.06
NISOURCE INC.	US65473P1057	0.72

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Data on EU Taxonomy alignment is currently very limited, in particular with regards to fossil gas and nuclear energy. We expect this to improve over time as more companies disclose their alignment, and the data becomes more available.

The Strategy has made no minimum commitment to sustainable investment with environmental objectives aligned to the EU Taxonomy.

Therefore, the precontractual disclosure document for the Strategy indicates the extent of targeted sustainable investments with an environmental objective aligned with the EU Taxonomy as 0%. Any alignment outlined below is a by-product of the Strategy's framework which considers investments that have environmental and/or social characteristics and sustainable investments (as defined by SFDR).

The below graphs illustrate the actual extent of investments in sustainable investments with an environmental objective aligned with the EU Taxonomy as measured at the end of the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related

activitie	s com	plying with the	EU Taxonoi	ny <i>?</i> ¹	
	Yes:				
		In fossil gas			In nuclear energy
×	No				

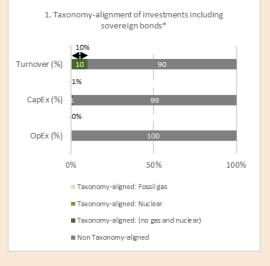

This chart represents 100% of the total investments.

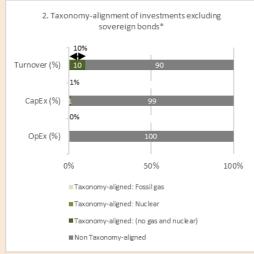

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
  expenditure
  (CapEx) shows the
  green investments
  made by investee
  companies,
  relevant for a
  transition to a
  green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This chart represents 100% of the total investments.

#### What was the share of investments made in transitional and enabling activities?

Further to the above, the Strategy has made no minimum commitment to making EU Taxonomy aligned investments – including Transitioning and Enabling activities. Any alignment outlined below is a by-product of the Strategy's framework which considers investments that have positive environmental and/or social characteristics and sustainable investments.

The calculated share of Transitioning activities represents 0.00% and the calculated share of Enabling activities represents 9.62%, at the end of the reference period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

onemarkets J.P. Morgan US Equities Fund" (the "Sub-Fund") was launched on 30 June 2023 and has not made any investments during the previous reference period (01 July 2022 – 30 June 2023). Therefore, historical comparison is not possible.

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 31.74% of assets at the end of the reference period. 8% of assets of the Sub-Fund are committed to Sustainable Investments with an environmental objective aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

<sup>\*</sup>For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

#### What was the share of socially sustainable investments?

The share of socially sustainable investments was 28.67% of assets at the end of the reference period.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The 11.47% of assets in "other" investments were comprised of companies that did not meet the criteria described in response to above question entitled, "How did the sustainability indicators perform?" to qualify as exhibiting positive environmental or social characteristics. They are investments for diversification purposes. Ancillary Liquid Assets, Deposits with Credit Institutions, money market instruments/funds (for managing cash subscriptions and redemptions as well as current and exceptional payments) and derivatives for EPM were not included in the % of assets included in the asset allocation diagram above, including under "other". These holdings fluctuate depending on investment flows and are ancillary to the investment policy with minimal or no impact on investment operations.

All investments, including "other" investments were subject to the following ESG Minimum Safeguards/principle:

- The minimum safeguards as outlined by Article 18 of the EU Taxonomy Regulation (including alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights), as implemented by the Investment Manager.
- Application of good governance practices (these include sound management structures, employee relations, remuneration of staff and tax compliance), as implemented by the Investment Manager.
- Compliance with the Do No Significant Harm principle as prescribed under the definition of sustainable investment in EU SFDR.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following binding elements of the investment strategy were applied during the reference period to select the investments to attain each of the environmental or social characteristics:

- The requirement to invest at least 67% of assets in companies with positive or improving E/S characteristics.
- The values and norms-based screening to implement full exclusions in relation issuers that are involved in certain activities such as manufacturing controversial weapons and applying maximum revenue, production or distribution percentage thresholds to others such as those that are involved in thermal coal and tobacco. Please refer to the

exclusions policy for the Strategy on www.jpmorganassetmanagement.lu for further information by searching for your particular Strategy and accessing the ESG Information section.

• The requirement for all companies in the portfolio to follow good governance practices.

The Strategy also committed to investing at least 40% of assets in sustainable investments.

Further information on engagement is available in the answer to the question "How were the indicators for adverse impacts on sustainability factors taken into account?"

#### How did this financial product perform compared to the reference benchmark?

Not applicable.

- How does the reference benchmark differ from a broad market index?
  Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?

  Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable

investments with an environmental objective might be aligned with the Taxonomy or not.

The **EU Taxonomy** is a classification

practices.

Product name: Legal entity identifier:

onemarkets Allianz Global Equity Future Champions Fund

5299007IOIQMOCCH4Y24

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?					
Yes	• No				
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 72.7% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective				
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments				

To what extent were the environmental and/or social characteristics promoted by this financial product met?

onemarkets Allianz Global Equity Future Champions Fund promoted environmental, social, human rights, governance, and business behaviour factors (this domain does not apply for sovereigns issued by a Sovereign Entity) through integration of a best-in-class approach into the investment Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

process. This encompassed the evaluation of corporate or sovereign issuers based on an SRI Rating which is used to construct the portfolio.

In addition, sustainable minimum exclusion criteria were applied.

No reference benchmark had been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Mandate.

#### How did the sustainability indicators perform?

To measure the attainment of the environmental and/or social characteristics the following sustainability indicators are used and which performed as follows:

- The actual percentage of the Mandate's Portfolio (Portfolio, in this respect, did not comprise on-rated derivatives and instruments that are non-rated by nature (e. g., cash and deposits)) invested in best-in-class issuers (issuers with a minimum SRI Rating of 1 out of a scale from 0-4) was 95.94 %
- -The Principal Adverse Impacts (PAIs) of investment decisions on sustainability factors were considered through the adherence to the exclusion criteria applied for direct investments. The following sustainable minimum exclusion criteria for direct investments were applied:
- securities issued by companies having a severe violation / breach of principles and guidelines such as the Principles of the United Nations Global Compact, the OECD Guidelines for Multinational Enterprises, and the United Nations Guiding Principles for Business and Human Rights on the grounds of problematic practices around human rights, labour rights, environment, and corruption issues,
- securities issued by companies involved in controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, biological weapons, depleted uranium, white phosphorus, and nuclear weapons),
- securities issued by companies that derive more than 10% of their revenues from weapons, military equipment, and services,
- securities issued by companies that derive more than 10% of their revenue from thermal coal extraction,
- securities issued by utility companies that generate more than 20% of their revenues from coal,
- securities issued by companies involved in the production of tobacco, and securities issued by companies involved in the distribution of tobacco with more than 5% of their revenues.

Direct investments in sovereign issuers with an insufficient freedom house index score were excluded.

The sustainable minimum exclusion criteria are based on information from an external data provider and coded in pre- and post-trade compliance. The review was performed at least half yearly.

The Investment Manager during the period adhered to the following guideline: at least 70% of the holdings in the Sub-Fund, each investee company shall have a GHG intensity within the best 50% GHG intensity of the respective peer group.

The data were not subject to an assurance provided by auditors or a review by third parties.

#### ...and compared to previous periods?

The subfund "onemarkets Allianz Global Equity Future Champions Fund" was launched on 30 June 2023 and has not made any investments during the previous reference period (01 July 2022 – 30 June 2023).

Indicator	06.2024	06.2023
The actual percentage of the Sub-Fund's Portfolio (Portfolio, in this respect, did not comprise on-rated derivatives and instruments that are non-rated by nature (e. g., cash and deposits)) invested in best-in-class issuers was	95.94%	-

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Sustainable Investments contributed to environmental and/or social objectives, for which the Investment Managers used as reference frameworks, among others, the UN Sustainable Development Goals (SDGs), as well as the objectives of the EU Taxonomy.

The assessment of the positive contribution to the environmental or social objectives was based on a proprietary framework which combined quantitative elements with qualitative inputs from internal research. The methodology applies first a quantitative breakdown of a securities issuer into its business activities. The qualitative element of the framework is an assessment if business activities contribute positively to an environmental or a social objective.

The positive contribution on the Mandate level was calculated by considering the revenue share of each issuer attributable to business activities which contributed to environmental and/or social objectives, provided the issuer satisfied the Do No Significant Harm («DNSH») and Good Governance principles. In the second step, asset-weighted aggregation was performed.

Moreover, for certain types of securities, which finance specific projects contributing to environmental or social objectives, the overall investment was considered to contribute to environmental and/or social objectives. Further, in these cases, a DNSH as well as a Good Governance check for issuers was performed.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective? To ensure that Sustainable Investments of the Mandate did not significantly harm any other environmental and/or social objective, the Investment Manager of the Mandate leveraged the PAI indicators, whereby significance thresholds have been defined to identify significantly harmful issuers. Issuers not meeting the significance threshold might have been engaged for a limited period to remediate the adverse impact. Otherwise, if the issuer did not meet the defined significance thresholds twice subsequently or in case of a failed engagement, it did not pass the DNSH assessment. Investments in securities of issuers which did not pass the DNSH assessment were not counted as sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

PAI indicators were considered either as part of the application of the exclusion criteria or through thresholds on a sectorial or absolute basis. Significance thresholds have also been defined referring to qualitative or quantitative criteria.

Recognising the lack of data coverage for some of the PAI indicators, equivalent data points were used, when relevant, to assess PAI indicators when applying the DNSH assessment for the following indicators for corporates: share of non-renewable energy consumption and production, activities negatively affecting biodiversity-sensitive areas, emissions to water, lack of processes and compliance mechanisms to monitor compliance with UNGC principles and OECD Guidelines for Multinational Enterprises; for sovereigns: GHG Intensity investee and countries subject to social violations. In case of securities which finance specific projects contributing to environmental or social objectives equivalent data at project level might be used to ensure that Sustainable Investments do not significantly harm any other environmental and/or social objective.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager's sustainable minimum exclusion list screened out companies based on their involvement in controversial practices against international norms. The core

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

normative framework consists of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights and are embedded in the Sustainable Development Goals. Sustainable Investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as securities issued by companies having a severe violation of these frameworks were restricted from investment universe.

How did this financial product consider principal adverse impacts on sustainability factors?

The Allianz Global Investors joined the Net Zero Asset Manager Initiative and considered PAI indicators through stewardship including engagement, both of which were relevant to mitigate potential adverse impact as a company.

Due to the commitment to the Net Zero Asset Manager Initiative, the Allianz Global Investors aims to reduce greenhouse gas emissions in partnership with asset owner clients on decarbonisation goals, consistent with an ambition to reach net zero emission by 2050 or sooner across all assets under management. As part of this objective the Allianz Global Investors had set an interim target for the proportion of assets to be managed in line with the attainment of net zero emissions by 2050 or sooner.

The Mandate's Investment Manager considered PAI indicators regarding greenhouse gas emission, biodiversity, water, waste as well as social and employee matters for corporate issuers, and, where relevant, the freedom house index was applied to investments in sovereigns. PAI indicators were considered within the Investment Manager's investment process through the means of exclusions as described in the sustainability indicator section.

Moreover, the data coverage for the data required for the PAI indicators were heterogenous. The data coverage related to biodiversity, water and waste is low and the related PAI indicators were considered through exclusion of securities issued by companies having a severe violation / breach of principles and guidelines such as the Principles of the United Nations Global Compact, the OECD Guidelines for Multinational Enterprises, and the United Nations Guiding Principles for Business and Human Rights on the grounds of problematic practices around human rights, labour rights, environment, and corruption issues.

Additionally, PAI indicators were, among other sustainability factors, applied to derive the SRI Rating.

The SRI Rating is used for the portfolio construction.

The following PAI indicators were considered:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

- Share of non-renewable energy consumption and production
- Activities negatively affecting biodiversity-sensitive areas
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio
- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Unadjusted gender pay gap
- Board gender diversity
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Investee countries subject to social violations

#### What were the top investments of this financial product?

During the reference period, the majority of the investments of the financial product contained equity, debt and / or target funds. A portion of the financial product contained assets which did not promote environmental or social characteristics. Examples of such assets are derivatives, cash and deposits. As these assets were not used to attain the environmental or social characteristics promoted by the financial product, they were excluded from the determination of top investments. The main investments are the investments with the largest weight in the financial product. The weight is calculated as an average over the four valuation dates. The valuation dates are the reporting date and the last day of every third month for nine months backwards from the reporting date.

For transparency purposes for the investments falling under the NACE sector "Public administration and defence; compulsory social security", the more detailed (sub- sector level) classification is displayed in order to differentiate between the investments which relate to sub-sectors "Administration of the State and the economic and social policy of the community", "Provision of services to the community as a whole" (which includes, among others, defence activities) and "Compulsory social security activities". No direct sector allocation is possible for investments in target funds, as a target fund may invest in securities of issuers from different sectors.

Largest investments	Sector	%	Country
		Assets	
BRAMBLES LTD	MANUFACTURING	1.19%	AUT
EDWARDS LIFESCIENCES CORP	MANUFACTURING	1.18%	USA

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01.07.2023 – 30.06.2024

INSULET CORP	MANUFACTURING	1.12%	USA
US FOODS HOLDING CORP	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	1.11%	USA

#### What was the proportion of sustainability-related investments?

Sustainability-related investments refer to all investments that contribute to the achievement of the environmental and/or social characteristics within the scope of the investment strategy. The majority of the Mandate's assets were used to meet the environmental or social characteristics promoted by this Mandate. A low portion of the Mandate contained assets which did not promote environmental or social characteristics. Examples of such instruments are derivatives, cash and deposits, some Target Funds and investment with temporarily divergent or absent environmental, social, or good governance qualifications. The percentage of sustainability-related investments amounted to 72.7% as of the end of this reference period.

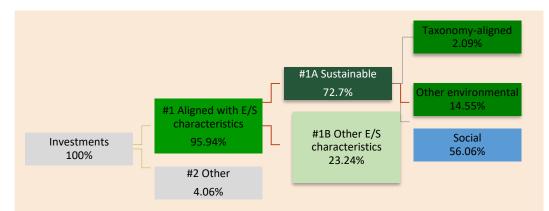

#### What was the asset allocation?

Some business activities may contribute to more than one sustainable subcategory (social, taxonomy aligned or other environmental). This can lead to situations, in which the sum of the sustainable subcategories does no match to overall number of the sustainable category. Nonetheless, no doublecounting is possible on the sustainable investment overall category.

The Sub-Fund was launched on 30 June 2023 and has not made any investments during the last reference period (01 July 2022 – 30 June

Asset allocation describes the share of investments in specific assets.

2023). Therefore, no comparison to the last period end can be made at this stage.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

The table below shows the shares of the Mandate's investments in various sectors and subsectors at the end of the financial year. The analysis is based on the NACE classification of the economic activities of the company or issuer of the securities in which the financial product is invested. In case of the investments in target funds, a look-through approach is applied so that the sector and sub-sector affiliations of the underlying assets of the target funds are taken into account to ensure transparency on the sector exposure of the financial product.

The reporting of sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council is currently not possible, as the evaluation includes only NACE classification level I and II. The fossil fuels activities mentioned above are considered aggregated with other activities under sub-sectors B5, B6, B9, C28, D35 and G46.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Taxonomy-aligned investments included debt and/or equity investments in environmentally sustainable economic activities aligned with the EU-Taxonomy. Taxonomy-aligned data is provided by an external data provider. Taxonomy-aligned data was, only in rare cases, data reported by companies in accordance with the EU Taxonomy. The data provider derived Taxonomy-aligned data from other available equivalent company data.

The data were not subject to an assurance provided by auditors or a review by third parties.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The data does not reflect any data in government bonds. As of today, there is no recognized methodology available to determine the proportion of Taxonomy-aligned activities when investing in government bonds.

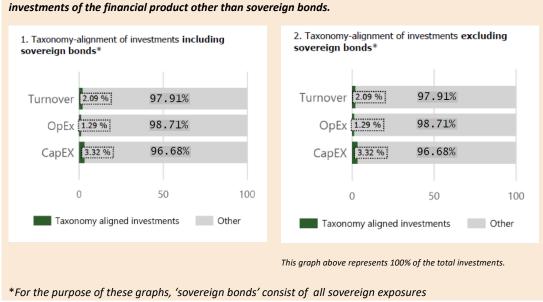

The share of investments in sovereigns was 0 % (calculated based on look-through approach).

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

The breakdown of the shares of investments by environmental objectives in fossil gas and in nuclear energy is not possible at present, as the data is not yet available in verified form.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Climate change mitigation	0.00 %
Climate change adaptation	0.00 %

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- expenditure
  (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee

It is currently not possible to break down the shares of investments by environmental objectives, as the data is not yet available in a verified form.

What was the share of investments made in transitional and enabling activities?

Transitional activities	0.00 %
Enabling activities	0.00 %

The Mandate's Investment Manager has not committed to a split of minimum taxonomy alignment into transitional, enabling activities and own performance. Currently the Investment Manager does not have complete, verifiable and up-to-date data to review all investments with respect to the technical assessment criteria for enabling and transitional activities as set out in the Taxonomy Regulation.

Therefore, the corresponding values on the enabling and transitional activities are stated as 0%. Nonfinancial undertakings will disclose information on the taxonomy-alignment of their economic activities in the form of pre-defined KPIs, indicating to which environmental objective activities contribute and whether it is a transitional or enabling economic activity, only starting from 01 January 2023 (financial undertakings - from 01 January 2024). This information is a mandatory basis for this evaluation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Taxonomy-alignment of investments including sovereign bonds	06.2024	06.2023
Turnover	2.09 %	2.43 %
Capex	3.32 %	0 %
Opex	1.29 %	0 %
Taxonomy-alignment of investments excluding sovereign bonds	06.2024	06.2023
Turnover	2.09 %	2.43 %
Capex	3.32 %	0 %
Opex	1.29 %	0 %

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 14.55 %.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 56.06%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Under «#2 Other» investments which were included were Cash, share of non-Sustainable Investments of Targets Funds, or Derivatives (calculation was based on a look-through approach).

Derivatives were used for efficient portfolio management (including risk hedging) and/or investment purposes, and Target Funds to benefit from a specific strategy. There were no minimum environmental or social safeguards applied to these investments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To ensure that the Mandate fulfils its environmental and social characteristics, the binding elements were defined as assessment criteria. The adherence to binding elements was measured with the help of sustainability indicators. For each sustainability indicator, a methodology, based on different data sources, has been set up to ensure accurate measurement and reporting of the indicators. To provide for actual underlying data, the Sustainable Minimum Exclusion list was updated at least twice per year by the Sustainability Team and based on external data sources.

Technical control mechanisms have been introduced for monitoring the adherence to the binding elements in pre- and post-trade compliance systems. These mechanisms served to guarantee constant compliance with the environmental and/or social characteristics of the Mandate. In case of identified breaches, corresponding measures were performed to address the breaches. Example of such measures are disposal of securities which are not in line with the exclusion criteria or engagement with the issuers (in case of direct investments in companies). These mechanisms are an integral part of the PAI consideration process.

In addition, AllianzGI engages with investee companies. The engagement activities were performed only in relation to direct investments. It is not guaranteed that the engagement conducted includes issuers held by every fund. The Investment Manager's engagement strategy rests on 2 pillars: (1) riskbased approach and (2) thematic approach.

The risk-based approach focuses on the material ESG risks identified. Engagements are closely related to the size of exposure. Significant votes against company management at past general meetings, controversies connected to sustainability or governance and other sustainability issues are in the focus of the engagement with investee companies.

The thematic approach focuses on one of the three AllianzGI's strategic sustainability themes- climate change, planetary boundaries, and inclusive capitalism- or to governance themes within specific markets. Thematic engagements were identified based on topics deemed important for portfolio investments and were prioritized based on the size of AllianzGI's holdings and considering the priorities of clients.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How did this financial product perform compared to the reference benchmark?

Not applicable.

- How does the reference benchmark differ from a broad market index?
  Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

practices.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier:

onemarkets Allianz Conservative Multi-Asset Fund 529900X1AW2N0LT5PT42

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?		
Yes	● ○ 🗶 No	
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 23.57% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	
It made sustainable investments with a social objective:%	with a social objective  It promoted E/S characteristics, but did not make any sustainable investments	

To what extent were the environmental and/or social characteristics promoted by this financial product met?

onemarkets Allianz Conservative Multi-Asset Fund promoted environmental, social, human rights, governance, and business behaviour factors (this domain does not apply for sovereigns issued by a Sovereign Entity) through integration of a best-in-class approach into the investment Sustainability indicators measure how the environmental or social characteristics promoted by the

financial product

are attained.

process. This encompassed the evaluation of corporate or sovereign issuers based on an SRI Rating which is used to construct the portfolio.

In addition, sustainable minimum exclusion criteria were applied.

No reference benchmark had been designated for the purpose of attaining the environmental and/or social characteristics promoted by the Mandate.

#### How did the sustainability indicators perform?

To measure the attainment of the environmental and/or social characteristics the following sustainability indicators are used and which performed as follows:

- The actual percentage of the Mandate's Portfolio (Portfolio, in this respect, did not comprise on-rated derivatives and instruments that are non-rated by nature (e. g., cash and deposits)) invested in best-in-class issuers (issuers with a minimum SRI Rating of 1 out of a scale from 0-4) was 85.85~%
- -The Principal Adverse Impacts (PAIs) of investment decisions on sustainability factors were considered through the adherence to the exclusion criteria applied for direct investments. The following sustainable minimum exclusion criteria for direct investments were applied:
- securities issued by companies having a severe violation / breach of principles and guidelines such as the Principles of the United Nations Global Compact, the OECD Guidelines for Multinational Enterprises, and the United Nations Guiding Principles for Business and Human Rights on the grounds of problematic practices around human rights, labour rights, environment, and corruption issues,
- securities issued by companies involved in controversial weapons (anti-personnel mines, cluster munitions, chemical weapons, biological weapons, depleted uranium, white phosphorus, and nuclear weapons),
- securities issued by companies that derive more than 10% of their revenues from weapons, military equipment, and services,
- securities issued by companies that derive more than 10% of their revenue from thermal coal extraction,
- securities issued by utility companies that generate more than 20% of their revenues from coal,
- securities issued by companies involved in the production of tobacco, and securities issued by companies involved in the distribution of tobacco with more than 5% of their revenues.

Direct investments in sovereign issuers with an insufficient freedom house index score were excluded.

The sustainable minimum exclusion criteria are based on information from an external data provider and coded in pre- and post-trade compliance. The review was performed at least half yearly.

The data were not subject to an assurance provided by auditors or a review by third parties.

#### ...and compared to previous periods?

The subfund "onemarkets Allianz Conservative Multi-Asset Fund" was launched on 30 June 2023 and has not made any investments during the previous reference period (01 July 2022 – 30 June 2023).

Indicator	06.2024	06.2023
The actual percentage of the Sub-Fund's Portfolio (Portfolio, in this respect, did not comprise on-rated derivatives and instruments that are non-rated by nature (e. g., cash and deposits)) invested in best-in-class issuers was	85.85%	-

# What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Sustainable Investments contributed to environmental and/or social objectives, for which the Investment Managers used as reference frameworks, among others, the UN Sustainable Development Goals (SDGs), as well as the objectives of the EU Taxonomy.

The assessment of the positive contribution to the environmental or social objectives was based on a proprietary framework which combined quantitative elements with qualitative inputs from internal research. The methodology applies first a quantitative breakdown of a securities issuer into its business activities. The qualitative element of the framework is an assessment if business activities contribute positively to an environmental or a social objective.

The positive contribution on the Mandate level was calculated by considering the revenue share of each issuer attributable to business activities which contributed to environmental and/or social objectives, provided the issuer satisfied the Do No Significant Harm («DNSH») and Good Governance principles. In the second step, asset-weighted aggregation was performed.

Moreover, for certain types of securities, which finance specific projects contributing to environmental or social objectives, the overall investment was considered to contribute to environmental and/or social objectives. Further, in these cases, a DNSH as well as a Good Governance check for issuers was performed.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure that Sustainable Investments of the Mandate did not significantly harm any other environmental and/or social objective, the Investment Manager of the Mandate leveraged the PAI indicators, whereby significance thresholds have been defined to identify significantly harmful issuers. Issuers not meeting the significance threshold might have been engaged for a limited period to remediate

the adverse impact. Otherwise, if the issuer did not meet the defined significance thresholds twice subsequently or in case of a failed engagement, it did not pass the DNSH assessment. Investments in securities of issuers which did not pass the DNSH assessment were not counted as sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

PAI indicators were considered either as part of the application of the exclusion criteria or through thresholds on a sectorial or absolute basis. Significance thresholds have also been defined referring to qualitative or quantitative criteria.

Recognising the lack of data coverage for some of the PAI indicators, equivalent data points were used, when relevant, to assess PAI indicators when applying the DNSH assessment for the following indicators for corporates: share of non-renewable energy consumption and production, activities negatively affecting biodiversity-sensitive areas, emissions to water, lack of processes and compliance mechanisms to monitor compliance with UNGC principles and OECD Guidelines for Multinational Enterprises; for sovereigns: GHG Intensity investee and countries subject to social violations. In case of securities which finance specific projects contributing to environmental or social objectives equivalent data at project level might be used to ensure that Sustainable Investments do not significantly harm any other environmental and/or social objective.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager's sustainable minimum exclusion list screened out companies based on their involvement in controversial practices against international norms. The core normative framework consists of the Principles of the UN Global Compact, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles for Business and Human Rights and are

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

embedded in the Sustainable Development Goals. Sustainable Investments were aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on

Business and Human Rights as securities issued by companies having a severe violation of these frameworks were restricted from investment universe.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

## How did this financial product consider principal adverse impacts on sustainability factors?

The Allianz Global Investors joined the Net Zero Asset Manager Initiative and considered PAI indicators through stewardship including engagement, both of which were relevant to mitigate potential adverse impact as a company.

Due to the commitment to the Net Zero Asset Manager Initiative, the Allianz Global Investors aims to reduce greenhouse gas emissions in partnership with asset owner clients on decarbonisation goals, consistent with an ambition to reach net zero emission by 2050 or sooner across all assets under management. As part of this objective the Allianz Global Investors had set an interim target for the proportion of assets to be managed in line with the attainment of net zero emissions by 2050 or sooner.

The Mandate's Investment Manager considered PAI indicators regarding greenhouse gas emission, biodiversity, water, waste as well as social and employee matters for corporate issuers, and, where relevant, the freedom house index was applied to investments in sovereigns. PAI indicators were considered within the Investment Manager's investment process through the means of exclusions as described in the sustainability indicator section.

Moreover, the data coverage for the data required for the PAI indicators were heterogenous. The data coverage related to biodiversity, water and waste is low and the related PAI indicators were considered through exclusion of securities issued by companies having a severe violation / breach of principles and guidelines such as the Principles of the United Nations Global Compact, the OECD Guidelines for Multinational Enterprises, and the United Nations Guiding Principles for Business and Human Rights on the grounds of problematic practices around human rights, labour rights, environment, and corruption issues.

Additionally, PAI indicators were, among other sustainability factors, applied to derive the SRI Rating. The SRI Rating is used for the portfolio construction.

The following PAI indicators were considered:

- GHG emissions
- Carbon footprint
- GHG intensity of investee companies
- Exposure to companies active in the fossil fuel sector
- Activities negatively affecting biodiversity-sensitive areas
- Emissions to water
- Hazardous waste and radioactive waste ratio

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises
- Board gender diversity
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)
- Investee countries subject to social violations

#### What were the top investments of this financial product?

During the reference period, the majority of the investments of the financial product contained equity, debt and / or target funds. A portion of the financial product contained assets which did not promote environmental or social characteristics. Examples of such assets are derivatives, cash and deposits. As these assets were not used to attain the environmental or social characteristics promoted by the financial product, they were excluded from the determination of top investments. The main investments are the investments with the largest weight in the financial product. The weight is calculated as an average over the four valuation dates. The valuation dates are the reporting date and the last day of every third month for nine months backwards from the reporting date.

For transparency purposes for the investments falling under the NACE sector "Public administration and defence; compulsory social security", the more detailed (sub- sector level) classification is displayed in order to differentiate between the investments which relate to sub-sectors "Administration of the State and the economic and social policy of the community", "Provision of services to the community as a whole" (which includes, among others, defence activities) and "Compulsory social security activities". No direct sector allocation is possible for investments in target funds, as a target fund may invest in securities of issuers from different sectors.

#### What was the proportion of sustainability-related investments?

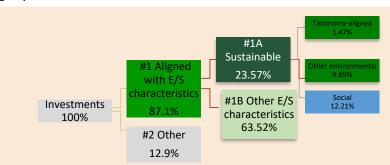

Sustainability-related investments refer to all investments that contribute to the achievement of the environmental and/or social characteristics within the scope of the investment strategy. The majority of the Mandate's assets were used to meet the environmental or social characteristics promoted by this Mandate. A low portion of the Mandate contained assets which did not promote environmental or social characteristics. Examples of such instruments are derivatives, cash and deposits, some Target Funds and investment with temporarily divergent or absent environmental, social, or good governance qualifications. The amount of sustainability-related investments amounted to 23.57% for

The amount of sustainability-related investments amounted to 23.57% for the end of the reference period.

Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

Some business activities may contribute to more than one sustainable sub-category (social, taxonomy aligned or other environmental). This can lead to situations, in which the sum of the sustainable subcategories does not match to overall number of the sustainable category. Nonetheless, no double counting is possible on the sustainable investment overall category.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The Sub-Fund was launched on 30 June 2023 and has not made any investments during the last reference period (01 July 2022 – 30 June 2023). Therefore, no comparison to the last period end can be made at this stage.

#### In which economic sectors were the investments made?

The table below shows the shares of the Mandate's investments in various sectors and subsectors at the end of the financial year. The analysis is based on the NACE classification of the economic activities of the company or issuer of the securities in which the financial product is invested. In case of the investments in target funds, a look-through approach is applied so that the sector and sub-sector affiliations of the underlying assets of the target funds are taken into account to ensure transparency on the sector exposure of the financial product.

The reporting of sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of

the European Parliament and of the Council is currently not possible, as the evaluation includes only NACE classification level I and II. The fossil fuels activities mentioned above are considered aggregated with other activities under sub-sectors B5, B6, B9, C28, D35 and G46.

	Sector / Sub-sector	% Assets

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Taxonomy-aligned investments included debt and/or equity investments in environmentally sustainable economic activities aligned with the EU-Taxonomy. Taxonomy-aligned data is provided by an external data provider. Taxonomy-aligned data was, only in rare cases, data reported by companies in accordance with the EU Taxonomy. The data provider derived Taxonomy-aligned data from other available equivalent company data.

The data were not subject to an assurance provided by auditors or a review by third parties.

The data does not reflect any data in government bonds. As of today, there is no recognized methodology available to determine the proportion of Taxonomy-aligned activities when investing in government bonds.

The share of investments in sovereigns was 41.45 % (calculated based on look-through approach).

■ Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?¹

Yes:

In fossil gas

In nuclear energy

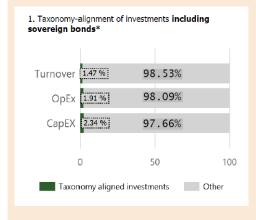

No

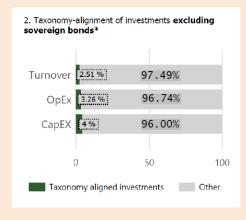

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
  expenditure
  (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph above represents 58.55% of the total investments.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Climate change mitigation	0.00 %
Climate change adaptation	0.00 %

It is currently not possible to break down the shares of investments by environmental objectives, as the data is not yet available in a verified form.

#### What was the share of investments made in transitional and enabling activities?

Transitional activities	0.00 %
Enabling activities	0.00 %

The Mandate's Investment Manager has not committed to a split of minimum taxonomy alignment into transitional, enabling activities and own performance. Currently the Investment Manager does no have complete, verifiable and up-to-date data to review all investments with respect to the technical assessment criteria for enabling and transitional activities as set out in the Taxonomy Regulation.

Therefore, the corresponding values on the enabling and transitional activities are stated as 0%. Nonfinancia undertakings will disclose information on the taxonomy-alignment of their economic activitie in the form of pre-defined KPIs, indicating to which environmental objective activities contribute an whether it is a transitional or enabling economic activity, only starting from 01 January 2023 (financial undertakings - from 01 January 2024). This information is a mandatory basis for this evaluation.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first reference period for this Fund, no comparatives are presented.

Taxonomy-alignment of investments including sovereign bonds	06.2024	06.2023
Turnover	1.47 %	0 %
Capex	2.34 %	0 %
Opex	1.91 %	0 %
Taxonomy-alignment of investments excluding sovereign bonds	06.2024	06.2023
Turnover	2.51 %	0 %
Capex	4 %	0 %
Opex	3.26 %	0 %

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 9.89%.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 12.21 %.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Under «#2 Other» investments which were included were Cash, share of non-Sustainable Investments of Targets Funds, or Derivatives (calculation was based on a look-through approach). Derivatives were used for efficient portfolio management (including risk hedging) and/or investment purposes, and Target Funds to benefit from a specific strategy. There were no minimum environmental or social safeguards applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To ensure that the Mandate fulfils its environmental and social characteristics, the binding elements were defined as assessment criteria. The adherence to binding elements was measured with the help of sustainability indicators. For each sustainability indicator, a methodology, based on different data sources, has been set up to ensure accurate measurement and reporting of the indicators. To provide for actual underlying data, the Sustainable Minimum Exclusion list was updated at least twice per year by the Sustainability Team and based on external data sources.

Technical control mechanisms have been introduced for monitoring the adherence to the binding elements in pre- and post-trade compliance systems. These mechanisms served to guarantee constant compliance with the environmental and/or social characteristics of the Mandate. In case of identified breaches, corresponding measures were performed to address the breaches. Example of such measures are disposal of securities which are not in line with the exclusion criteria or engagement with the issuers (in case of direct investments in companies). These mechanisms are an integral part of the PAI consideration process.

In addition, AllianzGI engages with investee companies. The engagement activities were performed only in relation to direct investments. It is not guaranteed that the engagement conducted includes issuers held by every fund. The Investment Manager's engagement strategy rests on 2 pillars: (1) riskbased approach and (2) thematic approach.

The risk-based approach focuses on the material ESG risks identified. Engagements are closely related to the size of exposure. Significant votes against company management at past general meetings, controversies connected to sustainability or governance and other sustainability issues are in the focus of the engagement with investee companies

The thematic approach focuses on one of the three AllianzGI's strategic sustainability themes- climate change, planetary boundaries, and inclusive capitalism- or to governance themes within specific markets. Thematic engagements were identified based on topics deemed important for portfolio investments and were prioritized based on the size of AllianzGI's holdings and considering the priorities of clients.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

Reference benchmarks are indexes to

measure

whether the financial product attains the environmental or social characteristics that they promote.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Legal entity identifier:

Onemarkets Pictet Global Opportunities Allocation Fund

529900HXPLSW0P5FXM28

### Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in

Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?				
Yes	• × No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 43.76% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments			

Note: Pictet Asset Management used a proprietary framework to define sustainable investments. Sustainable investments were calculated on a pass/fail basis including labelled bonds, general bonds from countries that reduced CO2 emissions or implemented policies that led to meaningful improvement in reducing CO2 emissions, and securities from issuers with at least 20% combined exposure (as measured by revenue, EBIT, enterprise value or similar metrics) to economic activities that contributed to environmental or social objectives.

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics of this fund included:

#### Best-in-class:

The fund invested in securities of issuers with low sustainability risks while avoiding those with high sustainability risks, reducing the investment universe by at least 20%.

No reference index has been designated for the purpose of attaining the environmental or social characteristics promoted by the fund.

#### Norms- and values-based exclusions:

The fund excluded issuers that have significant activities with adverse impacts on society or the environment or are in severe breach of international norms.

#### Active ownership:

The fund methodically exercised its voting rights and engaged with the management of companies on material ESG issues. The proxy voting and engagement process were mainly led by investment professionals across several investment teams at Pictet Asset Management, with the support of a central ESG team.

#### How did the sustainability indicators perform?

Over the reporting period the sustainability indicators performed as follows:

 Exposure to companies that derive a significant proportion of revenue, EBIT, enterprise value or similar metrics from economic activities that contribute to environmental or social objectives, and labelled bonds where relevant to the asset class (sustainable investments):

43.76%

• Exposure to revenues from economic activities that contribute to environmental objectives (EU taxonomy-aligned investments):

0.46%

#### Reduction of the investment universe based on ESG factors

The fund reduced its investment universe by removing at least 20% of issuers with the highest sustainability risks and/or principle adverse impacts on society or the environment.

Sustainability risks are ESG related risk or conditions that could cause a material negative impact on the value of investments if they were to occur. Sustainability risks included but were not limited to the following: climate transition risk, climate physical risk, environmental risk, social risk, governance risk. Periodic reviews and risk controls are in place to monitor implementation.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are negative, material, or likely to be material effects on sustainability factors that are caused, compounded by, or directly linked to investment decisions and advices.

Such principle adverse impacts included among others, GHG emissions, air pollution, biodiversity loss, emissions to water, hazardous/ radioactive waste, social & employee matters and corruption & bribery.

#### Principle Adverse Impact (PAI)

The fund considered principal adverse impacts (PAIs) on sustainability factors mainly through the exclusion of issuers associated with controversial conduct or activities. Exclusions allowed the fund to remove economic activities and behaviours towards international norms that have high adverse impacts on society or the environment. How exclusions map to PAIs and their related indicators is set out in Pictet Asset Management's Responsible Investment policy.

In line with Pictet Asset Management's exclusion policy outlined in the firm's Responsible Investment policy (see table above for excluded activities and applied exclusion thresholds), the fund did not have any exposure to companies that derived a significant portion of their revenue from activities detrimental to society or the environment:

Controversial activities (weighted-average company revenues, in %)\*:

	Fund(%)
Fossil fuels and nuclear energy	0.17
Weapons	0.06
Other controversial activities	0.03
Not applicable:	34.51
Not covered:	0.41

\*Fossil fuels and nuclear energy include thermal coal extraction and power generation, oil & gas production and extraction, shale energy extraction, off-shore arctic oil & gas exploration, and nuclear power generation. Weapons include military contracting (weapon and weapon related services), and small arms (civilian customers (assault/ non-assault weapons, military law enforcement, key components). Other controversial activities include tobacco production, adult entertainment production, gambling operation, GMS development or growth, pesticides production or retail. Exposures are based on third-party data and may not reflect our internal view. Pictet Asset Management retains full discretion over the implementation of exclusion criteria and reserves the right to deviate from third-party information on a case-by-case basis in instances where it is deemed incorrect or incomplete.

Source: Pictet Asset Management, Sustainalytics.

In addition, the fund excluded issuers that had exposure to:

- (i) PAI 10: Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.
- (ii) PAI 14: Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons).

#### Voting rights

During the reference period, the fund voted at 161 general assembly meetings out of 167 votable meetings (96.41%). We voted "against" (incl. "abstained" or "withhold") at least one resolution at 31.14% of meetings.

Out of 2298 management resolutions, we voted against management on 48 items (2.09%) and abstained on 9 items (0.39%).

We supported 68 (60.71%) shareholder resolutions out of 112 proposals.

In respect to Environmental and/or Social issues we voted for 15 out of 15 management resolutions and for 40 out of 66 shareholder resolutions.

Source: Pictet Asset Management, ISS ESG.

Data provided have not been verified by an external auditor or reviewed by an independent thirdparty.

#### ...and compared to previous periods?

The fund was launched at the end of the previous reference period. Therefore, historical comparison is not available.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Pictet Asset Management used a proprietary reference frameworks as well as the objectives of the EU Taxonomy to define sustainable investments.

The fund invested in securities financing economic activities that substantially contributed to environmental and/or social objectives such as:

Environmental: Such investments represented 14.57%.

- De-carbonisation
- Efficiency & Circularity
- Natural Capital Management

Social: Such investments represented 29.19%.

- Healthy Life
- Water, Sanitation & Housing
- Education & Economic Empowerment
- Security & Connectivity

Note that the Sustainable Investment framework has been updated during 2024.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To prevent sustainable investments from causing significant harm to any other environmental or social objective, the fund applied the following screening criteria on a best effort basis:

(i) Exclusions of issuers that have significant activities with adverse impacts on society or the environment.

(ii) Issuers associated with high and severe controversies were not counted as Sustainable Investments. Information were obtained from third-part providers and/or internal research. ESG information from third-party data providers may have been incomplete, inaccurate or unavailable. As a result, there was a risk that the Investment Manager may incorrectly assessed a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the fund. Incomplete, inaccurate or unavailable ESG data may also acted as a methodological limitation to a non-financial investment strategy (such as the application of ESG criteria or similar). Where identified, the Investment Manager sought to mitigate this risk through its own assessment. In the event that the ESG characteristics of a security held by the fund changed, resulting in the security being sold, the Investment Manager does not accept liability in relation to such change.

How were the indicators for adverse impacts on sustainability factors taken into account?

The fund monitored all mandatory and two voluntary Principal Adverse Impact indicators where we have robust data available. The quality of available data is expected to improve over time.

The fund considered and, where possible, mitigated principal adverse impacts of its investments on society and the environment that were deemed material to the investment strategy through a combination of portfolio management decisions, exclusion of issuers associated with controversial conduct or activities, and active ownership activities.

Exclusions allowed the fund to remove economic activities and behaviours towards international norms that have high adverse impacts on society or the environment.

Active ownership activities aimed at positively influencing the issuer's ESG performance and to protect or enhance the value of investments. Engagement was conducted by the investment team either independently or as part of a Pictet-level initiative, or was conducted by a third party.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund excluded issuers that were subject to high or severe controversies in areas such as human rights, labour standards, environmental protection and anti-corruption, or in breach of UN Global Compact Principles or OECD Guidelines for Multinational Enterprises.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

# How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The fund considered and, where possible, mitigated adverse impacts that were deemed material to the investment strategy. Such adverse impacts included but were not limited to GHG emissions, air pollution, biodiversity loss, emissions to water, hazardous/radioactive waste, social and employee matters and corruption and bribery and were addressed through a combination of:

#### (i) portfolio management decisions

The investment team scored holdings according to an assessment of Environmental, Social & Governance risks as part of the fund's scoring framework. Scores are determined on a qualitative basis by the investment managers, informed by fundamental research and quantitative ESG data – including data on Principle Adverse Impact, ESG data provided by the companies and data provided by third-party ESG data providers. The investment team's scoring process was a key component of the compartment's portfolio construction process, determining target weights in the portfolio.

#### (ii) proxy voting

The fund followed Pictet Asset Management's voting guidelines which are designed to support a strong culture of corporate governance, effective management of environmental and social issues and comprehensive reporting according to credible standards. These guidelines also seek to support recognized global governing bodies promoting sustainable business practices advocating for stewardship of environment, fair labour practices, non-discrimination, and the protection of human rights. All voting activities of the fund were logged and can be shared upon request.

#### (iii) engagement

Interaction with issuers took the form of one-to-one discussions, shareholder/bondholder meetings, investor roadshows and/or conference calls. The objectives of these interactions were to assess an organisation, monitor that their strategy was implemented in line with our expectations and ensure that issuers were on track to meet their goals and objectives.

Where appropriate, we engaged issuers on material ESG issues such as GHG reduction targets, governance improvements and on a range of environmental, social or governance controversies, to satisfy ourselves that they fully understood and addressed them effectively over the short, medium and long term. Our engagement activities included a combination of targeted in-house-led discussions, collaborative institutional investor initiatives, and third-party engagement services.

The proxy voting and engagement process were mainly led by investment professionals across several investment teams in Pictet Asset Management, with the support of a central ESG team.

(iv) exclusion of issuers associated with controversial conduct or activities

The fund did not have any exposure to (i) companies that derived a significant portion of their revenue from activities detrimental to society or the environment as defined in Pictet Asset Management's responsible investment policy and/or (ii) companies that severely violated the UN Global Compact principles on human rights, labour standards, environmental protection and anti-corruption and controversial weapons.

#### What were the top investments of this financial product?

The figures here below are calculated on an average basis for the last quarter ends of the financial year of the Sub-Fund.

#### Asset allocation

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01.07.2023 – 30.06.2024

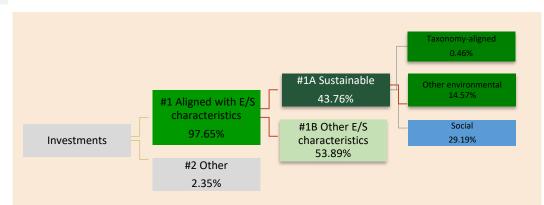

What was the proportion of sustainability-related investments?

43.76%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The fund was 97.65% aligned with E/S characteristics (#1 Aligned with E/S characteristics) and had 2.35% invested in Other (#2 Other).43.76% were allocated to Sustainable Investments (#1A Sustainable Investments) and the remainder was invested in investments aligned with other environmental and/or social characteristics (#1B Other E/S characteristics).

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### Notes:

- Pictet Asset Management used a proprietary framework to define sustainable investments. "#1A Sustainable", "Other Environmental" and "Social" investments were calculated on a pass/fail basis including labelled bonds, general bonds from countries that reduced CO2 emissions or implemented policies that led to meaningful improvement in reducing CO emissions, and securities from issuers with at least 20% combined exposure (as measured by revenue, EBIT, enterprise value or similar metrics) to economic activities that contributed to environmental or social objectives.
- EU taxonomy-aligned investments were calculated on a revenue-weighted basis (ie security weights are multiplied by the proportion of revenues from economic activities that contribute to relevant environmental objectives) and cannot be consolidated with other numbers following a pass/fail approach. Given that Pictet Asset Management's proprietary framework to define sustainable investments requires a corporate issuer to have at least 20% combined exposure (as measured by revenue, EBIT, enterprise value or similar metrics) to economic activities that contributed to environmental or social objectives, not all issuers with reported EU taxonomy alignment are automatically considered as sustainable investments.

Source: Pictet Asset Management, GICS/MSCI. Exposure data are expressed as a quarterly weighted average.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund made investments in economic activities that contributed to the environmental objectives as set out in the Article 9 of Regulation (EU) 2020/852.

EU taxonomy-aligned investments were calculated on a revenue-weighted basis (ie security weights are multiplied by the proportion of revenues from economic activities that contribute to relevant environmental objectives) and cannot be consolidated with other numbers following a pass/fail approach.

EU Green Taxonomy alignment data were sourced from publicly available reports.

The monitoring procedures have been implemented to verify at all times compliance with Article 3 of the EU taxonomy regulation.

Data provided have not been verified by an external auditor or reviewed by an independent third-party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

	Yes:			
		In fossil gas		In nuclear energy
×	No			

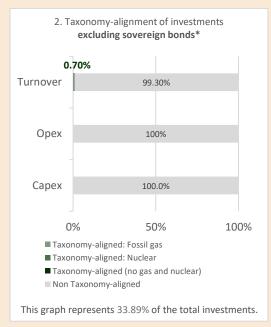

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Note: We use revenues as the key metric for setting target allocation to, and actual alignment with, the EU taxonomy due to limited availability and lack of reliable data for OpEx and CapEX.

Source: Pictet Asset Management, MSCI.

What was the share of investments made in transitional and enabling activities?

The share of investments made in:

- Transitional activities: 0.01%
- Enabling activities: 0.35%.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

14.57%

These Sustainable Investments are not aligned with the EU Taxonomy because their economic activities either (i) are not covered by the EU Taxonomy, or (ii) do not comply with the technical screening criteria to achieve substantial contribution in the sense of the EU Taxonomy.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

#### What was the share of socially sustainable investments?

29.19%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The fund's "other" investments included cash positions primarily held for meeting daily liquidity and risk management purposes as allowed and foreseen by the fund's investment policy. Where relevant, minimum environmental or social safeguards apply to the underlying securities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the attainment of the environmental and/or social characteristics was met by following the investment strategy and adhering to the binding elements.

The fund's binding elements include:

- exclusion of issuers that:
- are involved with nuclear weapons from countries that are not signatories to the Treaty on the Non-Proliferation of Nuclear Weapons (NPT) and other controversial weapons
- derive a significant portion of their revenue from activities detrimental to society or the environment, such as thermal coal extraction and power generation, unconventional oil and gas exploration and production, conventional oil and gas production, nuclear power generation, conventional weapons and small arms, military contracting weapons and weapon-related products and gambling operations, Pictet Asset Management's Responsible Investment policy for further details on exclusion thresholds applicable to the above activities.
- severely violate the UN Global Compact principles on human rights, labour standards, environmental protection and anti-corruption
- ESG criteria analysis of eligible securities that covers at least 90% of net assets or the number of issuers in the portfolio

Furthermore, the fund engaged with 271 companies as of 30.06.2024.

## How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. No reference index has been designated for the purpose of attaining the environmental or social characteristics promoted by the fund.

- How does the reference benchmark differ from a broad market index?
  Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

practices.

does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier:

onemarkets VP Global Flexible Bond Fund 529900RCOUKJJ7AJU273

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
Yes	• × No		
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

## To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics promoted by the fund were met for all target investments at the reporting date except the cash and cash equivalent positions, which have per se no ESG quality.

The onemarkets VP Global Flexible Bond Fund promotes environmental as well as social characteristics, invests only in companies that are characterised by good corporate practices and thus fulfills the criteria of Art. 8 of the EU Disclosure Regulation (2019/2088). The environmental and/or social characteristics aim, in particular, to reduce or entirely prevent the main adverse impacts on sustainability factors. On the basis of sustainability strategies and by taking into account exclusion criteria and minimum ESG rating requirements for companies and sovereigns, it is ensured that the investment universe includes financial instruments that comply with defined environmental and/or social standards.

The Investment Manager has defined extensive exclusion criteria for the fund:

- 1. Companies with serious violations of the UN Global Compact principles in the areas of human rights, labor standards, environmental protection and anticorruption
- 2. for companies that are active in controversial business areas and generate revenues from these activities:
- $\bullet$  Controversial/ banned weapons (production, service and trade) > 0 %.
- $\bullet$  Coal production and extraction and coal-based power generation > 10 %.
- controversial oil extraction and production > 0 %.
- Military equipment (production, service, trade) > 10 %.
- Tobacco (production, service, trade) > 5 %.
- 3. Furthermore, sovereign issuers are excluded that
- are classified as "not free" in terms of political and civil liberties;
- are classified as non-cooperative according to the OECD's Financial Action Task Force (FATF) on Money Laundering;
- have not ratified the Paris Agreement on the occasion of the United Nations Framework Convention on Climate Change of 2015.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

The Sub-Fund invests a minimum of 70% of its net assets in investments that are aligned with the promoted environmental and social characteristics. The share in sustainability-related investments amounted to 95.89% of the total portfolio. The remaining 4.11% consists of cash and cash equivalent. The fund has been launched on 03.07.2023, so there is no reference value for a previous period available.

#### Performance of the sustainability indicators:

 Proportion of investments in securities according to the exclusion criteria:

95,89% (minimum requirement: 70%)

ESG Rating:

57.4

Active breaches during the reporting period:

No acitive breaches

...and compared to previous periods?

The fund has been launched on 03.07.2023, so there is no reference value for a previous period available.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The fund didn't do sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The fund didn't do sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Exclusion of controversial activities.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

— Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The fund didn't do sustainable investments.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager considered the principal adverse impacts of its investment decisions on sustainability factors.

The investable universe was screened with regard to potential controversial activities regarding environmental, social or governance aspects of single issuers. Companies that engage in controversial business practices are excluded from investments. This includes companies that clearly violate one or more of the ten principles of the "United Nations Global Compact" without any prospect of positive change.

# Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

#### What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

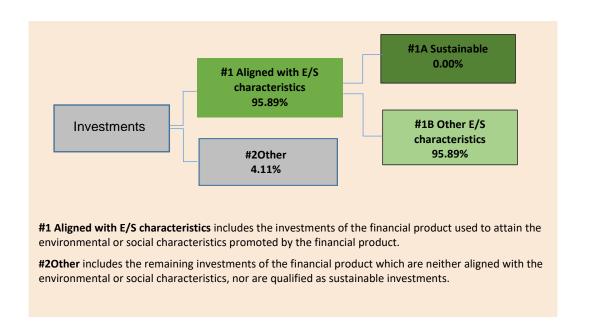

0.00%

What was the asset allocation?

95.89% assets aligned with E/S characteristics

4.11% others (cash and cash equivalent)

Asset allocation describes the share of investments in specific assets.

The fund has been launched on 03.07.2023, so there is no reference value for a previous period available.

#### In which economic sectors were the investments made?

Sector	% of Assets
Banks and other financial institutions	32.61%
Holding and finance companies	16.31%
Communications	7.36%
Utilities	6.21%
Insurance	6.06%
Real Estate companies	4.86%
Transportation	4.28%
Bonds of States, provinces and municipalities	2.31%
Petroleum	1.75%
Pharmaceuticals and cosmetics	1.61%
Electrical engineering and electronics	1.58%
Supranational Organisations	1.28%
Miscellaneous consumer goods	1.07%
Foods and non alcoholic drinks	1.04%
Aeronautic and astronautic industry	1.00%
Road vehicles	0.98%
Machine and apparatus construction	0.81%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- expenditure
  (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee

Office supplies and computing	0.80%
Paper and forest products	0.79%
Electronics and semiconductors	0.78%
Retail trade and department stores	0.78%
Chemicals	0.77%
Graphic art and publishing	0.71%
Internet and Internet services	0.58%
Other	0.32%

Investments in sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels represent 3.46% of the portfolio.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

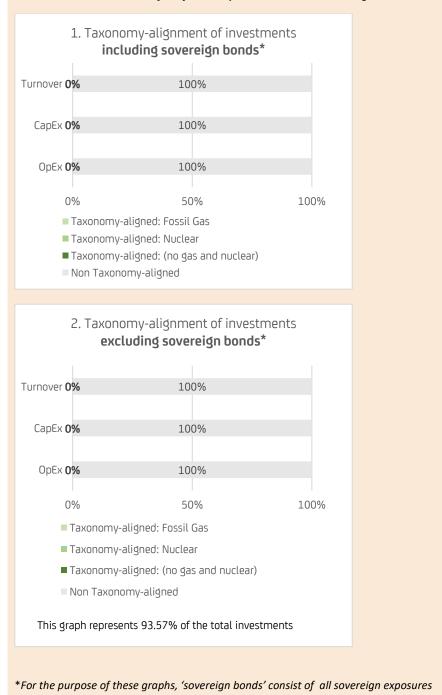

The fund didn't do sustainable investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

	Yes:			
		In fossil gas		In nuclear energ
*	No			

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

Not applicable

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The fund didn't do sustainable investments.

What was the share of socially sustainable investments?

The fund didn't do sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Only cash and cash equivalent were included unter "other". All securities of the portfolio were aligned with E/S characteristics at the reporting date. The cash resulted from coupon payments, maturities and subscriptions and is held for strategic investments. The cash is held on the current account at the depositary. No environmental or social safeguards are applied for the liquidity component.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The investment manager has implemented ongoing monitoring procedures of the investment portfolio with regard to compliance with the defined exclusion criteria and ESG minimum rating requirements for companies and countries. Issuers not compliant with the rules are generally not considered for investments. In the event of negative changes regarding social, environmental or governance aspects in relation to individual issuers, the corresponding securities are sold.

How did this financial product perform compared to the reference benchmark?

Not applicable. The financial product has not designated an index as a reference benchmark for the purpose of attaining the environmental and social characteristics promoted by the Subfund.

- How does the reference benchmark differ from a broad market index?
  Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

How did this financial product perform compared with the reference benchmark?
Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

	How did this financial product perform compared with the broad market index?
	Not applicable.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier:

onemarkets Libra Fund 529900ZINJTNAQYUPR77

## Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?					
Yes	● ○ 🗶 No				
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61.62% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective				
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments				

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund promoted a broad range of environmental and/or social characteristics.

In the **ecological area**, climate protection and the protection of natural ecosystems were important investment principles. Investments in economic

activities that were particularly detrimental to these environmental goals, such as coal extraction and power generation, oil and gas extraction using problematic methods (e.g., fracking), or in particularly sensitive ecosystems (e.g., Arctic oil), were avoided. On the other hand, companies that were working on improving their greenhouse gas footprint and did not endanger biodiversity in their sphere of influence were to be supported. In addition, investments were made in bonds from countries that were committed to climate protection and the preservation of biodiversity. Additional environmental factors to be considered included phasing out nuclear power, avoiding the use of genetically modified organisms in food production, and banning animal testing unless there was a legal need for it.

In the **social sphere**, investments were made to promote democracy, respect human rights, fight corruption, gender equality, and overcome discrimination. This was to be achieved through a catalog of criteria based on the Universal Declaration of Human Rights and the principles of the UN Global Compact. This also included avoiding investments in companies that produced weapons and in countries with particularly high military spending. Additionally, investments in the following controversial business areas were avoided: alcohol, tobacco, pornography, and gambling.

In order to be able to assess the ecological and social characteristics of an investment, the Investment Manager relied on data from the company ISS ESG.

In the past financial year, the investment fund met all the criteria set out in the precontractual information. The required proportion of sustainable investments was exceeded - as stated in the pre-contractual information - with a minimum proportion of 10% of sustainable investments. This includes other ecological investments that do not comply with the EU taxonomy and investments with a social objective. The exclusion criteria defined by Schoellerbank Invest AG were also complied with for all investments.

#### How did the sustainability indicators perform?

The Investment Manager of the Sub-Fund developed a two-step process that collected appropriate measures of investments in order to assess environmental and social characteristics.

The **first step** was a "negative screening" (selection according to exclusion criteria as well as compliance with the UN Global Compact). The Sub-Fund defined the following exclusion criteria, identifying companies and/or countries and/or underlying assets that could not be invested in. First of all, the Sub-Fund defined serious or very serious violations of companies against the principles of the UN Global Compact as exclusion criteria. The framework was strictly based on the 10 Principles of the UN Global Compact in respect of human rights, labor relations, environmental protection, and anti-corruption.

#### **Human Rights**

- support and respect the protection of internationally proclaimed human rights
- make sure that they are not complicit in human rights abuses

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

#### Labour

- uphold the freedom of association and the effective recognition of the right to collective bargaining
- elimination of all forms of forced and compulsory labour
- the effective abolition of child labour
- the elimination of discrimination in respect of employment and occupation

#### **Environment**

- support a precautionary approach to environmental challenges
- undertake initiatives to promote greater environmental responsibility
- encourage the development and diffusion of environmentally friendly technologies

#### **Anti-Corruption**

 work against corruption in all its forms, including extortion and bribery

Regarding companies as issuers, following exclusion criteria applied:

- Companies manufacturing, maintaining, or trading controversial and/or morally unacceptable weapons, as identified through the international obligations, treaties and legislations. For nuclear weapons the exclusion is applicable to all those which derive from nuclear weapons more than 5% of their consolidated revenues.
- Companies involved in thermal coal production and/or production of energy from thermal coal which derive from these businesses more than 2% of their consolidated revenues. It's also requested a mandatory phase out by 2028.
- Companies involved in controversial fuel production and companies that extract hydrocarbons with controversial techniques or in areas with high environmental impact (a de minimis rule can be applied, i.e. companies with a minor involvement are not necessarily excluded, and the internal threshold limit on the Management Company's side will be set at 5%).
- Companies involved in the tobacco business which derive from these businesses more than 5% of their consolidated revenues.
- Companies involved in the nuclear energy production which derive from these businesses more than 5% of their consolidated revenues.
- Companies involved in the weapons business which derive from these businesses more than 5% of their consolidated revenues.
- Companies involved in the gambling business which derive from these businesses more than 5% of their consolidated revenues.

- Companies involved in the adult entertainment business which derive from these businesses more than 5% of their consolidated revenues.
- Companies involved in the production of high-proof alcohol business which derive from these businesses more than 5% of their consolidated revenues.
- Companies involved in the genetically modified organisms business which derive from these businesses more than 5% of their consolidated revenues.
- Companies involved in the animal testing business (unless there is a legal need for it) which derive from these businesses more than 5% of their consolidated revenues.

Regarding countries as issuers, following exclusion criteria applied:

- Bonds issued by Countries that are not compliant with FATF Recommendations (Black and Grey list).
- Bonds issued by Countries that are not signatories of Paris 2015
   Agreement on climate change are excluded.
- Bonds issued by Countries classified with 'partly free or not free'status according to freedom house index
- Bonds issued by Countries that violate democratic principles and fundamental/human rights or/and have a controversy in Human Rights, Labour Rights, Freedom of Speech and Press, Freedom of Association, Discrimination or Child Labour.
- Bonds issued by Countries which apply the death penalty.
- Bonds issued by Countries with high military budgets (more tha 3% of GDP).
- Bonds issued by Countries with inadequate efforts to protect the climate (Climate Change Performance Index (CCPI) < 40).
- Bonds issued by Countries with more than 10% of total primary energy supply and no moratorium on building NP plants and no decision on abandoning NP plants.
- Bonds issued by Countries classified as Non-Ratifier of the Convention on Biological Diversity.
- Bonds issued by Countries in which corruption in the public sector is perceived to be too high (Corruption Perception Index (CPI) of Transparency International e. V. < 50).</li>

In the **second step**, the remaining issuers went through a "positive screening" with regard to their social and environmental standards. Positive criteria were indicators that spoke for an above-average performance of a company or state with regard to the advertised environmental and social characteristics.

First, the taxonomy compliant activities, as defined in Regulation (EU) 2020/852, were collected for all investments.

Second, the Investment Manager identified other environmental and social investments based on its own defined criteria.

A company that met all of the following positive factors in addition to the exclusion criteria was considered to be an investment "with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy".

- Companies and countries with a below-average greenhouse gas emission intensity – PAI 3 from Table 1 for companies or PAI 15 from Table 1 for countries set the total greenhouse gas emissions (tonnes of CO2 equivalent) in relation to sales (companies) or the gross domestic product (countries). This indicator is compared with a reference value, which corresponds to the mean value of the investment universe. If the reference value is not reached, then this criterion is met.
- Companies that initiate initiatives to reduce CO2 emissions in accordance with the Paris Agreement PAI 4 from Table 2 evaluates companies based on the targets set in terms of reducing greenhouse gas emissions in order to achieve climate targets.
- Non-Fossil Fuel Companies PAI 4 from Table 1 relates to the extraction, processing and marketing of fossil fuels and the generation of energy using coal, oil or natural gas.
- Businesses whose operations do not adversely affect areas of vulnerable biodiversity – PAI 7 from Table 1 measures the proportion of businesses located or operating in or near areas of vulnerable biodiversity where the operations of those businesses adversely affect those areas affect.
- Companies and countries with above-average overall performance in climate change mitigation or adaptation – This is assessed by ISS ESG using a proprietary scoring model: The Carbon Risk Rating.

Positive factor	Measurement	% of Corporate compliant	% of Corporate NOT compliant	% of Government compliant	% of Government NOT compliant
Companies and countries with a below-average greenhouse gas emission intensity	Corporate: max. 750 tonnes of CO2 equivalent in relation to sales  Countries: max. 400 tonnes of CO2 equivalent in relation to gross domestic product	45,75	38,14	10,85	0
Companies that initiate initiatives to reduce CO2 emissions in accordance with the Paris Agreement	Investee companies with carbon emission reduction initiatives aimed at aligning with the Paris Agreement	54,67	29,22	n/a	n/a

Non-Fossil Fuel Companies	Investments in companies not active in the fossil fuel sector (Extraction, processing and marketing of fossil fuels and energy production with fossil fuels)	81,31	2,57	n/a	n/a
Businesses whose operations do not adversely affect areas of vulnerable biodiversity	Investments in companies with no sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	83,89	0	n/a	n/a
Companies and countries with above-average overall performance in climate change mitigation or adaptation	Carbon Risk Rating (ISS ESG - Scale from lowest 0 to highest 100)  Corporate: min. Value of 50  Countries: min. Value of 45	61,74	22,15	6,53	4,32

Those companies that do not met all the environmental positive criteria were assessed with regard to social positive criteria: investments "with a social objective". This means that an investment could only be considered ecological or social.

If, in addition to the exclusion criteria, a company also met all of the following criteria and was not already included among the environmental investments, it was designated as a social investment.

- Companies with internal human rights compliance processes PAI
   9 from Table 3.
- Companies that have procedures and mechanisms in place to monitor compliance with the principles of the UN Global Compact and the OECD Guidelines for Multinational Enterprises – PAI 11 from Table 1.
- Companies that have at least one third of their supervisory board occupied by women PAI 13 from Table 1.
- Countries where ISS ESG has assessed that there are no relevant violations of established social norms, as defined by international treaties and conventions, United Nations Principles or, where applicable, national legislation – PAI 16 from Table 1.
- Companies and countries with a positive impact score in achieving the 17 United Nations Sustainable Development Goals – This is assessed by ISS ESG using the SGD Solution Score.

Positive factor	Measurement	% of NAV Corporate compliant	% of NAV Corporate NOT compliant	% of NAV Government compliant	% of NAV Government NOT compliant
Companies with internal human rights compliance processes	Investments in companies that have not been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	83,89	0	n/a	n/a
Companies that have procedures and mechanisms in place to monitor compliance with the principles of the UN Global Compact and the OECD Guidelines for Multinational Enterprises	Investments in companies with policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines	67,82	16,07	n/a	n/a
Companies that have at least one third of their supervisory board occupied by women	Min. 33% female board members in companies	49,02	34,86	n/a	n/a
Countries where ISS ESG has assessed that there are no relevant violations of established social norms, as defined by international treaties and conventions, United Nations Principles or, where applicable, national legislation	Investee countries subject to no social violations referred to international treaties and conventions, United Nations principles and, where applicable, national law	n/a	n/a	10,85	0
Companies and countries with a positive impact score in achieving the 17 United Nations Sustainable Development Goals	SDG Score SDG (ISS ESG - Scale from lowest -10 to highest 10) Corporate: min. Value of 0,2 Countries: min. Value of 0,2	79,30	4,59	10,85	0

Data used for the analysis of companies and countries were obtained from an independent rating agency (ISS ESG). These developments were monitored and documented on an ongoing basis by the risk management unit of Schoellerbank Invest AG. Schoellerbank Invest AG had no influence on the analysis or completeness of data supplied by third-party providers.

The exclusions and positive criteria were subject to constant monitoring. In the past financial year, the investment fund met all the criteria set out in the pre-contractual information. The required proportion of sustainable investments of 10% was exceeded.

#### ...and compared to previous periods?

This year is the first financial year for which the periodic report for the Sub-Fund is provided. A comparison of the sustainability factors for past years is not yet possible.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The above-mentioned ecological and social principles and the sustainability indicators —exclusion criteria and positive criteria — used to measure them, aimed to promote countries and companies that supported ecological and social characteristics through their activities and products. By providing capital, these issuers should have been able to expand their activities.

The sustainable investments underlying this financial product were intended to contribute to the following environmental objectives:

- Climate protection
- Pollution prevention and control
- Protection and restoration of biodiversity and ecosystems

Ecological characteristics were promoted by avoiding investments in economic activities that were particularly harmful to ecological goals. The exclusion of affected companies ensured that support was not provided to companies characterized by environmental awareness violations, the lack of a precautionary approach regarding environmental problems, the failure to develop and prepare environmentally friendly technologies, and companies generating their core revenues in fields harmful to the environment. Environmental characteristics were promoted at the country level by requiring investee countries to be signatories to the UN Biodiversity Convention and the Paris Agreement and by excluding countries that did not make adequate efforts towards climate protection.

Social characteristics were promoted by avoiding investment in economic activities that were particularly harmful to social goals. The exclusion of affected companies promoted and positively impacted the following social characteristics: prohibition of discrimination in the workplace, prohibition of child labor, and prevention of human rights

violations. The exclusion of countries that used the death penalty and countries that continuously violated human rights and the rights pertaining to democracy promoted social characteristics at the country level.

Sustainable Investments meet the DNSH requirements, as defined by applicable law and regulation. The Investment Manager has developed a set of criteria (which, among other things, affect the goal of climate protection, Pollution prevention and control and Protection and restoration of biodiversity and ecosystems) and across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm have not qualified as Sustainable Investments. The overall portfolio performance for the SDG Impact Rating has over 90% positive Sustainable Development Goals Impact.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In the two-step screening process described above, the environmental and social characteristics were determined at the first stage by means of mandatory exclusion criteria that all securities had to comply with. In the second stage, the remaining investment universe was assessed for the performance of environmental and social characteristics using positive criteria.

Compliance with the exclusion criteria and positive criteria, as well as ongoing monitoring of the PAI (Principal Adverse Impact) indicators, were aimed at verifying the suitability of the investments as ecological or sustainable investments. The ongoing monitoring of all exclusion criteria and positive criteria also evaluated whether the investments were detrimental to the sustainable investment objectives, resulting in the immediate disposal of the investment.

For this purpose, the Investment Manager had established internal control systems and processes that monitored investments in terms of the defined criteria.

How were the indicators for adverse impacts on sustainability factors taken into account?

The PAI indicators were reflected in both the exclusion criteria and the positive criteria. The exclusion criteria prohibited any investment in activities that severely violated the principles of the UN Global Compact. Furthermore, investments in controversial weapons were also not permitted (PAI 14 from Table 1).

Within the positive criteria, the following environmental PAI indicators were considered for companies:

- GHG intensity of investee companies (PAI 3 from Table 1)
- Exposure to companies active in the fossil fuel sector (PAI 4 from Table 1)

- Activities negatively affecting biodiversity sensitive areas (PAI 7 from Table 1)
- Investments in companies without carbon emission reduction initiatives (PAI 4 from Table 2)

Within the positive criteria, the following social PAI (Principal Adverse Impact) indicators were observed at companies:

- Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises (PAI 10 from Table 1)
- Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises (PAI 11 from Table 1)
- Board gender diversity (PAI 13 from Table 1)
- Exposure to controversial weapons (PAI 14 from Table
- The following PAI indicators applied to government bonds:
- GHG intensity (PAI 15 from Table 1)
- Investee countries subject to social violations (PAI 16 from Table 1)

The PAIs 1-4 (avoiding investments in coal), PAI 7 (biodiversity), PAIs 10 and 11 (UN Global Compact), PAI 13 (gender diversity), PAI 14 (controversial weapons), PAI 15 (GHG intensity of investee countries) PAI 16 (human rights, social rights), PAI 4 from Table 2 (reduction of greenhouse gas emissions) and PAI 9 from Table 3 (human rights policies) were integrated in the investment process for targeting mitigate measures to principal adverse impacts (PAI) and contributed to the check of sustainable Investments in terms of do not cause significant harm.

Data availability was still low in some areas. For the PAIs Share of non-renewable energy consumption and production (PAI 5), Energy consumption intensity per high impact climate sector (PAI 6), Emissions to water (PAI 8), Hazardous waste and radioactive waste ratio (PAI 9) and Unadjusted gender pay gap (PAI 12), data was available for only a small number of companies. This PAIs were not yet taken into account in the assessment process because the database was still insufficient. As soon as there are adequate data availability, these PAIs will be integrated in a reasonable way.

PAI 17 (Exposure to fossil fuels through real estate assets) and PAI 18 (Exposure to energy-inefficient real estate assets) in Table 1 were not considered due to the absence of real estate investments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of the sustainable investment process, criteria have been defined in order to comply with the following:

- the Universal Declaration of Human Rights,
- the principles of the UN Global Compact,
- the OECD Guidelines for Multinational Enterprises,
- the United Nations Guiding Principles on Business and Human Rights,
- including the fundamental principles and rights from the eight core conventions set out in the International Labor Organization's Declaration on Fundamental Principles and Rights at Work (ILO Core Labor Standards)

The exclusion criteria for companies excluded those that show serious violations of the principles of the UN Global Compact. These included, among others, violations of human rights, violations of labor standards and the right to collective bargaining, as well as discrimination occurring in the company's sphere of activity.

In addition, shares and bonds were only considered sustainable investments by companies that have procedures and mechanisms in place to monitor compliance with the principles of the UN Global Compact and the OECD Guidelines for Multinational Enterprises (PAI indicator 11 in table 1) and that have implemented internal processes and controls to ensure compliance with human rights (PAI indicator 9 in table 3).

Under the exclusion criteria for sovereigns, bonds were not purchased from countries that do not respect human rights and fundamental freedoms (freedom of expression, freedom of religion, freedom of assembly, right to a fair trial etc.), tolerate child labor and forced labor, or enforce the death penalty. States in which discrimination against people on the basis of their gender, ethnicity, religion, sexual orientation, religion or disability was widespread or in which too little effort was made to achieve gender equality were also excluded. Furthermore, sovereign bonds were only considered sustainable if they do not violate social provisions in accordance with international treaties and conventions, United

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did this financial product consider principal adverse impacts on sustainability factors?

As part of the sustainable investment process, the principal adverse impacts (PAIs) on sustainability factors were considered. The principal adverse impacts were assessed using the selection process already detailed described in this report, while adhering to the exclusion criteria and observing the positive criteria for all investments.

#### Description of the principal adverse impacts on sustainability factors

Indicators applicable to investments in investee companies

#### What was the proportion of sustainability-related investments?

The Sub-Fund invested 61.62% of its assets in sustainable investments. Of the sustainable investments the Sub-Fund invested in 0% were aligned with the EUTaxonomy 43.17% of sustainable investments are considered as other environmentally sustainable investments and 18.45% are considered as social sustainable. 94.74% of investments of the Sub-Fund are used to attain the promote characteristic of the Sub-Fund during the reference period and do not qualify as sustainable investments. 5.26% of investments constitute the remainder and are neither sustainable investments nor used to attain the characteristics promoted by the Sub-Fund.

Asset allocation describes the share of investments in specific assets.

#### What was the asset allocation?

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Sector	% of Assets
Banks and other financial institutions	17.73%
Bonds of States, provinces and municipalities	10.77%
Supranational Organisations	9.78%
Communications	8.45%
Holding and finance companies	6.03%
Internet and Internet services	5.41%
Pharmaceuticals and cosmetics	5.36%
Retail trade and department stores	3.57%
Electronics and semiconductors	3.53%
Foods and non alcoholic drinks	3.51%
Machine and apparatus construction	3.16%
Utilities	2.85%
Biotechnology	2.46%
Healthcare and social services	2.28%
Miscellaneous consumer goods	1.82%
Office supplies and computing	1.76%
Graphic art and publishing	1.53%
Miscellaneous services	1.49%

Insurance	1.28%
Transportation	1.15%
Precious metals and stones	1.14%
Electrical engineering and electronics	1.11%
Building materials and trade	0.47%

Due to data availability, we cannot rule out the possibility, that the fund had small exposure to sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels as defined in Article 54, of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The share of investments of the Sub-Fund aligned with the EU Taxonomy is 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

Yes	5:	
	In fossII gas	In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

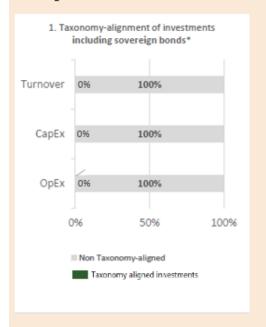

performance.

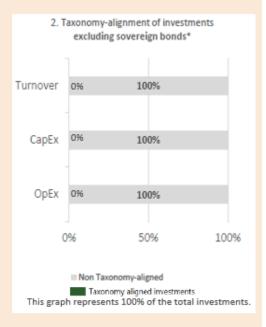

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure
  (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

- What was the share of investments made in transitional and enabling activities?
  Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The financial product invested in economic activities that were not Taxonomy-aligned, because the fund had no Taxonomy commitment, due to data availability. At the end of the reference period the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 43.17%.

#### What was the share of socially sustainable investments?

At the end of the reference period the share of sustainable investments with a social objective was 18.45%.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

All securities in the Sub-Fund's portfolio were in accordance with the exclusion criteria referred to above. Only such securities were reported under "#1 Aligned with E/S characteristics". As part of the investment strategy, a portion of the assets may be held in cash. Cash deposits were categorized under "#2 Other". The cash desposits were held due to the good interest rates and liquidity management in order to make new investments at any time. The bank managing the cash deposits adheres to minimum environmental and social safeguards

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager has implemented internal quality controls to ensure compliance with the environmental and social characteristics promoted by the Sub-Fund. Detailed monthly reporting is provided for the environmental and/or social characteristics and sustainable investments (environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy and social objective).

At the launch of the fund on January 29, 2024, investments were only made in securities that met the sustainable investment approach as described. The proportion of sustainable investments increased from 58.06% to 61.62% during the reporting period. This is mainly due to the new equity investments, e.g. in Adobe, Prysmian, AbbVie, which are classified as sustainable investments.

The Investment Manager regularly reviews the two-step process that collectes appropriate measures of investments in order to assess environmental and social characteristics.

#### How did this financial product perform compared to the reference benchmark?

There was no specific benchmark defined to assess the alignment with the promoted characteristics.

- How does the reference benchmark differ from a broad market index?
  Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

Reference benchmarks are

indexes to

measure
whether the
financial
product attains
the
environmental
or social
characteristics
that they
promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

The **EU Taxonomy** is a classification

#### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
Yes	● ○ 🗶 No		
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 45.74% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but <b>did not</b> make any sustainable investments		

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The following table lists the environmental and social characteristics which were promoted by the Fund throughout the reference period. Further information on these environmental and social characteristics is outlined in the Fund's prospectus. Please refer to the section below, "How did the sustainability indicators perform?", which provides information about the extent that the Fund met such environmental and social characteristics.

#### Environmental and social characteristics promoted by the Fund

Maintain that the Fund holds at least 20% in Sustainable Investments. Apply the BlackRock EMEA Baseline Screens and exclusionary screens.

Limit investments in companies within the Global Industry Classification Standard (GICS) Integrated Oil & Gas sector to below 5% of its total assets. Additionally, the Sub-Fund will apply specific exclusion criteria defined identifying Companies and/or Countries and/or underlying which should not be invested in or which should be invested in respecting predefined thresholds.

- 1. Companies that are involved in severe violations of the UN Global Compact
- 2. Companies manufacturing, maintaining, or trading controversial and/or morally unacceptable weapons, as identified through the international obligations, treaties and legislations.
- 3. Companies involved in thermal coal production and/or production of energy from thermal coal which derive from these businesses more than 10% of their consolidated revenues. It's also requested a mandatory phase out by 2028.
- 4. Companies involved in controversial fuel production and companies that extract hydrocarbons with controversial techniques or in areas with high environmental impact.
- 5. Companies involved in the tobacco business which derive from these businesses more than 5% of their consolidated revenues.
- 6. Companies involved in the nuclear energy production which derive from these businesses more than 15% of their consolidated revenues.
- 7. Companies involved in the weapons business which derive from these businesses more than 10% of their consolidated revenues.
- 8. Companies involved in the gambling business which derive from these businesses more than 15% of their consolidated revenues.
- 9. Companies involved in the adult entertainment business which derive from these businesses more than 15% of their consolidated revenues.
- 10. Bonds issued by Countries that are not compliant with FATF Recommendations (Black and Grey list)
- 11. Bonds issued by Countries that are not signatories of Paris 2015 Agreement on climate change are excluded.
- 12. Bonds issued by Countries classified with 'not free'- status according to freedom house index

#### How did the sustainability indicators perform?

The following table provides information about the performance of the sustainability indicators used to measure the attainment of each of the environmental and social characteristics promoted by the Fund, as further detailed in the Fund's prospectus:

Sustainability Indicator	Metric	Performance for the reference period
Investments in Sustainable Investments according to article 2(17) SFDR	Minimum proportion of 20%	The Fund achieved a 45.74% proportion of Sustainable Investments
Investments in securities that promote environmental characteristics including but not limited to "green bonds" (as defined by the Investment Manager's	Proportion of investments that promote environmental characteristics	6.6%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

proprietary methodology, which is guided by the International Capital Markets Association Green Bond Principles), and themes such as clean energy and energy efficiency		
Limit investments in companies within the Global Industry Classification Standard ("GICS") Integrated Oil & Gas sector to below 5% of its total assets		1.75%
Exclusion of issuers based on exclusionary criteria as defined in table above "Environmental and social characteristics promoted by the Fund"	# of active breaches reported	No active breaches

#### ...and compared to previous periods?

As this is the first reference period, no comparatives are presented.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

This Fund invested at least 20% of its holdings in Sustainable Investments in pursuit of its investment objective. All Sustainable Investments were assessed by the Investment Manager to comply with the Investment Manager's DNSH standard outlined below.

#### Environmental and Social objectives:

The Investment Manager invested in Sustainable Investments which contributed to a range of environmental and / or social objectives which may include but are not limited to, alternative and renewable energy, energy efficiency, pollution prevention or mitigation, reuse and recycling, health, nutrition, sanitation and education and the UN Sustainable Development Goals ("Environmental and Social Objectives").

#### Economic Activity Assessment:

An investment was assessed as contributing to an Environmental and/or Social Objective where:

- i. a minimum proportion of the issuer's business activity contributed to an Environmental and/or Social Objective; or
- ii. the issuer's business practices contributed to an Environmental and/or Social Objective; or
- iii. the use of proceeds was assessed as contributing to an Environmental and/or Social Objective such as green bonds, social bonds, and sustainability bonds; or
- iv. the fixed income securities were aligned with an Environmental and/or Social Objective.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable Investments meet the do no significant harm ("DNSH") requirements, as defined by applicable law and regulation.

The Investment Manager has developed a set of criteria across all Sustainable Investments to assess whether an issuer or investment does significant harm. Investments considered to be causing significant harm have not qualified as Sustainable Investments.

For bonds qualifying as green bonds, the assessment was conducted at an issuance level based on the use of the proceeds of the bonds which must be formally and exclusively applied to promote climate or other environmental sustainability purposes. In addition, certain minimum safeguards and eligibility exclusions were incorporated in the selection of green bonds to avoid exposure to bonds associated with activities deemed to have highly negative environmental and societal impacts.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for principal adverse impacts ("PAIs") on sustainability factors for each type of investment were assessed using BlackRock's Sustainable Investments proprietary methodology. All relevant mandatory PAI indicators included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288 were considered. BlackRock makes use of fundamental analysis and/or third-party data sources to identify investments which negatively impact sustainability factors and cause significant harm. Please refer to the section below, "How did this financial product consider principal adverse impacts on sustainability factors?", which describes how the Fund considered PAIs on sustainability factors.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable Investments were assessed to consider any detrimental impacts and ensure compliance with international standards of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, including the principles and rights set out in the eight fundamental conventions identified in the Declaration of the International Labour Organisation on Fundamental Principles and Rights at Work and the International Bill of Human Rights. Issuers deemed to have violated these conventions are not considered as Sustainable Investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides information about the impact of the principal adverse sustainability indicators taken into consideration by this Fund. The Fund considered the impact of the principal adverse sustainability indicators through the promotion of environmental and social characteristics ("**E&S Criteria**") set out above (refer to section "To what extent were the environmental and/or social characteristics promoted by this financial product met?"). The Investment Manager has determined that these PAIs have been considered as part of the investment selection criteria. The Fund's specific sustainability indicators may not align with the full scope of the regulatory definition of the corresponding PAI outined in Annex 1 supplementing Regulation (EU) 2019/2088 Regulatory Technical Standards ("RTS").

Adverse Sustainability Indicator	Sustainability Indicator
Greenhouse gas (GHG) Emissions	Investments in securities that promote environmental characteristics including but not limited to "green bonds" (as defined by the Investment Manager's proprietary methodology, which is guided by the International Capital Markets Association Green Bond Principles), and themes such as clean energy and energy efficiency
GHG intensity of investee companies	Investments in securities that promote environmental characteristics including but not limited to "green bonds" (as defined by the Investment Manager's proprietary methodology, which is guided by the International Capital Markets Association Green Bond Principles), and themes such as clean energy and energy efficiency
Share of investments in companies active in the fossil fuel sector	Exclusion of companies involved in thermal coal production and/or production of energy from thermal coal which derive from these businesses more than 10% of their consolidated revenues and companies involved in controversial fuel production and companies that extract hydrocarbons with controversial techniques or in areas with high environmental impact.

Share of investments in investee companies that have been negatively involved in violations of the UNGC principles or OECD Guidelines for Mulitnational Enterprises	Exclusion of issuers which have been deemed to have failed to comply with United Nations Global Compact Principles
Share of investments in investee companies involved in the manufacture or selling of controversial weapons	Exclusion of issuers which are manufacturing, maintaining, or trading controversial and/or morally unacceptable weapons, as identified through the international obligations, treaties and legislations

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 29.01.2024 – 30.06.2024

#### What were the top investments of this financial product?

The figures here below are calculated on an average basis for the last quarter ends of the financial year of the Sub-Fund.

Asset allocation describes the share of investments in specific assets.

#### What was the proportion of sustainability-related investments?

The Sub-Fund invested 45.74% into sustainable investments.

#### What was the asset allocation?

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

The following table details the economic sectors that the Fund was exposed to during the reference period.

Sector	Sub-sector	% of
Sector	Sub-sector	investments
Government Related Securities	Government Relates Secutiries	29.8%
Financials	Financial Services	6.5%
Information Technology	Semiconductors & Semiconductor Equipment	6.4%

Energy	Oil & Gas Exploration & Production	0.1%
Energy	Coal & Consumable Fuels	0.0%
Energy	Oil & Gas Drilling	0.0%

The economic sector groupings have been applied based on the Portfolio type.

For Equity portfolios, the Global Industry Classification System ("GICS") has been used. GICS Level 1 has been used to report "Sector", and GICS Level 2, or Level 4 in the case of Energy sectors (to provide additional granularity) has been used to report "Sub-Sector".

For Fixed Income portfolios, the Barclays Industry Classification System ("Barclays") has been used. For issuers that have 'Corporate' as Level 1 Sector, Level 3 and Level 4 have been used for reporting "Sector" and "Sub-Sector", respectively. For all other issuers, Level 1 and Level 2 have been used for reporting. A Sub-Sector may be blank where the classification system does not provide further breakdown. Any exposure to energy sectors is displayed and broken down to the most granular level available within the classification system. Please note that sector table values may not total 100% due to the exclusion of cash and cash equivalents and non-Energy Sector/Sub Sector values less than 1%.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

		al product invest olying with the EU	•	_	or nuclear energy related
	Yes:				
		In fossil gas			In nuclear energy
×	No				

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-aligned: (no gas and nuclear)

Non Taxonomy-aligned

This graph represents 100% of the total investments

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period, 0% of the Fund's investments were made in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

As this is the first reference period for this Fund, no comparatives are presented.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

For the reference period, 38.49% of the Fund's investments were classified as Sustainable Investments with an environmental objective not aligned with the EU taxonomy.

The Fund invested in Sustainable Investments that were not aligned with the EU Taxonomy for the following reasons: (i) they were part of the investment strategy of the Fund; (ii) data to determine EU Taxonomy-alignment was unavailable; and/or (iii) underlying economic activities were not eligible under the EU Taxonomy's available technical screening criteria or did not comply with all requirements set out in such technical screening criteria.

#### What was the share of socially sustainable investments?

For the reference period, 7.25% of the Fund's investments were classified as socially sustainable investments.

## What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "#2 Other" included derivatives, cash and near cash instruments, fixed income transferable securities (also known as debt securities) issued by governments and agencies worldwide however such holdings did not exceed 30%. Such investments were used only for investment purposes in pursuit of the Fund's (non-ESG) investment objective, for the purposes of liquidity management and/or hedging. No other investments held by the Fund were assessed against minimum environmental or social safeguards.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Manager has implemented internal quality controls such as compliance rule coding to ensure compliance with the environmental and social characteristics promoted by the Fund.

Where issuers are identified as potentially having issues with regards to good governance, the issuers are reviewed to ensure that, where the Investment Manager agrees with this external assessment, the Investment Manager is satisfied that the issuer has either taken remediation actions or will take remedial actions within a reasonable time frame based on the Investment Manager's direct engagement with the issuer.

The Investment Manager may also decide to reduce exposure to such issuers.

#### How did this financial product perform compared to the reference benchmark?

For the reference period, an index has not been designated as a reference benchmark for the purpose of attaining the environmental or social Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. characteristics promoted by the Fund, therefore this section is not applicable.

- How does the reference benchmark differ from a broad market index?
  Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

#### ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially.

practices.

economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: Legal entity identifier:

onemarkets Fidelity European Heritage Equity Fund 5299001R0QY3MW10VU95

#### Environmental and/or social characteristics

Did this financial product have a sustai	nable investment objective?
Yes	• No
investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 55.9% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The mandate met the environmental and social characteristics it promoted as defined in the SFDR precontractual disclosure for the period. The mandate promoted environmental and social characteristics by investing in securities of issuers with favoura ble ESG characteristics. Favourable ESG characteristics were determined

Sustainability indicators measure how the environmental or social characteristics promoted by the

financial product

are attained.

by reference to ESG ratings. ESG ratings considered environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well a s social characteristics including product safety, supply chain, health and safety and human rights. No reference benchmark was designated for the purpose of attaining the environmental and social characteristics promoted.

Where the mandate invested in sustainable investments with social objectives, this contributed towards the socially focused SDG objectives as explained in the answer on the objectives of the sustainable investments below. The mandate was launched in January 2024. The following data is a quarterly average of the following month end dates: March 31st 2024, June 30th 2024.

#### How did the sustainability indicators perform?

The performance of the sustainability indicators the sub-fund used to measure the attainment of the environmental or social characteristics that it promoted were:

i)88.04 % of the subfund was invested in securities of issuers with favourable ESG characteristics in accordance with Fidelity's Sustainable Investing Framework;

- ii) in respect of its direct investments, 0% of the sub-fund was invested in securities of issuers with exposure to the Exclusions (as defined below);
- iii) 55.9 % of the sub-fund was invested in sustainable investments; and
- iv) 20.57% of the sub-fund invested in sustainable investments with a social objective. The sustainability indicators of the sub-fund were not subject to an assurance by auditors or a review by third parties.

The sustainability indicators of the mandate were not subject to an assurance by auditors or a review by third parties.

#### ...and compared to previous periods?

Not applicable. First reporting period.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

While it did not have as its objective a sustainable investment, it had a proportion of 55.9 % of sustainable investments. The sustainable investments had an environmental and social objective. The fund determined a sustainable investment as follows:

(a) issuers that undertake economic activities that contribute to one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU

Taxonomy. This contributed towards the climate change mitigation environmental EU Taxonomy objective; or

- (b) issuers whereby the majority of their business activities (more than 50% of revenue) contributed to environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or
- (c) issuers which set a decarbonisation target consistent with a 1.5 degree warming scenario or lower (verified by the Science Based Target Initiative or a Fidelity Proprietary Climate Rating which was considered to contribute to environmental objectives; provided they do no significant harm, meet minimum safeguards and good governance criteria.

The SDGs are a series of goals published by the United Nations which recognise that endina hand-inpoverty and other deprivations must qo hand improvements in health and education, economic with growth, and a reduction in inequalities, all while tackling climate change and working to preserve the planet's oceans and forests. For further details see the UN website.

Environmental focused SDGs include clean water and sanitation; affordable and clean energy; responsible consumption and production; and climate action. Social focused SDGs include no poverty; zero hunger; economic growth and productive employment; industry, innovation and infrastructure; safe and sustainable cities and communities.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments were screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer met minimum safeguards and standard that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This Included: Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screens (as set out below); Activity-based screens the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that were considered to have a 'Very Severe' controversy using controversy screens, covering 1) environmental issues, 2) human rights and communities, 3) labour rights and supply chain, 4) customers, 5) governance; and PAI indicators - quantitative data (where available) on PAI indicators were used to evaluate whether an issuer was involved in activities that cause significant harm to any environmental or social obiective.

How were the indicators for adverse impacts on sustainability factors taken into account?

For sustainable investments, as set out above, Fidelity undertook a quantitative evaluation to identify issuers with challenging performance on PAI indicators, all mandatory and any relevant indicators for adverse impacts on sustainability factors as set out in Annex 1 of the EU SFDR Regulatory Technical Standards were taken into account (where data was available).

Issuers with a low overall score were ineligible to be 'sustainable investments' unless Fidelity's fundamental research determined that the issuer was not breaching "do no significant harm" requirements or was on the path to mitigate the adverse impacts through effective management or transition.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens were applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, UN Global Compact (UNGC), ILO Standards International Labour Organisation (ILO) Conventions, were not considered sustainable investments.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts on sustainability factors were considered through and incorporated into investment decisions through a variety of tools, including:

- (i) Due Diligence analysis of whether principal adverse impacts were material and negative.
- (ii) ESG rating Fidelity references ESG ratings which incorporate material principal adverse impacts such as carbon emissions, employee safety and bribery

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

and corruption, water management. For sovereign issued securities, principal adverse impacts were considered through and incorporated into investment decisions using ratings which incorporate material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

- (iii) Exclusions We adopted a principals-based approach to ESG matters and as part of this we place companies which we regard as unsuitable investments on an Exclusion List, including but not limited to the following; a firm-wide exclusions list, that includes biological weapons, chemical weapons, the use of stock piling, production and transfer of anti-personnel mines, the treaty of non-proliferation of nuclear weapons and guidance from the UN, World Bank and other global authorities upholding ESG principals.
- (iv) Engagement Fidelity used engagement as a tool to better understand principal adverse impacts on sustainability factors and, in some circumstances, advocate for enhancing principal adverse impacts and sustainability metrics. Fidelity participated in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).
- (v) Voting Fidelity's voting policy included explicit minimum standa rds for board gender diversity and engagement with climate change. Fidelity may also vote to enhance issuer performance on other indicators.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability. The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to this website for further information:

https://www.fidelityinternational.com/sustainable-investing-framework/

#### What were the top investments of this financial product?

The figures here below are calculated on an average basis for the last quarter ends of the financial year of the Sub-Fund. This data includes all securities, excluding derivatives.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 16.01.2024 – 30.06.2024

Largest investments	Sector	% Assets	Country
ROCHE HOLDING LTD - DIVIDEND RIGHT CERT	Pharmaceuticals, cosmetics & med. products	4.71%	CHE
L'OREAL SA	Pharmaceuticals, cosmetics & med. products	3.37%	FRA
LVMH MOET HENNESSY LOUIS VUITTON SE	Miscellaneous services	2.88%	FRA

ESSILORLUXOTTICA SA	Pharmaceuticals, cosmetics & med. products	2.61%	FRA
INDITEX SHARE FROM SPLIT	Retail trade & department stores	2.56%	ESP
CIE FINANCIERE RICHEMONT NAMEN AKT	Watch & clock industry, jewellery	2.32%	CHE

Asset allocation describes the share of investments in specific assets.

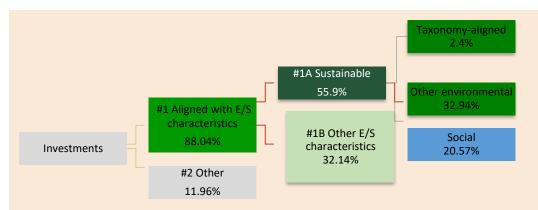

#### What was the proportion of sustainability-related investments?

The mandate invested 55.9 % in sustainable investments.

#### What was the asset allocation?

(#1 aligned with E/S characteristics) The mandate invested in:

- 1. 88.04 % of its assets in securities of issuers with favourable ESG characteristics;
- 2. 55.9 % in sustainable investments (#1A sustainable)\* of which 2.4 % have an environmental objective (which is aligned with the EU Taxonomy), 32.94 % have an environmental objective (which is not aligned with the EU Taxonomy) 20.57 % have a social objective. (#1B Other E/S characteristics) Includes securities of issuers with favourable ESG characteristics but are not sustainable investments.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### In which economic sectors were the investments made?

Sector	% of Assets
Pharmaceuticals and cosmetics	28.09%
Machine and apparatus construction	10.38%
Holding and finance companies	7.39%
Tobacco and alcoholic drinks	5.46%
Petroleum	3.82%

Road vehicles	3.78%
Miscellaneous services	3.59%
Electrical engineering and electronics	3.57%
Transportation	3.43%
Banks and other financial institutions	3.33%
Building materials and trade	3.29%
Retail trade and department stores	2.80%
Textiles and garments	2.67%
Internet and Internet services	2.57%
Watch and clock industry, jewellery	2.49%
Graphic art and publishing	2.20%
Communications	2.02%
Insurance	1.71%
Foods and non alcoholic drinks	1.57%
Tires and rubber	1.20%
Chemicals	1.18%
Miscellaneous consumer goods	0.96%
Biotechnology	0.50%
Office supplies and computing	0.40%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The following data is as at June 30th 2024. This data includes all securities, excluding derivatives. Due to data limitations, we are not able to disclose information on the proportion of investments on sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels.

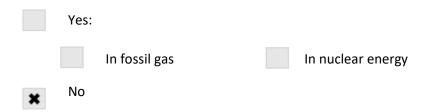

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

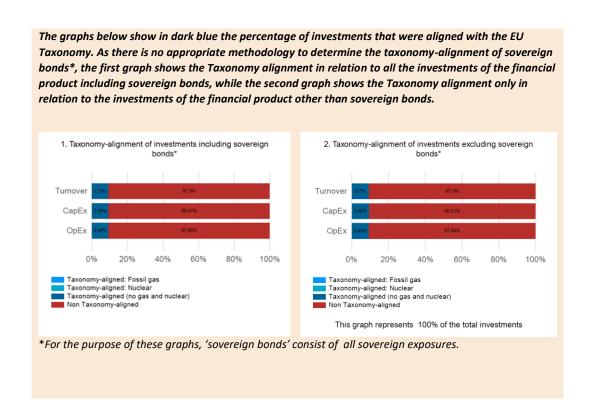

The mandate invested 2.4% in sustainable investments with an environmental objective aligned with the EU Taxonomy. The compliance of the investments of the mandate with the EU Taxonomy was not subject to an assurance by auditors or a review by third parties. The taxonomy alignment of the underlying investments of the mandate is measured by turnover.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
  expenditure
  (CapEx) shows the
  green investments
  made by investee
  companies,
  relevant for a
  transition to a
  green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?<sup>1</sup>

The following data is a quarterly average of the following month end dates: March 31st 2024 and June 30th 2024. The EU taxonomy figures disclosed may differ due to differences in the calculation methodology applied.

What was the share of investments made in transitional and enabling activities?

The share of the mandate made in Enabling Activity: 1.50% measured by Turnover.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. First reporting period.

-

<sup>&</sup>lt;sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

(EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The mandate invested 32.94 % in sustainable investments with an environmental objective that were not aligned with the EU Taxonomy, as permitted and consistent with the investment policy and minimum percentages in its pre-contractual disclosures.

What was the share of socially sustainable investments?

The mandate invested 20.57 % in sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining investments of the mandate were invested in assets aligned with the financial objective of the mandate, cash and cash equivalents for liquidity purposes and derivatives used for investment and efficient portfolio management. As a minimum environmental and social safeguard, the mandate adhered to the Exclusions.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The mandate took the following actions to meet the environmental or social characteristics:

- 1. The mandate invested in securities of issuers with favourable ESG characteristics.
- 2. The mandate made sustainable investments.
- 3. Quarterly Sustainability Review to discuss and review the mandate's qualitative and quantitative environmental and social characteristics.
- 4. The mandate has applied the Exclusions.

How did this financial product perform compared to the reference benchmark?

An Index has not been designated as a reference benchmark to determine whether this financial product is aligned with the environmental or social characteristics that it promotes.

- How does the reference benchmark differ from a broad market index?
  Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

benchmarks are indexes to measure whether the financial product attains the environmental or social

characteristics that they promote.

#### Environmental and/or social characteristics

Did this financial product have a sustain	nable investment objective?
• • Yes	● ○ 🗶 No
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 77.6% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-Fund succeeded in promoting its stated environmental and social characteristics during the reference period by investing in companies that met the environmental, social and governance criteria of the Investment Manager and whose business activities have a growth catalyst tied to underlying global innovation & transitions in Technology, Health and Wellness, Demographics, and Decarbonization ("Global Innovation & Transition Companies"). As part of the investment selection process, the Investment Manager considered the Investment Manager's Risk Exclusion

Policy, Rockefeller ESG Improvers Score™ (REIS), and applied a specific exclusion criteria as described within the Precontractual Annex.

# Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

#### How did the sustainability indicators perform?

As part of the investment selection process the Investment Manager used a "Materiality Map" to identify ESG issues that are material to the risk and return profile of companies across Sustainable Industry Classification System (SICS®) industries. The Investment Manager also assessed potential companies using a proprietary scoring methodology called REIS™ and bottom-up, fundamental analysis of ESG performance and traditional investment factors. The REIS™ analysis ranked company's improvement in performance on material ESG issues relative to industry peers. The Investment Manager utilised data from third party data providers to validate its view on environmental and social characteristics of the Sub-Fund's investments. This included reviewing a company to determine the minimum contribution to at least one UN Sustainable Development Goal (SDG) based on net sales, and whether the company has targets for green house gas ("GHG") emissions reduction.

As of 30 June 2024, the Fund's average REIS<sup>TM</sup> was 50.3. 69% of investments had a positive contribution to the SDGs and 69.5% of investments had carbon emission reduction inivitatives aimed at aligning with the Paris Agreement.

The effective integration of sustainability consideration in the investment process contributed during the reporting period to holding companies that passed the Investment Manager's promotion of environmental and/or social characteristics and good governance practice screens. This is also evident through the Fund's minimum commitment to sustainable investments of 5% being exceeded with 68.1% of the Net Asset Value being invested in sustainable investments, as of 30 June 2024.

The quantitative screens based on the SDG metrics mentioned above, focus on any significant impact on the SDGs and the minimum contribution to at least one SDG based on net sales.

#### ...and compared to previous periods?

This is the first period report prepared for the Sub-Fund.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Through the Materiality Map used within the investment selection process, the Investment Manager routinely considered the following environmental objectives and social objectives of the sustainable investments in which the Sub-Fund partially invested in during the reference period:

The environmental objectives of the sustainable investments in which the Sub-Fund partially invested included improved air quality, sustainable impact on ecosystem services, mitigation of climate change and climate physical risk exposure, mitigation of climate transition risk exposure, sustainable energy management, reduction of GHG emissions, mitigation of environmental lending risk, sustainable packaging and waste, environmental product innovation, sustainable waste and hazardous materials management and sustainable use and protection of water and marine resources. The social objectives of the sustainable investments in which the Sub-Fund partially invested included increased access to healthcare and medicine, access to finance, access to utilities, access to communications, customer privacy and data security, opportunities in health and nutrition, diversity and inclusion, community relations, labor rights and workplace safety, mitigation of raw material risk exposure, increased product quality and safety, chemical safety, talent attraction and retention, responsible finance, responsible product marketing and advertising and supply chain management.

The Investment Manager utilised data from third party data providers to validate its view on the environmental or social sustainable investment objective of the Sub-Fund's investments. This included the Sub-Fund's consideration of the mandatory Principal Adverse Impact ("PAI") indicators and a quantitative review of each company to determine the minimum contribution to at least one UN Sustainable Development Goal (SDG) based on net sales, and whether the company has targets for green house gas ("GHG") emissions reduction.

# How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Investment Manager screened each sustainable investment against each mandatory Principal Adverse Impact ("PAI") indicator. For those PAIs/metrics which yield non-binary results, the Investment Manager utilized a framework established for acceptable thresholds which the Investment Manager has determined do not result in significant harm. Where it was determined further review was necessary, investments progressed to a next level qualitative process based on the Investment Manager's framework, to ensure that they met the "do no significant harm test" in order to be classified as a sustainable investment within the Sub-Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

The Investment Manager screened each sustainable investment against each mandatory PAI indicator. For those PAIs/metrics which yield non-binary results, the Investment Manager utilized a framework established for acceptable thresholds which the Investment Manager has determined do not result in significant harm. Where it was determined further review would be necessary, investee companies progressed to a next level qualitative process based on the Investment Manager's framework, to ensure that such investments could be classified as sustainable investments within the Sub-Fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager utilized metrics that screened for investee companies that have been involved in violations of the UN Global Compact principles or OECD Guidelines for Multinational Enterprises. Additionally, the Investment Manager sought to identify a lack of processes and compliance mechanisms to monitor compliance with the aforementioned UN Global Compact principles and OECD Guidelines for Multinational Enterprises, and aimed to avoid investment in such investee entities. The Investment Manager's shareholder engagement team actively discusses alignment with investee entities on their compliance with UNGC and OECD frameworks.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Investment Manager's framework to ascertain whether an investment company qualifies as a "sustainable investment" and satisfies the "do no significant harm" test includes a systematic screening on metrics related to all mandatory PAIs using third party data. Below is an overview by third-party data provider ISS of the primary Principal Adverse Impact indicators for the fund as of 30 June 2024.

Indicator	ISS ESG Factor	Portfolio Current	Coverage (Applicable Coverage)*	Portfolio (Year-1)	Benchmark Current	Benchmark Coverage	Benchmark (Year-1)
1. GHG Emissions*	GHG Emissions - Scope 1 per Mio EUR Enterprise Value	1.06 (t)	99.00%	1.09 (t)	2,751.18 (t)	99.87%	3,246.22 (t)

#### What were the top investments of this financial product?

The figures here below are calculated on an average basis for the last quarter ends of the financial year of the Sub-Fund.

Largest investments	Sector	% Assets	Country
MICROSOFT CORP	Internet, software & IT services	4.09%	USA
ALPHABET INC -A-	Internet, software & IT services	3.34%	USA
VISA INC -A-	Financial, investment & other diversified comp.	3.30%	USA
TRANSUNION	Miscellaneous services	3.18%	USA
RENTOKIL INITIAL PLC	Miscellaneous services	2.87%	GBR

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 29.01.2024 – 30.06.2024

TEXAS INSTRUMENTS INC	Electronics & semiconductors	2.80%	USA
S&P GLOBAL INC	Graphics, publishing & printing media	2.76%	USA
SCHNEIDER ELECTRIC SE	Electrical appliances & components	2.75%	FRA
IQVIA HOLDINGS INC	Pharmaceuticals, cosmetics & med. products	2.63%	USA
INTERCONTINENTAL EXCHANGE INC	Financial, investment & other diversified comp.	2.60%	USA
TE CONNECTIVITY LTD REG SHS	Electronics & semiconductors	2.53%	CHE
LSE GROUP	Financial, investment & other diversified comp.	1.57%	GBR
APPLIED MATERIALS INC	Electronics & semiconductors	1.34%	USA
AMAZON.COM INC	Retail trade & department stores	1.32%	USA
AGILENT TECHNOLOGIES	Biotechnology	1.31%	USA

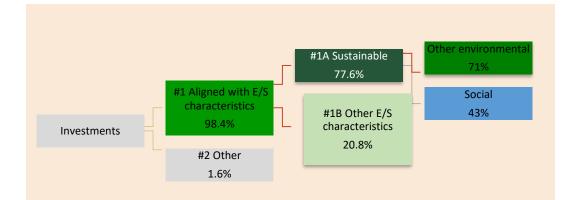

#### What was the proportion of sustainability-related investments?

As of 30 June 2024, 77.6% of the Fund's Net Asset Value was invested in sustainability related investments.

#### What was the asset allocation?

As of 30 June 2024, 98.4% of the Sub-Fund's Net Asset Value was invested in securities were aligned with the environmental and/or social characteristics promoted by the Sub-Fund, meaning that 1.6% of the Sub-Fund's Net Asset Value was invested in assets categorised as "Other" in the chart below. Furthermore, 77.6% of the Sub-Fund's Net Asset Value was invested in sustainable investments.

# Asset allocation describes the share of investments in specific assets.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Please note that the sum of "Other environmental" and "Social" can be higher than the noted 77.6% as one company can contribute to both E- and S-aligned investments.

#### In which economic sectors were the investments made?

Sector	% of Assets
Electronics and semiconductors	20.84%
Internet and Internet services	18.57%
Holding and finance companies	10.35%
Miscellaneous services	7.36%
Pharmaceuticals and cosmetics	6.98%
Machine and apparatus construction	6.93%
Utilities	5.12%
Biotechnology	4.66%
Chemicals	3.75%
Real Estate companies	2.94%
Electrical engineering and electronics	2.82%
Graphic art and publishing	2.81%
Petroleum	2.27%
Environmental services and recycling	2.16%
Communications	1.53%

As of 30 June 2024, the share of investments in companies active in the fossil fuel sector was 3.5%.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional** activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

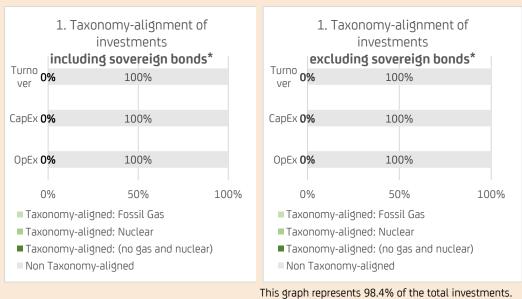

#### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-Fund does not commit to invest in Taxonomy aligned investments. While the Sub-Fund may hold certain investments that may be Taxonomy aligned, none of the Sub-Fund's holdings during the reference period were so aligned.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?1

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

 $<sup>^{</sup>m 1}$  Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- expenditure
  (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee

- What was the share of investments made in transitional and enabling activities?
  Not applicable.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 30 June 2024, 71% of the Sub-Fund's Net Asset Value was invested in sustainable investments aligned with the environmental characteristics promoted by the Sub-Fund.

The Sub-Fund does not commit that its sustainable investments with an environmental objective will be aligned to any minimum extent with the EU Taxonomy.

What was the share of socially sustainable investments?

As of 30 June 2024, 43% of the Sub-Fund's Net Asset Value was invested in sustainable investments aligned with the social characteristics promoted by the Sub-Fund.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 30 June 2024, the Sub-Fund's holdings in other investments was 1.6%. These investments were comprised of cash held. A small amount of cash is maintained for efficient portfolio management purposes. Minimum environmental and social safeguards are not applicable to the fund's cash balance.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Through the use of the Sub-Fund's sustainability indicators mentioned above, the Sub-Fund aligned with its promoted environmental and/or

social characteristics. This is evident with the Fund exceeding the goal of at least 50% of the Sub-Fund's Net Asset Value aligning with environmental and social characteristics promoted by the Sub-Fund (see section "What was the asset allocation?" for further information.

The Sub-Fund's investments met the Investment Manager's framework in regards to the promotion of environmental and/or social characteristics. In addition, as a matter of ongoing practice, the Investment Manager engaged certain portolio companies deemed to be financially material. Further details regarding the Investment Manager's engagement process are as follows.

As an Article 8 Fund, the Fund is committed to the promotion of Environmental or Social characteristics. As mentioned, the Investment Manager's quantiative process may trigger a qualitative review process. As part of the qualitative review, engagement targets related to these issues may manifest. The Investment Manager may then decide to incorporate these goals into their engagement with the held company. Engagement continues throughout the holding period as our Engagement Team follows a four-stage shareholder engagement escalation process to increase the probability of an outcome: (1) Constructive Dialogue, (2) Official Letters, (3) Collaborative Action, and (4) Shareholder Resolutions.

While the onemarkets Rockefeller Global Innovation Equity Fund does not have an engagement mandate, our engagement team does engage with holdings that are in overlap with other funds that do mandate engagement. During 2024, the engagement team discussed environmental topics with companies in the portfolio during 77% of engagements with raw material and supply chain risks, climate transition, environmental product innovation, and waste management being top material topics discussed. The engagement team discussed social topics during 48% of engagements with human capital management, human rights, and work health safety being top material topics discussed.

How did this financial product perform compared to the reference benchmark?

Not applicable.

- How does the reference benchmark differ from a broad market index?
  Not applicable.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.

- How did this financial product perform compared with the reference benchmark?
  Not applicable.
- How did this financial product perform compared with the broad market index?
  Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social

characteristics that they

promote.
